Keratitis—

enzootic ulcerous, in dogs, XXIII, 392. in animals, XV, 1129.

horses, XIX, 582.

infectious, in calves, XXI, 789.

prevalence in Ohio, XV, 720; XVII, 1189.

treatment, XIV, 912, 1129; XV, 511.

Kermes—

himalayensis n. sp., description, XX, 1152.

himalayensis, scale insect affecting, XXIII, 756.

pubescens, notes, XVII, 1171 (Ky.).

Kerosene—

burner, test, XXIV, 290 (Pa.).

destruction of dandelions by, XXI, 436 (S. Dak.).

determination in kerosene emulsions, XVIII, 398.

effect on—

fruit trees, XIII, 370 (N. Y. State). 665 (U. S. D. A.).

nursery stock, XVIII, 1044 (Del.).

seed corn, XXI, 57 (Ill.).

vegetation, XXIII, 235 (Mass.).

emulsion—

analyses, XIX, 963 (Can.).

disinfecting power, XVI, 98 (Okla.). fungicidal value, XV, 161 (N. J.).

notes, XIV, 267 (Cal.).

preparation and use, XVI, 280; XVIII, 141 (Can.); XIX, 159;

XX, 58 (P. R.), 164 (Ky.), 255, 257, 560, 958 (Mo. Fruit);

XXIII, 157 (U. S. D. A.), 458.

preparation, apparatus for, XX, 560.

tests, XXIV, 461 (Can.).

engines, cost of operation, XVIII, 191.

flashing point, XIII, 275 (Mont.).

for treating seed corn, XXI, 246 (Kans.).

lamps for farmhouses, tests, XXIII, 592 (Pa.).

lime mixtures, tests, XVI, 579 (Del.), 993 (Del.); XVII, 881 (N. Y. State), 995 (Del.).

tests, XVIII, 91 (N. Mex.).

use as an insecticide, XVI, 579.

Kestrels, economic relations in England, XIX, 756.

Ketchup. (See Catsup.)

Ketone—

determination in essential oils, XXIV, 199.

formation in acetic fermentation, XX, 110.

Kew Botanic Gardens, treatise, XX, 1133.

Khurti as a green manure, XXII, 442.

Kickxia elastica—

fungus disease affecting, XXIV, 159.

notes, XX, 57, 343.

tapping experiments, XIX, 850; XXI, 144; XXIV, 645.

Kidney—

cysts in pigs, XVII, 908; XXII, 685; XXIII, 486.

infections, use of vaccines in, XXIII, 482.

spotted, in calves, XIII, 1096; XV, 1012.

worm, description, XIII, 190 (U. S. D. A.).

Kidneys—

dogs', fatty substances in, XXV, 379. imported, regulations concerning, XX, 1061.

imported, wholesomeness, XX, 165.

relation to metabolism, XVIII, 964. work of, variation in, XX, 776.

Killdeer, destructive to—

cattle ticks, XXV, 59.

hop flea beetles, XXV, 150.

Kilas, lumber, construction, XVIII, 642 (U. S. D. A.).

Kinase—

effect on digestive processes, XXII, 668. in milk, XVIII, 1160.

Kindergartens, notes, XXIV, 595.

Kinematograph, use in study of cell division, XXV, 371.

King crab, availability of nitrogen in, XIV, 557 (N. J.).

- culture experiments, XVI, 963 (Cal.).
- notes, XIII, 442 (Kans.).
- odoratus, studies, XXV, 645 (N. Y. Cornell).
- palustris, analyses, XXV, 173 (Wis.).
- physiological development, XX, 735.
- pratensis, composition at different stages of growth, XIV, 236.

sativus—

- culture, XIV, 561.
- detection in coffee, XXV, 467.
- growth on different soils, XIII, 932.
- notes, XIII, 323 (S. Dak.).
- poisonous properties, XIV, 194 (Can.).

sylvestris, (See Flat pea.)

tingitanus, economic value, XXI, 732 (U. S. D. A.).

tingitanus, fertilizing value, XXIV, 321 (Wash.).

tuberosus, notes, XIV, 52 (Vt.).

Latitude, changes of, XVIII, 814 (U. S. D. A.).

Lattice, feeding, description, XXI, 490.

Lauchstädt field experiments, XIII, 799; XIV, 852; XVI, 454.

Laudanum—

- adulteration, XXIII, 563 (U. S. D. A.).
- misbranding, XXIII, 65 (U. S. D. A.), 468 (U. S. D. A.), 568 (U. S. D. A.).

Laundering in Indian schools, XXV, 192.

Laundries, planning and sanitation, XXV, 491.

Laundry—

- and dairy house combined, plans for, XXII, 192.
- appliances, notes, XX, 1062.
- equipment, paper on, XXIII, 769.
- power, for farms, XXI, 93 (U. S. D. A.).
- work, cooperation in, XXII, 168.

Lauracæ, transpiration, XX, 829.

Laurel—

- cherry, hydrocyanic acid from, XXIV, 139.
- disease, notes, XVII, 569; XVIII, 650.
- green, analyses, XIII, 108 (Mass.); XV, 384 (Cal.).

Laurel—Continued.

- leaves, permeability, XXV, 26.
- scale insects affecting, XXI, 649.
- Lauric acid, nutritive value, XV, 995.

Lava—

- fertilizer, analyses, XXII, 624 (Conn. State).
- meal, fertilizing value, XXII, 432.
- rock as affected by roots, XXIII, 19.

Lavatera—

- arborea, immunity to chlorosis, XVIII, 648.
- trimestris disease, treatment, XXII, 454.

Lavender plantations, treatise, XXII, 242.

Laverna—

- atra, notes, XIII, 366; XV, 56, 381; XVI, 71 (U. S. D. A.).
- herellera, notes, XX, 1145.

Lawes, Sir J. B., biographical sketch, XIII, 935; XVI, 311; XVII, 542.

Lawn—

- fertilizer and weed destroyer, analyses, XXIII, 371 (N. Dak.).
- grass mixtures, examination, XVII, 241 (Vt.).
- grass, tests, XIII, 751 (N. J.); XVI, 574 (N. J.); XVI, 472 (N. J.).

Lawns—

- dandelions in, XV, 937 (U. S. D. A.).
- fertilizer experiments, XX, 144 (R. I.); XXIII, 26.
- fertilizers for, XVI, 34 (Wis.), 139 (Md.).
- grasses for, XV, 155 (N. J.); XVIII, 1125 (R. I.).
- maintenance, XV, 873 (U. S. D. A.).
- making, XIII, 443 (Iowa); XV, 416 (Okla.); XVII, 976 (U. S. D. A.).
- making and care, XVIII, 444; XIX, 341; XXV, 542 (S. C.).
- seeding, XIII, 1106 (Ohio); XXV, 33 (Ohio).
- trees for, XXII, 642.

Lawrence County, Tenn., soil survey, XVII, 740 (U. S. D. A.).

Lawsonia alba seed oil, analyses, XXI, 111.

Laying houses, descriptions, XXIII, 692 (Wash.).

Layocheinus obsoletus, notes, XXI, 654.

Leach, A. E. biographical sketch, XXIII, 500.

Lead—

- absorption by milk, XXIV, 581.
- acetate—
 - analyses, XXII, 365 (Can.).
 - effect on color in plants, XXI, 627.
 - effect on sugar solutions, XVIII, 912.
 - effect on vegetation, XXII, 235 (Mass.).
- and arsenic in food ingredients, XVIII, 1149.

Lead—Continued.

arsenate—

analyses, XIII, 1014 (Ohio); XVII, 1143 (Mass.); XVIII, 853 (Cal.); XIX, 454 (Conn. State), 1053 (Conn. State); XX, 656 (N. J.); XXI, 308 (Ky.); XXII, 259 (N. J.); 365 (Can.); XXIII, 163 (U. S. D. A.), 367 (Can.), 466 (Oreg.), 766.

as an insecticide, XIII, 472 (Mass.); XV, 385 (Cal.); XX, 163.

arsenate, effect on—

apples, XXIII, 651 (U. S. D. A.); XXIV, 759; XXV, 539 (Me.), 550.

foliage, XXIII, 163 (U. S. D. A.); XXIV, 253 (Mass.).

fruits, XIX, 861.

insects, XIX, 254.

lime-sulphur mixtures, XXV, 506 (Can.).

arsenate—

inspection, XXII, 197 (N. J.); XXIV, 361 (U. S. D. A.).

inspection in Canada, XXIII, 466.

methods of analysis, XIX, 296; XXIII, 163 (U. S. D. A.); XXIV, 197.

notes, XVIII, 358.

poisoning of cows by, XXII, 284 (Mass.).

poisoning of trees by, XX, 452 (Colo.).

preparation, XVIII, 1059 (Ala. College), 1146; XX, 164 (Ky.).

preparation and use, XIX, 53, 1054 (N. J.); XXII, 549.

solubility, XXIII, 164 (U. S. D. A.), 701.

tests, XXIII, 59 (Ill.); XXIV, 447, 461 (Can.).

use in viticulture, XXIV, 168; XXV, 40.

arsenite, analyses, XIII, 108 (Mass.).

arsenite as an insecticide, XV, 385 (Cal.).

as affected by distilled water, XIV, 544.

chromate, insecticidal value, XXIV, 63.

chromate, preparation and use, XXIV, 64.

determination in—

lead arsenate, XXIV, 199.

tin vessels, XXI, 702.

water, XIX, 809; XX, 308; XXII, 411.

effect on action of rennet, XX, 80 (Wis.).

effect on olive oil, XXIII, 112.

in culinary utensils, XXI, 567.

tartaric acid, XX, 310.

limits in tin vessels, XXI, 615.

nitrate, effect on—

peaches, XXIII, 164 (U. S. D. A.).

wheat, XVIII, 625.

Lead—continued.

poisoning of cattle by, XVI, 100, 1028 (Ariz.); XIX, 583; XXI, 483.

poisonous properties, XX, 308.

sublimed, effect on rust formation, XXI, 208 (U. S. D. A.).

sulphate, determination in tartaric acid, XXI, 11.

sulphate, methods of analysis, XXII, 303.

Leads, examination, XXV, 769.

Leaf—

beetles, notes, XVI, 387 (U. S. D. A.).

blight, description and treatment, XVIII, 1142.

blister-mite, notes, XX, 853.

chafers, notes, XIX, 759 (Cal.).

color, effect on internal temperature, XXI, 422.

color, factors affecting, XXIII, 724.

color of plants in winter, XXIII, 243.

crumpler, notes, XIII, 156 (Colo.); 472; XIV, 169 (U. S. D. A.); XX, 161 (Ky.), 1146.

curl, treatment, XIX, 758.

cutter ant, notes, XVI, 623.

cuttings, root and stem development of, XV, 361.

decay, studies, XXV, 221.

development, effect on yield of grapes, XXII, 144.

extracts, effect on soils, XVII, 647.

fall, morphology of, XXV, 27.

footed plant bug, notes, XIII, 60 (Ga.); XIV, 1092 (U. S. D. A.).

form, relation to light requirement, XXIII, 724.

hopper eggs, destruction, XV, 976.

hoppers—

classification, XIX, 352 (Hawaii).

injurious to sugar beets, XXV, 257.

natural enemies, XVII, 477 (Hawaii), 783 (Hawaii), 1092 (Hawaii).

new species and genera, XIX, 57 (Hawaii).

notes, XIII, 156 (Colo.), 660 (U. S. D. A.); XIV, 160.

166 (U. S. D. A.), 987; XV, 379 (U. S. D. A.), 546; XVI, 143 (U. S. D. A.), 275, 483 (N. J.), 1096 (N. J.); XVII, 160 (U. S. D. A.), 265 (U. S. D. A.); XIX, 660 (Fla.), 858.

XX, 257 (U. S. D. A.), 651, 1147.

relation to cotton curly leaf, XXV, 846.

insects, notes, XVI, 1096 (N. J.); XVII, 881.

louse, injurious to sugar beets, XXIII, 348.

miners, notes, XXII, 356.

mold, analyses, XXI, 624.

respiration as affected by Peronospora, XVIII, 347.

Leaf—Continued.

roller, notes, XV, 39 (Me.), 783; XVI, 1096 (Colo.); XXIV, 655 (Hawaii).
scorching by the wind, XIII, 568 (Vt.).
tyer, greenhouse, notes, XXV, 255.
Lean and fat in pigs, deposition, XX, 1068 (Ark.).

Leather—

availability of nitrogen in, XIV, 557 (N. J.).
depreciation by branding, XVI, 294.
dust, analyses, XV, 26; XVII, 1143 (Mass.).
foreign trade of the United States, XIII, 798 (U. S. D. A.).
formation, chemistry of, XXII, 312.
harness, strength of, XX, 486 (Nebr.).
industry in Japan, XIII, 197 (U. S. D. A.).
industry in Russia, XIII, 197 (U. S. D. A.).
jacket grubs, remedies, XVI, 76.
manufactures in Germany, XIII, 197 (U. S. D. A.).
meal, fertilizing value, XX, 723.
methods of analysis, XXIV, 199.
mixture, fertilizing value, XXIV, 225 (R. I.).
new insect pest, XVIII, 63.
refuse, analyses, XV, 26; XVIII, 220 (Mass.).
refuse, utilization, XIV, 717; XVIII, 123.
roasted, rate of nitrification in, XX, 1020.

Leavening products, analyses, XIX, 764.

Leaves—

absorptive properties, XVII, 17.
analyses, XIX, 171.
as a sheep feed, XIX, 171.
as affected by—
copper sulphate, XXI, 548 (Ill.).
fertilizers, XXI, 132.
inorganic salts, XVI, 19.
organic substances, XVIII, 25.
poisons, XXV, 128.
various factors, XXI, 548 (Ill.).
autumn coloration, XXIII, 428; XXV, 221.
blackening of, investigations, XXIII, 131; XXIV, 139.
carbon dioxid assimilation by, XIII, 1018; XIX, 1129, XXII, 530.
chestnut, nitrogen content, XXII, 28.
chlorin content, XXI, 30; XXII, 328.
dead, alkaline compounds in, XVIII, 427.
decomposition in forests, XVI, 444.
development as affected by light, XVII, 651.
development of anthocyanin in, XXI, 228.
diffusion of sunlight by, XXIII, 724.
disinfected, effect on silkworms, XVIII, 854; XIX, 256, 861.
dropped, starch content, XXIV, 31.

Leaves—Continued.

evergreen, starch content, XIV, 329.
fall and renewal, XIX, 728; XXIV, 720.
fertilizing value, XVII, 1054; XVIII, 549.
fixation of nitrogen by, XVII, 564, 951; XVIII, 18, 550, 643; XIX, 520; XX, 620.
forest, feeding value, XVI, 494.
formation of starch in, XXI, 727.
green, as affected by salts, XXIV, 31.
injured, respiration, XIV, 739.
injuries by frost, XVII, 21.
internal temperature, XIX, 632.
light-perception organs in, XXI, 728.
mineral constituents, XXI, 312.
modifications and adaptations, XIV, 1047.
nitrogen assimilation in, XXV, 223.
nitrogen content, XIII, 1018; XVII, 956; XXV, 222.
osmotic pressure in, as affected by light, XXIII, 527.
persistent, increased growth in, XXIII, 27.
phosphoric acid in, XXII, 438.
phosphorus and ash content, XXIV, 229.
photosynthesis in, XX, 129.
proteolytic action, XVII, 542.
red, loss of carbon and oxygen from, XXIII, 725.
relation of form to light requirements, XXI, 533.
removal from water supply, XIV, 927.
respiring, temperature of, XXI, 127.
ricinus, phosphorus body in, XXI, 302; XXIII, 8.
sumac, effect on soils, XXIII, 623.
transfer of plant food in, XXIII, 28.
transpiration, XVI, 1052.
transportation of carbon dioxid in, XXI, 127.
willow, analyses, XXIII, 378.
Lebanon area, Pa., soil survey, XIV, 640 (U. S. D. A.).
Lebbek—
beetle, notes, XXII, 751.
disease, prevalence in Cairo, XXIII, 552.
trees, mealy bug affecting, XXIV, 355.
Leben, micro-organisms causing fermentation, XIV, 476.
Lebia—
grandis, notes, XX, 1048 (Conn. State); XXII, 57 (U. S. D. A.).
scapularis, notes, XVII, 573.
Lecaninae, notes, XXI, 649.
Lecaniodiaspis of Ceylon, XXIV, 259.
Lecanium—
adenostomae, notes, XIII, 669.
ceratoniae, notes, XV, 980.
characteristics of genus, XIV, 887 (N. Y. Cornell).
coffae, notes, XV, 59.

Lecanium—Continued.

- corni (armeniaceum)—
 notes, XIV, 267 (Mich.).
 remedies, XXIV, 262 (U. S. D. A.).

Lycopsis arvensis, studies, XXV, 651 (U. S. D. A.).

Lycosidæ, list of species, XXIII, 564.

Lycetidæ, studies and bibliography, XXV, 261 (U. S. D. A.).

Lycotocoris campestris, notes, XIV, 375.

Lycotoxylon spp., list, XXV, 261 (U. S. D. A.).

Lycetus—

brunneus, notes, XV, 278.

politus n. sp., description, XXV, 261 (U. S. D. A.).

spp., list, XXV, 261 (U. S. D. A.).

Lyda—

memoralis, studies, XXIV, 359.

rufipes, notes, XV, 788.

spinning glands, XIII, 71.

Lye—

analyses, XIV, 170 (Can.).

concentrated, composition, XV, 747.

destruction of cotton foliage by, XX, 553.

use in fruit canning, XVII, 769.

waste, utilization, XVIII, 123.

Lygæidæ, nearctic, catalogue, XXIII, 463.

Lygæonematus erichsonii, occurrence in Minnesota, XXV, 59.

Lygæus—

militaris, notes, XXI, 646.

turcius, injurious to cotton, XXIII, 462 (U. S. D. A.).

Lygeum spartum, notes, XXI, 133.

Lygidea mendax, studies, XXV, 255 (N. Y. Cornell).

Lygocerus of North America, key, XXIII, 666.

Lygus—

invitus, injurious to pears, XXIV, 162.

pratensis. (See Tarnished plant bug.)

Lymantria—

ampla, notes, XIV, 472.

bivittata, notes, XIV, 472.

dispar as affected by cold and moisture, XXII, 359.

dispar, studies on sex differences in, XXIII, 472.

grandis, notes, XIV, 472.

mathura, notes, XIV, 472.

monacha—

control in Austria, XX, 46.

in Sweden, XIV, 887.

notes, XIII, 967, 971; XIV, 672 (U. S. D. A.); XV, 881; XX, 257 (U. S. D. A.), 656; XXV, 250.

remedies, XIX, 1056; XXII, 254.

obsoleta, notes, XIV, 472.

spp., notes, XX, 559.

todara, notes, XIV, 472.

Lymexylon sericeum, notes, XIII, 870 (U. S. D. A.).

Lymph—

bactericidal power, XVI, 822.

coagulation as affected by citrates, XIII, 178.

distribution of tetanus toxin and anti-toxin by, XIII, 389.

flow as affected by strawberries, XIV, 681.

glands, red, in animals, XIX, 782.

hemolytic power, XVI, 707.

Lymphadenitis—

in sheep, XXV, 378.

infectious, pathology of, XVI, 200.

ovine caseous, nature and importance, XIII, 188 (U. S. D. A.).

Lymphangitis—

contagious, notes, XVI, 96, 128, 199, 829.

Lymphangitis—Continued.

epizootic—

- cause, XXII, 388.
- control in Ireland, XVIII, 579.
- disease resembling, XX, 1082.
- etiology and pathology, XIX, 887.
- in Cape of Good Hope, XXIV, 479.
- Hawaii, XVIII, 1163.
- horses, XV, 1121; XXI, 488, 584; XXII, 392.
- mules, XX, 482.
- Ohio, XXII, 782.
- Sudan, XX, 876.
- Transvaal, XVIII, 983; XX, 679.

notes, XV, 727; XVII, 701; XVIII, 774.

parasite, nature, XXIII, 584.

studies and bibliography, XXIV, 86.

treatment, XIX, 781.

in horses, XIII, 996; XIV, 922, 1128; XV, 1020; XVI, 1128.

infectious, in cattle, XXIII, 588.

mycotic, studies, XX, 786; XXIII, 84 (U. S. D. A.), 90 (U. S. D. A.).

prevalence in Minnesota, XXII, 782.

treatment, XVI, 97; XXIV, 481.

ulcerative—

- in Orange River Colony, XX, 1081.
- Philippines, XV, 412; XX, 788.
- Transvaal, XX, 679, 787; XXI, 484.

toxin of, XX, 88.

Lymphatic—

extracts, value in experimental tuberculosis, XXIII, 688.

glands—

- infection, XIII, 89.
- of oxen, studies, XXI, 486.
- tubercle bacilli in, XXIII, 787.
- tuberculosis of, XVIII, 180.

Lymphocytes, effect on tubercle bacilli, XVII, 1113.

Lymphosarcoma, infectious, in dogs, XVIII, 679.

Lynchia maura, parasite of, XVIII, 1064.

Lynx—

- baileyi, destruction, XX, 551 (U. S. D. A.).
- fat, analyses, XVIII, 168.
- new cestode parasite of, XXV, 787.

Lyon beans—

culture experiments, XXIII, 431 (Fla.).

economic value, XXI, 732 (U. S. D. A.).

Lyons area, N. Y., soil survey, XV, 658 (U. S. D. A.).

Lyperosia—

- irritans, notes, XXII, 559.
- longipalpis, studies, XXV, 56.
- transmission of surra by, XXI, 582.

Lysatin in cheese, XIV, 805 (N. Y. State).

Lysimeter—

- construction, XIV, 341.
- investigations, XIII, 427, 835 (Hawaii); XIV, 5, 427, 554; XVII, 1049;

Lysimeter—Continued.

investigations—continued.

XVIII, 314, 718 (Hawaii); XIX, 923.

Lysin—

in cheese, XIV, 696, 805 (N. Y. State).

studies, XV, 1118.

Lysiphlebus—

cerasaphis, notes, XXII, 154; XXIII, 367.

flavidus n. sp., description, XXV, 557 (Md.).

sp., growth as related to temperature, XXIII, 358 (N. H.).

sp., studies, XXIII, 765.

spp., notes, XXV, 557 (Md.).

tritici—

as affected by temperature, XXIII, 460.

destruction of green bugs by, XX, 952 (Okla.).

notes, XIX, 452 (U. S. D. A.); XX, 258 (U. S. D. A.); XXI, 249, 453; XXII, 251 (Kans.).

parasitic on green bug, XXIII, 460.

pupal envelope of, XX, 553.

Lysoform—

antiseptic and toxic properties, XVII, 402.

bactericidal value, XIV, 819.

Lysol—

- effect on seed corn, XXI, 58 (Ill.).
- for destroying phylloxera, XV, 980.
- milk fever, XIII, 393.
- value, XIV, 492.

Lytta—

- otomaria, notes, XIV, 168.
- vesicatoria, notes, XVII, 54.

Macadamia ternifolia, notes, XVII, 867.

Macaroni—

- adulteration, XXIV, 364 (U. S. D. A.).
- analyses, XIII, 1073 (Conn. State); XIV, 1102; XVIII, 855 (Conn. State); XXIV, 467.
- digestibility, XVII, 481 (U. S. D. A.).
- manufacture, XIV, 476 (U. S. D. A.), 1133; XV, 1098 (S. Dak.); XVI, 897 (U. S. D. A.); XVII, 789.
- manufacture in Italy, XV, 247 (U. S. D. A.).
- misbranding, XXII, 767 (U. S. D. A.); XXIII, 168 (U. S. D. A.), 769 (U. S. D. A.); XXIV, 171 (U. S. D. A.), 364 (U. S. D. A.); XXV, 64 (U. S. D. A.), 468 (U. S. D. A.).
- wheat. (See Wheat, durum.)

Macaroons, hydrocyanic acid in, XX, 564.

Macdonald College—

- agriculture in, XVIII, 888.
- announcement, XVIII, 1177.
- notes, XVIII, 198.
- transference to McGill University, XVII, 1127.

Mace—

- adulteration, XIII, 74 (Conn. State); XV, 886.
- Bombay, identification, XVI, 227.
- ether extract, XVII, 271 (Pa.).
- sugar in, XVI, 1103; XVII, 1135.

MacFayden, Allen, biographical sketch, XVIII, 800.

Mach, E., note, XIII, 300.

Machalranthera sp., culture experiments, XXIII, 136 (U. S. D. A.).

Machilus thunbergii oil, properties, XXI, 14.

Machine—

- for cutting cane, description, XXI, 491.
- testing station at Paris, XIV, 928.
- testing station, equipment and work, XIV, 820.
- traction, for irrigating, XXI, 490.

Machinery, wood-pulping, XV, 1083.

(See also Agricultural machinery.)

Macon County, Ala., soil survey, XVII, 740 (U. S. D. A.).

Macrobas unicolor. (See *Epicauta cinerea*.)

Macrocamptoptera n. g. and n. spp., descriptions, XXIV, 758.

Macrocera n. sp., description, XXIII, 159 (Me.).

Macrocerinæ of North America, XXIII, 159 (Me.).

Macroductylus—

- Mexicanus, remedies, XVIII, 557.
- subspinosus. (See *Rose chafer*.)

Macro dendrophoma salicicola, notes, XVII, 377.

Macrodyctium sp., notes, XXI, 458 (W. Va.).

Macrolepidoptera of the Bermudas, XXIII, 560.

Macromia of North America, XXIV, 354.

Macrophoma—

- abietis n. sp., description, XVIII, 650.
- and *Diplodia*, relationship, XVII, 22.
- curvispora, notes, XVII, 984.
- dalmatica, notes, XVII, 985; XX, 157, 1140.
- dyckia n. sp., description, XXV, 47.
- falconeri, notes, XVI, 989.
- helicinum n. sp., description, XIV, 977.
- ligusticum n. sp., description, XIV, 977.
- malorum, notes, XIII, 60 (N. Y. State), 148 (N. Y. State).
- phoradendri n. sp., description, XXIV, 159.
- reniformis, notes, XVI, 482.
- sp., notes, XVIII, 1138 (Conn. State).
- vestita, studies, XXI, 343.

Macrosiphum—

- granaria, notes, XX, 59 (Minn.); 249, 250, 349 (Can.); 554; XXII, 354 (Can.); XXIII, 459.
- pisi, notes, XXI, 453 (Ill.).
- sanborni, notes, XXV, 461.
- sanborni, remedies, XXV, 462.

Macrosiphum—Continued.

- spp., descriptions, XVI, 71 (U. S. D. A.).
- spp., parasitism, XXIII, 460.
- spp., studies and bibliography, XXV, 759 (Me.).
- trifolii, notes, XXI, 249.

Macrosporium—

- catalpæ, notes, XXI, 448.
- commune, fixation of nitrogen by, XX, 17.
- cucumerinum, notes, XIII, 54 (Ga.), 362 (Colo.), 1056; XIV, 260 (Del.); XVII, 765 (Colo.); XIX, 445 (Del.).
- fasiculata, notes, XXIV, 155 (S. C.).
- lanceolatum n. sp., description, XXII, 744.
- nobile, studies, XXI, 340.
- parasiticum, notes, XVI, 170 (N. Y. Cornell).
- porri on onion seed, XXIV, 247 (Mass.).
- sarcinaforme, notes, XIV, 1083; XVII, 567.
- sarcinula, studies, XVIII, 554.
- solani, notes, XIV, 1085; XVII, 1080, 1163; XVIII, 149, 343, 553; XIX, 852 (Fla.).
- spp., notes, XVI, 887 (Ohio); XIX, 659; XXIII, 451; XXIV, 449; XXV, 649 (N. Dak.), 650 (N. Dak.), 750.
- tomato, notes, XIII, 57; XVIII, 152, 533.
- verrucosum, n. sp., description, XIX, 348.

Macroistria angularis, notes, XV, 279.

Macrozamia gum, bacterial origin, XVII, 453.

Mad itch in cattle, XVI, 1030 (Cal.).

Madder, physiological action, XIX, 766.

Mada—

- elegans, growth on different soils, XIII, 932.
- sativa, anatomy of seeds, XV, 986 (Conn. State).

Madison County—

- Ind., soil survey, XVI, 1059 (U. S. D. A.).
- N. Y., soil survey, XXI, 618 (U. S. D. A.).
- Tenn., soil survey, XXI, 618 (U. S. D. A.).

Maercker—

- Bühling solution, tests, XVII, 6.
- Max, biographical sketch, XIII, 206.

Magdalis ænescens, notes, XVI, 791 (Wash.).

Maggot fly, notes, XIV, 273; XX, 82; XXI, 161.

Maggots—

- blood-sucking, notes, XVII, 1095.
- floor, of Kongo region, XVI, 278.
- in sheep, XV, 87; XVI, 927.
- notes, XVIII, 60.
- red, notes, XVII, 785; XX, 853.

Magnesia—

- absorption by plants, XX, 321.
- absorption by soils, XVI, 549.
- and lime—
 - action, XVI, 245.
 - availability, XVII, 121.
 - in animal tissues, XV, 605.
 - ratio for barley, XVIII, 14.
 - ratio for plants, XIV, 14; XV, 1062; XVI, 21, 1065; XVII, 1140, 1149, 1152, 1153; XVIII, 32, 117, 432, 532; XIX, 827, 1021; XX, 321, 728, 1121; XXI, 30, 316, 624; XXII, 433; XXIII, 128, 623; XXV, 725.
 - ratio in soils, XVIII, 1108; XXI, 9; XXIV, 135, 525, 716, 722; XXV, 322, 631.
 - relation to plant growth, XIV, 129.
 - relation to soil fertility, XXI, 624 (P. R.).

Manganese—

and zinc, effect on *Aspergillus niger*, XXV, 325.

as a fertilizer, XXI, 123; XXII, 433; XXV, 827.

carbonate, effect on plants, XIX, 324.

chlorid, effect on potato formation, XXIII, 627 (Ariz.).

compounds, effect on plants, XVI, 251.

compounds, fertilizing value, XIX, 523; XX, 223.

detection in foods, XXIV, 211.

determination, XIII, 916; XIV, 224; XXIV, 211.

determination in—

soils, XV, 550; XXV, 512.

water, XVI, 537; XVIII, 809; XIX, 411.

wines, XXIV, 611.

dioxid, effect on germination of wheat, XXIV, 532.

effect on—

development of *Aspergillus niger*, XXV, 127.

germination of wheat, XVIII, 624.

grass, XXIII, 720; XXV, 827.

growth of pineapples, XXI, 139 (Hawaii); XXII, 240; XXIII, 223 (Hawaii); XXV, 340 (Hawaii).

olive oil, XXIII, 112.

oxidation in soils, XXIV, 223 (U. S. D. A.).

plants, XIX, 1026; XXV, 520, 522.

soils, XXIII, 623; XXV, 122.

fertilizers, comparison, XX, 322.

fertilizing value, XVII, 952, 954; XX, 22, 322, 721, 1018; XXI, 120, 624; XXIII, 128, 626.

in soils and plants, XXI, 717.

metabolism of, XXV, 572.

minimum in animals, XXV, 572.

nitrate, effect on alcoholic fermentation, XXII, 115.

occurrence in Italian soils, XXV, 512.

oxid, effect on plant growth, XIII, 335.

oxid, effect on yield of wheat, XXIV, 532.

role of in plant nutrition, XXV, 731.

salts—

effect on flax, XVI, 41.

effect on plants, XVII, 544.

effect on rice, XVI, 42, 43.

fertilizing value, XIX, 927; XXV, 122.

soluble in soils, XIV, 231.

Manganese—Continued.

sulphate as a cut flower preservative, XX, 540.

sulphate, effect on—

barley, XVIII, 434.

crops, XIX, 536, 831.

plant growth, XXII, 436; XXIV, 31.

soil fertility, XXI, 116.

wheat, XIX, 324.

sulphate, fertilizing value, XIX, 928, 1022; XX, 745, 823, 925; XXII, 718; XXIV, 26.

toxic effect on pineapples, XXV, 731.

utilization by plants, XVIII, 1108.

value and use, XXIII, 126.

Manganous chlorid, fertilizing value, XIX, 434.

Mange— (*See also* Cattle, Dog, Horse, and Sheep mange or scab.)

acarid, treatment, XIX, 786.

control in Ireland, XVIII, 579.

control in New Mexico, XVIII, 578.

danger from imported cattle, XXI, 179.

demodectic, treatment, XVII, 1194; XIX, 787.

description of different forms, XIV, 925.

follicular—

in cattle, XXI, 683.

dogs, XX, 1190.

treatment, XIX, 787; XXII, 587.

mites, notes, XIX, 1184.

notes, XIII, 490.

prevalence in—

Austria, XVII, 1012.

Canada, XXI, 482.

German Southwest Africa, XX, 576.

Germany, XVIII, 774.

Great Britain, XX, 679.

Hungary, XIII, 1090.

Ireland, XXI, 783.

North Dakota, XXI, 381.

Ohio, XX, 183.

Orange River Colony, XVIII, 982.

Sudan, XX, 876.

Transvaal, XX, 679, 787.

psoroptic, in dogs, XXII, 489.

recurrent, in horses, XVIII, 584.

regulations concerning, XXI, 386 (Ky.).

sarcoptic, in—

horses, XIX, 576; XX, 983 (U. S. D. A.).

various animals, XXI, 553.

wolves and coyotes, XXI, 183, 553.

studies, XVIII, 578.

transmission by cats, XX, 577.

treatment, XIII, 696; XV, 1128.

Mangel—

bacterial disease, XIII, 567.

beetle, pigmy, notes, XX, 651.

canker, notes, XVIII, 343.

diseases, notes, XIII, 760; XVI, 381; XVIII, 343.

heart rot, notes, XVII, 1164; XVIII, 343; XIX, 46.

Mangel—Continued.

Rhizoctonia disease, notes, XIV, 1090.
root rot, notes, XVIII, 56.
storage rot, studies, XXV, 245.

Mangels—

analyses, XIII, 269 (Can.); XIV, 176 (Can.); XV, 766; XVI, 249 (Can.), 253, 290 (Can.); XVII, 169 (Can.), 238; XVIII, 1116; XIX, 138 (N. Y. Cornell), 228, 826, 969 (Can.), 1166; XXII, 375 (Can.); XXIV, 470 (Can.), 476.

anatomical structure, XV, 239.

as affected by electricity, XX, 631; XXIV, 332.

Bacillus melanogenes affecting, XXV, 454.

breeding experiments, XV, 239; XVI, 255, 354; XXV, 35.

changes in composition during storage, XIV, 176 (Can.).

composition, XIX, 139 (N. Y. Cornell).

composition as affected by fertilizers, XVII, 754.

cost of production, XXI, 188 (U. S. D. A.).

culture, XIV, 34, 856 (Mont.); XVI, 660; XVIII, 229 (S. C.); XXI, 535 (N. Dak.); XXIII, 631 (Alaska).

culture experiments, XIV, 131 (Can.); XV, 465, 573, 772, 860 (Okla.); XVII, 128 (Can.), 129 (Kans.); XVIII, 132 (Can.); XIX, 138 (N. Y. Cornell), 430, 636 (N. J.); XXV, 35, 230.

culture in New Zealand, XXII, 729.

dry matter content, XXV, 806.

effect on—

excretion by kidneys, XXI, 370 (Iowa).

formation of renal calculi, XXIII, 278 (Iowa), 283 (Iowa), 284 (Iowa).

soils, XX, 435 (Minn.).

electroculture, XIV, 353.

feeding value, XXII, 76 (N. Y. Cornell); XXV, 70.

fertilizer experiments, XIII, 440, 544, 1040, 1042; XIV, 133 (Can.), 346, 434; XV, 766, 767, 768, 1025 (Me.); XVI, 35, 38, 249 (Can.), 253, 456, 457, 660, 869; XVII, 128 (Can.), 238, 239, 346 (R. I.), 358, 449, 654, 755, 848, 952, 1057; XVIII, 27, 132 (Can.), 217, 928, 929, 1114 (R. I.), 1116; XIX, 125 (R. I.), 136 (N. Y. Cornell), 137 (N. Y. Cornell), 219, 221, 228, 424, 430, 637, 934 (N. J.); XX, 20, 430, 723, 932; XXI, 230, 325 (Can.), 426 (N. Y. Cornell), 731; XXII, 126, 322, 331 (Can.), 334, 442, 446, 717, 728; XXIII, 24, 532 (Can.), 534, 626, 633; XXIV, 235, 728; XXV, 217, 442.

for cows, XV, 73, 1113 (Can.); XXII, 477, 595 (U. S. D. A.).

Mangels—Continued.

for fattening lambs, XXIII, 277 (Iowa).

pigs, XX, 968 (N. Y. State).

sheep, XIV, 283; XXIII, 774.

germination tests, XIX, 138 (N. Y. Cornell).

inoculation experiments, XX, 845.

insects affecting, XX, 457, 762, 1146;

XXII, 58 (Hawaii); XXIII, 53.

irrigation experiments, XXI, 36 (Can.); XXIV, 489 (Nev.).

lime nitrogen for, XVI, 759; XVII, 538.

losses during storage, XIII, 130; XV, 771.

planting at different dates, XIII, 238 (Can.).

rotation experiments, XX, 435 (Minn.).

rotting disease affecting, XXV, 45.

seed production, premature, XVII, 238.

seeding experiments, XXI, 426 (N. Y. Cornell).

sewage sludge for, XX, 825, 1023.

varieties, XIII, 35 (Can.), 839 (Can.), 1034 (Can.), 1042; XIV, 346, 351, 434, 752 (Can.), 861; XV, 138, 766, 768, 862 (Can.), 1067 (Can.); XVI, 35, 41, 249 (Can.), 253, 456, 558, 962 (Can.), 1068 (Can.), 1073; XVII, 23 (Mich.), 238, 239, 352, 754, 854 (Can.), 962 (Can.); XVIII, 27, 132 (Can.), 629, 928, 1116; XIX, 27 (Can.), 138 (N. Y. Cornell), 430, 636, 1132 (Can.); XX, 228, 637; XXI, 36 (Can.), 37 (Can.), 322 (Can.), 323 (Can.), 324 (Can.), 325 (Can.), 327 (Can.), 731; XXII, 330 (Can.), 442; XXIII, 531 (Can.), 533, 728 (N. Dak.); XXIV, 34, 432 (Can.), 435 (Can.), 729; XXV, 333, 529 (Can.).

yield as affected by—

weather, XIX, 414.

windbreaks, XXIII, 435.

Mangers, concrete, construction, XVIII, 74 (N. J.); XXII, 589 (Wis.).

Manginia ampelina, notes, XVI, 482, 678; XVIII, 153.

Mango—

black blight, notes, XVII, 1084.

blight, treatment, XXII, 42 (Hawaii).

bloom blight, description and treatment, XXIV, 49.

bloom blight, notes, XVIII, 746 (Fla.).

diseases, notes, XVII, 1155 (Hawaii); XVIII, 342, 452.

industry in Hawaii, XIX, 339 (Hawaii).

preserves, analyses, XVI, 669 (U. S. D. A.).

remarkable, description, XIV, 1070.

root disease, notes, XIX, 547.

shield scale, notes, XIV, 887.

weevil, bibliography, XIX, 162.

Mango—Continued.

weevil, notes, XVII, 676, 680; XVIII, 58, 355 (Hawaii); XIX, 438 (Hawaii); XXIII, 764; XXIV, 751.
weevil, studies, XXV, 561 (U. S. D. A.).

Mangoes—

adventitious embryos, studies, XXI, 320 (Fla.).
analyses, XIV, 522; XVI, 669 (U. S. D. A.); XVII, 788; XXI, 307 (Fla.).
blooming period, XXII, 42 (Hawaii).
budding, XV, 677.
budding and inarching, XXII, 41 (Hawaii).

budding experiments, XVI, 972; XVII, 350 (U. S. D. A.).

canning, XVII, 578, 768.

cecidomyiid fly affecting, XXIV, 754.
composition during ripening, XX, 1161.
culture, XVII, 1155 (Hawaii); XVIII, 239 (U. S. D. A.), 1044 (P. R.).

culture—

experiments, XX, 39 (P. R.); XXIV, 38.

in Florida, XIII, 746; XIV, 45; XVII, 1071; XXV, 540.

Hawaii, XV, 133 (U. S. D. A.);

XVII, 350 (U. S. D. A.);

XX, 143 (Hawaii).

Jamaica, XXI, 334.

Porto Rico, XIV, 864 (U. S.

D. A.); XVII, 351 (U. S.

D. A.); XVIII, 236 (U. S.

D. A.).

host of cacao thrips, XXV, 852.

improvement by hybridization, XV, 585.

insects affecting, XV, 378; XVII, 1155 (Hawaii); XXIII, 258 (U. S. D. A.); XXIV, 49; XXV, 358 (Hawaii).

new, descriptions, XXI, 738 (U. S. D. A.); XXV, 540 (U. S. D. A.).

notes, XIII, 953; XX, 239 (U. S. D. A.); XXIV, 147 (P. R.).

picking and packing experiments, XXV, 741 (P. R.).

polyembryos in, XIX, 126.

preparation and use, XXV, 164.

preservation, XVII, 768.

propagation, XIII, 248; XIV, 658;

XV, 365 (U. S. D. A.); XVIII, 638;

XXII, 538, 642 (Hawaii); XXIII,

240 (Hawaii); XXIV, 736 (U. S.

D. A.); XXV, 337 (Hawaii).

ripening investigations, XX, 433.

shield budding, XXII, 642 (Hawaii); XXIII, 734.

shipping and transplanting, XXII, 41 (Hawaii).

shipping experiments, XVII, 662.

thrips affecting, XXIII, 362.

variation in, XIX, 742.

varieties, XIV, 356 (U. S. D. A.);

XVII, 1155 (Hawaii); XIX, 338;

XX, 1132; XXII, 236 (P. R.), 449;

XXV, 740 (P. R.).

whip grafting, XXIV, 148 (P. R.).

Mangosteen bacterial disease, notes, XX, 947.

Mangosteens—

description, XV, 538.

inarching of, XXIV, 736 (U. S. D. A.).
notes, XXV, 337 (Hawaii).

Mangrove—

barks, analyses, XVI, 740; XXI, 547.

swamps of Malaya, studies, XXIV, 151.

swamps of Philippines, use, XXI, 547.

Manihot—

glaziovii—

analyses, XIX, 1149.

coagulation, XIX, 1047.

culture, XIII, 858; XVI, 267.

culture experiments, XX, 343; XXI, 639.

in Brazil, XVII, 1075; XVIII, 841.

Hawaii, XIX, 148; XX, 245 (Hawaii).

notes, XX, 57.

rubber, analyses, XX, 449.

tapping experiments, XIX, 344.

spp., notes, XIX, 1046.

Manila cream, examination, XXI, 412.

Manioc. (*See* Cassava.)

Manna—

Boer, culture experiments, XXIV, 729.

grass, floating, analyses, XVII, 997.

grass, notes, XVIII, 229 (Wyo.).

gum, culture and use, XX, 446.

hay, analyses, XIX, 1166.

production by olive trees, XIII, 112.

Sicilian, analyses, XXV, 368.

tree, culture, XIX, 545.

Mannan—

digestibility by diastase, XIX, 969.

food value, XIX, 344.

presence in plants, XV, 264; XVI, 537.

soluble, nutritive value, XXIV, 367.

Mannite—

as a reserve food in plants, XVI, 541.

assimilation by plants, XVIII, 26.

effect on *Azotobacter chroococcum*, XXV, 723.

effect on nitrogen fixation, XXII, 121 (N. J.).

food value for nitrogen-fixing organisms, XXII, 428.

formation from fat, XXII, 669.

in olives, XIII, 527, 715.

notes, XXIV, 509.

nutrient value, XX, 719.

Mannitol, determination in wine, XIII, 1102.

Mannose—

determination, XXI, 611.

determination in sugar-cane products, XIII, 222.

effect on hydrolysis of starch, XXIV, 511.

formation in orchids, XIV, 330.

in seed coats of peas, XXIII, 704.

presence and detection in plants, XIV, 421.

Manometer, description, XIII, 563.

Mansonina—

spp., studies, XX, 1153.

uniformis, transmission of dengue fever by, XX, 1153.

Manson's eye worm of chickens, XVI, 611 (U. S. D. A.).

Manteca disease, notes, XIV, 780 (Ariz.); XV, 937 (Ariz.).

Mantid, Chinese, notes, XVI, 483 (N. J.); XVII, 265 (U. S. D. A.); XIX, 1054 (N. J.); XXII, 160 (N. J.); XXV, 459 (N. J.).

Mantidæ, imported, notes, XV, 167 (N. J.).

Mantis—

carolina, notes, XVIII, 1061.

European, notes, XVI, 70 (U. S. D. A.).

European praying, XIV, 464.

religiosa, notes, XIV, 586 (N. J.); XVIII, 1061.

Mantispidæ of Japan, XXIV, 360.

Manual training—

for country boys, XXII, 594.

home lessons in, XIX, 1193.

in public schools, XX, 692; XXI, 698.

rural schools, XVII, 196; XVIII, 889; XX, 393.

secondary schools, XIX, 792.

summer schools, XVIII, 999; XIX, 1193 (Can.).

instruction for teachers, XXI, 99.

instruction in Oklahoma, XXI, 98.

relation to nature study, XVII, 1200.

Manufactures, Senate Committee hearings on, XXIII, 568.

Manure— (*See also* Cow, Poultry, Sheep, etc.)

analyses, XV, 663 (Mass.); XVIII, 9 (N. Dak.), 220 (Mass.), 619 (Conn. State); XIX, 625, 626 (N. J.), 720 (Ohio); XXIII, 129; XXIV, 23.

analyses, errors in, XIV, 938.

analyses, interpretation for farmers, XVII, 939.

as affected by food, XVIII, 792 (U. S. D. A.).

ashes, analyses, XXII, 325 (Can.).

ashes, fertilizing value, XIX, 625.

availability of nitrogen, XIII, 932; XIX, 627 (N. J.); XXI, 530 (N. J.).

bacteria in, XVI, 653.

barnyard. (*See* Barnyard manure.)

chemistry of, XXV, 422.

decomposition, XXI, 529.

decomposition as affected by bacteria, XIII, 836.

decreasing supply in England, XXII, 524.

denitrifying organisms in, XIV, 428.

deterioration, XXV, 516 (Colo.).

disinfection investigations, XXIII, 625.

dissemination of tuberculosis by, XXII, 84 (Nebr.).

distributors, descriptions, XXI, 87.

distributors, tests, XXI, 392.

distribution, XIX, 894 (U. S. D. A.).

Manure—Continued.

effect on—

activity of bacteria, XXV, 525.

apples, XXIII, 342 (Pa.).

germination of seeds, XXI, 737 (Iowa).

organic matter in soils, XXIII, 621.

plant growth, XXV, 825 (Va.).

productivity of black soils, XXII, 429.

quality of tea, XXIV, 41.

soil bacteria, XXII, 319.

soil fertility, XIX, 822 (U. S. D. A.); XXII, 523.

soil moisture, XXIII, 125.

soil temperature, XV, 654.

solubility of phosphoric acid, XXI, 223 (Pa.).

toxicity of soils, XIX, 14 (U. S. D. A.).

variation in peas, XXII, 528.

effects of continuous use, XXV, 821 (Pa.).

fermentation, XIII, 633; XVIII, 325.

fertilizing value, XIX, 227, 424; XXI, 336, 528; XXII, 23 (Ohio), 46 (Hawaii), 323, 334; XXIII, 39 (Miss.), 125, 136, 235, 334, 422,

433; XXIV, 22; XXV, 335, 510.

fertilizing value as affected by rations, XVII, 1102 (Me.).

kraal, analyses, XXIII, 23.

kraal, preservation, XXIII, 625.

Krotzaurer, fertilizing value, XVI, 554.

lawn-sand, analyses, XXIII, 325.

liquid—

analyses, XIII, 1014 (Ohio); XVI, 454 (Mass.); XVIII, 326; XX, 318.

cisterns for, XVI, 654.

conservation, XVIII, 618.

fertilizing value, XIX, 327; XXI, 120, 225, 231; XXV, 32, 428.

for sugar beets, XXII, 125.

loss of nitrogen in, XVII, 649; XX, 318; XXV, 427, 517, 826.

nitrogen content as affected by feed, XX, 318.

preservation, XVI, 139.

preservation with iron sulphate, XXII, 716.

relation to sugar beet diseases, XXIII, 348.

sampling and storing, XIX, 218.

loss by leaching, XIV, 557 (N. J.); XV, 128 (N. J.).

loss of ammonia from, XXV, 22.

losses in, XIII, 435 (N. J.); XV, 128 (Pa.), 937 (U. S. D. A.).

methods of application, XIV, 750.

nitrogenous. (*See* Nitrogenous manures.)

platforms, descriptions, XVIII, 918.

plowing under, XIV, 850.

Manure—Continued.

preservation, XIV, 129, 233, 234, 342; XVI, 653; XVII, 845, 1051; XVIII, 121, 628; XIX, 520, 522, 523, 720 (Ohio), 721; XXIII, 125, 532.

preservation with—

didymium chlorid, XVIII, 326.

gypsum, XV, 234, 1062.

lime, XVI, 654.

preservative, analyses, XV, 553.

preservative, test, XV, 25.

production, XVII, 847; XIX, 720 (Ohio), 973 (Ohio).

production by different animals, XX, 319.

production in Paris, XXII, 429.

propagation of wheat smut by, XXII, 745.

rate of production, XV, 73 (Ala. College).

reaction, effect on crops, XVIII, 32, 121.

relation to soil fertility, XXIV, 22.

residual effects, XIX, 428 (Miss.); XXI, 530 (N. J.).

rotted, fertilizing value, XXIII, 637 (Minn.).

sampling, errors in, XIV, 938.

shed, cement, description, XXV, 490.

spent, analyses, XXIII, 526 (Pa.).

spreader, notes, XVII, 815.

spreader, test, XIII, 195; XVIII, 90.

sterilization, XVI, 653.

straw, fertilizing value, XIX, 119, 625 (Ind.).

substitutes for, XXII, 430.

temperature of, as affected by various substances, XXIII, 625.

transmission of tuberculosis by, XXI, 381.

transportation over uneven ground, XIV, 717.

use, XIII, 441; XVIII, 121; XXV, 516.

use in forcing houses, XIX, 391 (U. S. D. A.).

Manures—

action as affected by preservation, XVIII, 121.

action of, XX, 1018.

and fertilizers, treatise, XXI, 529, 719. soils, treatise, XXIII, 319.

application, XIII, 436.

as affected by disinfectants, XXI, 314.

bone, analyses, XXIII, 325.

composition, XVIII, 216.

effect on—

composition of grains, XXI, 198.

production of mutton, XIV, 899.

soils, XVI, 956 (Minn.); XXIII, 320.

effects of, XVI, 311.

farm, discussion, XVI, 245 (Vt.).

farm, utilization, XV, 344.

leached and unleached, XIII, 436 (N. J.), 727 (N. J.).

Manures—Continued.

mixed, analyses, XX, 827.

notes, XVIII, 822.

organic phosphoric acid in, XXI, 623.

production in Italy, XX, 728.

strawy, decomposition by lime and sulphuric acid, XVI, 33.

treatise, XIV, 343.

use in Algiers and Tunis, XIV, 851.

use in Egypt, XIV, 1057.

valuation, XIV, 1057.

Manurial—

earth, analyses, XXI, 225.

practices in Japan, XX, 689.

requirements of soils. (*See* Soils.)

salts, reaction with soils, XXI, 713 (N. H.).

values, calculation, XIX, 1127.

Manuring by farm tenants, XXIII, 125.

Mapé starch, analyses, XV, 598.

Maple—

and cane sirup, misbranding, XXIII, 271 (U. S. D. A.).

cane sugar sirup mixtures, detection, XXII, 709 (U. S. D. A.).

borer, notes, XIV, 63 (Conn. State), 780; XVI, 892 (Me.); XIX, 352, 1053 (Conn. State); XX, 653; XXI, 248.

canker, notes, XIX, 656 (Wash.).

caterpillar, antlered, studies, XXI, 759 (N. H.).

disease, notes, XIX, 155; XXIII, 247, 553.

for packing boxes, statistics, XVIII, 1136 (U. S. D. A.).

Merulius lacrymans—

as a cause of cancerous tumors, XV, 297.

differential characters, XXII, 148.

enzymes in, XIII, 621.

injurious to timber, XXIV, 353.

notes, XIII, 468; XIV, 162, 778; XVI, 70; XVII, 1167; XVIII, 650; XIX, 754; XX, 56.

studies, XV, 592; XVIII, 1139 (Conn. State); XXIII, 653, 751.

treatise, XX, 454.

Mesembryanthemum—

and portulacas, book, XX, 942.

crystallinum, nitrogen and phosphoric acid in, XVIII, 329.

forskahlii, bread from, XXIV, 762.

Mesochorus—

cimbicis, notes, XXI, 57 (U. S. D. A.).

pernicius n. g. and n. sp., description, XXV, 857.

Mesocrina pegomyæ, description, XXI, 249.

Mesograpta polita, notes, XIII, 262 (Del.).

Mesoleius aulicus, notes, XX, 1152; XXV, 58.

Mesoleuca truncata, notes, XV, 166 (Can.).

Mesophytes in Nebraska, studies, XIV, 838.

Mesopsylla eucta n. sp., description, XXIV, 758.

Mespilus—

Crategus, graft, XIV, 447.

germanica, post-ripening of, XXV, 202.

japonica, prussic acid in, XVIII, 544.

Mesquite—

as affected by mistletoe, XXI, 534.

effect on pastures, XX, 437 (U. S. D. A.).

grass, notes, XIII, 731 (U. S. D. A.); 732 (U. S. D. A.).

notes, XIV, 665.

spread in Arizona, XXIII, 137 (U. S. D. A.).

Mess manual and cookbook in United States Navy, XIV, 789.

Mesua ferrea—

analyses, XXIV, 309.

seed oil, analyses, XXI, 111.

Metabolic—

minimum in man, XXIII, 70.

products of leaf, movement through petioles, XXV, 523.

Metabolism—

and diet, treatise, XXIII, 371.

inheritance, bibliography, XXIII, 273.

animal, as affected by free nitrogen, XIX, 462.

animal, problems in, XVIII, 861.

as affected by—

alcohol, XIII, 578; XXI, 471.

ash constituents, XXIII, 772.

automobiling, XIX, 670.

boric acid, XIV, 175.

castration, XXII, 672.

cocoa, XX, 68.

distillery slop, XXI, 472.

excess of fat, XX, 364.

Metabolism—Continued.

as affected by—continued.

- fasting, XIV, 73.
- food, XIII, 376.
- formaldehyde, XIII, 774.
- insufficient diet, XVIII, 861.
- lecithin, XXIII, 470.
- muscular work, XIV, 594; XXIII, 470.
- partial inanition, XXIV, 84.
- physical conditions, XXI, 664.
- poisons, XXIV, 173.

Mosquitoes—Continued.

- transmission of—
 diseases by, XIV, 171 (U. S.
 D. A.), 403, 403 (U. S. D. A.),
 883; XV, 62, 983; XVII, 884;
 XVIII, 99; XX, 680, 985, 1153;
 XXI, 61 (U. S. D. A.), 587,
 646; XXII, 556, 560; XXIII,
 185; XXIV, 163, 280, 792.
 filariasis by, XXIV, 60.
 horse sickness by, XXIII, 663.
 leprosy by, XXIV, 755.
 lymphangitis by, XXI, 584.
 malaria by, XV, 384; XXIV, 60,
 357, 755; XXV, 56, 359 (U. S.
 D. A.).
 surra by, XXI, 582.
 yellow fever by, XV, 877.
 treatise, XIII, 673; XV, 983; XIX,
 962; XXV, 663.
 trypanosomes in, XX, 985.
 variation in, XVIII, 651.
 West African, notes, XXIV, 164.
 yellow fever, distribution, XXIV, 98.
 Moss—
 analyses, XXV, 368.
 caragheen or Irish, carbohydrates,
 XIII, 165.
 destruction, XVIII, 752.
 destruction on cranberry bogs, XX, 41
 (Wis.).
 effect on—
 germination of seeds, XX, 945.
 organic matter in soils, XXIII,
 621.
 wood accretion, XXIV, 445.
 jellies, food value, XVIII, 857.
 land, clearing, XXIII, 632 (Alaska).
 land, improvement, XXII, 322.
 litter, analyses, XVI, 557.
 litter, value, XVIII, 618.
 manure, value, XVIII, 345.
 reindeer—
 analyses, XVIII, 978.
 digestibility, XXIV, 671.
 for cows, XVIII, 978.
 removal from fruit trees, XIII, 673.
 Motacilla alba, feeding habits, XIV, 551.
 Moth—
 bean, economic value, XXI, 732.
 borers, notes, XX, 1146; XXIV, 255.
 eggs as affected by passage through
 birds, XXIII, 560.
 larvæ, destruction of bagworm eggs by,
 XXI, 556.
 larvæ, notes, XXI, 561.
 Moths— (See also Lepidoptera.)
 American, revision, XXI, 651.
 breeding experiments, XXI, 452.
 clothes, life history, XXI, 92.
 cochylis and eudemis, remedies, XXIV,
 57.
 crambid, new species, descriptions,
 XXI, 651.
 description, XIII, 1065.
 destruction in vineyards, XXII, 365.

Moths—Continued.

injurious to—

- algeroba, XXIII, 254 (Hawaii).
- larches, XXI, 652.
- stored seeds, XXI, 655.

lantern traps for, XIV, 272 (N. Y. Cornell); XVI, 280.

life history, XIV, 467; XX, 592.

night-flying, trap for, XX, 160.

of British Isles, treatise, XXIV, 258.
on cranberry marshes, XVIII, 1047 (Wis.).

parasitic, on candle flies, XXIII, 757.
parasitism, XIV, 676.

plume, of Ceylon, XXIII, 662.

pyralid, injurious to beets, XXIV, 354.

remedies, XIX, 161 (N. J.).

scale-eating, notes, XXV, 54.

sex inheritance in, XX, 1169.

silk, egg development, XXIII, 759.

studies on sex differences in, XXIII, 472.

tortricid, prevalence in Hawaii, XXIII, 254 (Hawaii).

treatise, XV, 489.

wax, notes, XIX, 760 (U. S. D. A.).

Motor—

cars, alcohol, use in agriculture, XV, 729.

freight cars in country districts, XV, 416.

petroleum, trials, XVI, 830.

plow, description, XXI, 291, 589.

power in agriculture, XXV, 597.

steam turbine, use in agriculture, XVI, 209.

trucks *v.* horses, comparison, XXIV, 580.

Motors—

agricultural—

descriptions, XVIII, 290.

tests, XVII, 599; XX, 485.

treatise, XVI, 306.

alcohol, in Germany, XIII, 289.

alcohol, use in agriculture, XVIII, 990.

electric, use in agriculture, XVIII, 388; XXI, 490.

farm, textbook, XIX, 990.

farm traction, XVII, 815.

heavy, effect on roads, XX, 792.

hydraulic, treatise, XVII, 710.

injection, XIV, 405.

oil, at Newcastle exhibition, XXI, 490.

oil traction, tests, XXI, 490.

peat gas, XVII, 93.

small, tests, XIX, 989.

use in agriculture, XIV, 405.

wind, XVII, 919.

Mottles in butter, cause and prevention, XIII, 988; XVI, 1125 (N. Y. State); XVII, 79.

Moufons, host of *Multiceps multiceps*, XXIV, 87 (U. S. D. A.).

Moulée, analyses, XVIII, 167.

Mound building prairie ant, notes, XX, 352 (Kans.).

Mount—

Hermon School, instruction in agriculture, XV, 4.

Mitchell area, N. C., soil survey, XV, 658 (U. S. D. A.).

Weather, building operations at, XXIII, 311 (U. S. D. A.).

Whitney, altitude, XVII, 637 (U. S. D. A.).

Whitney, notes, XV, 856 (U. S. D. A.).

Mountain—

ash—

analyses, XVIII, 143.

culture, XXV, 836 (Alaska).

disease, investigations, XXIII, 456.

disease, notes, XV, 377; XXIII, 247.

pear blight affecting, XXIV, 451.

scale, notes, XXIV, 255 (Mont.).

climbing, utilization of food in, XIX, 163.

dairying in Norway, XXII, 78.

grazing lands, revegetation, XXII, 35 (U. S. D. A.).

Indian pink, analyses and digestibility, XXIII, 72 (Nev.).

laurel, poisoning of animals by, XIX, 1079 (U. S. D. A.).

pine beetle, notes, XIV, 66.

rat, relation to spotted fever, XXII, 683.

slopes, formation of precipitation on, XXIII, 515.

slopes, reforestation, XV, 1082; XVI, 473.

timothy, notes, XVIII, 229 (Wyo.).

Mountaineers, dietary studies, XXII, 468 (U. S. D. A.), 469 (U. S. D. A.).

Mountains—

effect on atmospheric moisture and temperature, XXIII, 118.

effect on storms, XX, 1012 (U. S. D. A.); XXI, 113 (U. S. D. A.).

electric perils on, XIX, 916 (U. S. D. A.).

Mouse— (*See also* Mice.)

grass, analyses, XXIV, 769.

plague organism, XIV, 843.

typhoid bacillus, XIII, 22, 991; XIV, 337; XV, 1056; XVII, 1194; XXV, 881.

typhoid, notes, XVI, 340.

typhoid, studies, XVII, 406.

Mowing machines—

attachments, XVI, 830.

monograph, XVI, 106.

tests, XIII, 795; XIV, 928; XVI, 209, 306; XVII, 91; XX, 989.

Mowrah meal, digestibility, XIV, 1104.

Mowrin, properties, XXIII, 8.

Mucedin—

cleavage products, XV, 749.

in wheat gluten, XVI, 581.

Mucic acid, relation to carbohydrate metabolism, XXV, 271.

Mucilage, effect on germination of seeds, XXIV, 534.

Mucin—

in urine of horses, XVII, 80.
production by bacteria, XVI, 186, 231.

Muck—

analyses, XIII, 526 (Vt.), 540 (Mass.), 730 (Conn. State), 730 (Mass.); XIV, 10 (Vt.), 130 (Can.), 196 (N. H.), 1045 (Vt.), 1058 (N. H.); XV, 345 (Ind.); XVI, 34 (Mass.); XVII, 221 (Vt.), 229 (Mass.), 847 (R. I.), 1041 (Vt.), 1143 (Mass.); XXII, 325 (Can.), 624 (Conn. State).
ashes, analyses, XVII, 122 (Can.); XIX, 930 (Can.); XXII, 325 (Can.).
ashes, fertilizing value, XIX, 930 (Can.).
beds in Indiana, XIII, 31 (Ind.).
fertilizing value, XIII, 332 (Me.), 634 (N. H.); XVI, 246 (Can.); XIX, 625 (Ind.); XXI, 336.
soils, (See Soils, muck.)
value, XIV, 96 (U. S. D. A.)
water-holding capacity, XVI, 650 (Mich.).

Mucoids, connective tissue, digestibility, XVI, 393.

Mucor—

corymbifer, inoculation experiments with animals, XVI, 301.
exitiosis, notes, XIV, 67; XX, 947.
locusticida, notes, XIII, 575.
mucedo as affected by—
metallic salts, XIV, 422, 742.
nutrient solutions, XXII, 27.
radium, XXV, 222.
mucedo, poisoning of horses by, XIX, 576.
pathogenic species, XV, 610; XVII, 186.
racemosus, effect on nitrates, XX, 218.
rhizopodoformis, relation to blind staggers, XXIV, 284 (Kans.).
rouxianus and Micrococcus sp., symbiosis, XIV, 335.
source of nitrogen for, XXII, 725.
spp. as affected by sulphur dioxide, XXI, 149.
spp., descriptions, XXV, 546.
spp., inoculation experiments, XVII, 917.
spp., latent vitality of spores, XXIII, 721.
spp., occurrence in silage, XXIII, 630.
stolonifer—
fixation of nitrogen by, XVIII, 1027.
respiration as affected by light, XIV, 839.
respiration as affected by media, XIV, 742.
studies, XX, 1138.
studies, XX, 1138.

Mucorineæ—

new organ of, XXV, 750.
sexual reproduction, XVI, 336.
sexual studies, XXIV, 28.

Mucormycoses in man and animals, XV, 610.

Mucuna—

lyoni, analyses, XXI, 307 (Fla.).
pruriens, destruction of scale insects by, XXI, 658.
utilis, notes, XIII, 442 (Kans.), 443 (Tex.); XIX, 230 (U. S. D. A.).

Mucus, affinity for hydrochloric acid, XXV, 66.

Mud—

alluvial, arrest and utilization, XXV, 626.
analyses, XIV, 130 (Can.); XV, 24; XVI, 34 (Mass.); XVII, 229 (Mass.); XVIII, 121 (Can.), 209; XIX, 1020; XX, 827; XXI, 316; XXII, 325 (Can.).
filter press, fertilizing value, XXII, 442.
lake, fertilizing value, XVI, 34 (Wis.).
lime, fertilizing value, XXI, 731.
notes, XIV, 719 (Ariz.).
of Piave River, analyses, XIV, 1059.
Yallah salt ponds, studies, XXII, 119.
sea, as a fertilizer, XXIII, 325.
showers, notes, XIV, 552.
shrinkage on drying, XXIII, 620.
Muhinyo, studies, XXIV, 586.
Muhlenbergia—
ambigua, notes, XIII, 323 (S. Dak.).
gracillima, notes, XIII, 732 (U. S. D. A.).
porteri, notes, XIII, 732 (U. S. D. A.).
schreberi as a food plant of plum aphids, XXIII, 156 (Okla.).
Mulberries—
analyses, XVIII, 143.
as a food plant for birds, XXIII, 154 (U. S. D. A.).
chemical studies, XVI, 465.
culture, XIV, 891, 966 (U. S. D. A.), 989 (U. S. D. A.); XV, 280, 281; XVI, 567; XVII, 58, 575, 885; XVIII, 258, 337 (N. C.); XIX, 744 (U. S. D. A.).
culture—
and care, XXIV, 559.
in Hawaii, XX, 143 (Hawaii).
Indo-China, XVIII, 755.
Italy, XXI, 162.
Pennsylvania, XIX, 741.
pots, XVI, 776.
Texas, XXII, 640.
treatise, XIV, 660; XX, 1155.
for sand-binding purposes, XIX, 1045.
growth as affected by—
carbon bisulphid, XXI, 545.
nitrate of soda, XXI, 546.
insects affecting, XXIV, 163, 356.
milk coagulating agents in, XIX, 508.

Mulberries—Continued.

- notes, XVIII, 892 (U. S. D. A.).
- paper, distribution of rennet in, XXI, 534.
- paper, notes, XIV, 256 (Cal.).
- pruning, XVIII, 1051 (Ohio).
- Russian, notes, XVIII, 1133 (U. S. D. A.).
- umbrella, breeding, XVIII, 146.
- varieties, XVI, 1034 (Nev.); XVIII, 755; XIX, 744 (U. S. D. A.); XXII, 441.
- white, notes, XIV, 45 (Mont.).
- white, propagation by cuttings, XVI, 162.

Mulberry—

- bacterial blight, studies, XXIII, 454.
- bacterial disease, notes, XVII, 153 (Conn. State); 1162; XVIII, 644.
- borer, notes, XXV, 251.
- Diaspis, parasitism, XXV, 853.
- diseases, notes, XVIII, 846; XXII, 51, 52; XXIV, 164, 650.
- diseases, studies, XIII, 61, 866; XIV, 264; XXIII, 246.
- dwarf disease, notes, XIV, 1090.
- enzymes, studies, XXII, 530.
- fruit disease, notes, XIV, 531.
- juice, analyses, XXI, 767.
- leaf curl, notes, XIII, 965.
- leaves—
 - digestibility, XX, 62.
 - disinfection, XVIII, 854.
 - for feeding silkworms, XV, 1094.
- mildew-like disease, notes, XVI, 477.
- posts, durability, XXIV, 644 (Ohio).
- scale, notes, XV, 979.

Mulches, effect on—

- evaporation, XXI, 717 (U. S. D. A.).
- soil moisture, XXIII, 222.
- soil temperature, XV, 654.

Mulching—

- apple orchards, XVI, 777, 1138 (Me.); XVII, 253; XVIII, 1129 (Me.).
- experiments, XV, 249 (Nebr.), 257, 470 (Ill.); XVI, 548; XIX, 391 (U. S. D. A.).
- gooseberries, XVI, 1138 (Me.).
- Hitchings method, XVI, 49 (N. H.).
- orchards, XVII, 249 (N. Dak.); XVIII, 596 (U. S. D. A.).
- peach orchards, XVI, 372.
- potatoes, XVIII, 1041 (Nebr.).
- raspberries, XVII, 685 (Tenn.).
- vegetables, XVII, 34 (Me.), 35 (Me.); XVIII, 1045 (Ohio).

Mule—

- blood, clinical examination, XXIII, 784.
- breeding, treatise, XXIII, 379.
- disease in Sudan, XVIII, 477.

Mules—

- alfalfa for, XVII, 686 (U. S. D. A.).
- American, in northern Brazil, XVII, 715 (U. S. D. A.).
- Australian, for military purposes, XIV, 1000.

Mules—Continued.**breeding—**

- experiments, XXII, 267 (P. R.).
- in Argentina, XXI, 673.
- Hawaii, XXI, 483.
- Jamaica, XV, 393.
- Poitou, XIX, 71, 774.
- the South, XIX, 974 (U. S. D. A.).
- care and management, XIX, 172.
- cotton-seed meal for, XIV, 600 (Miss.), 691.
- feeding, XVI, 295; XXII, 267 (P. R.).
- feeding experiments, XV, 901 (N. C.); XVI, 499 (Fla.); XXV, 775 (N. C.), 776 (N. C.).
- feeding in South Africa, XIX, 670.
- fertility of, XX, 71.
- immunization against horse sickness, XIX, 687; XX, 680, 681, 787; XXI, 284, 484.
- in Cuba, XVI, 295.
- Panama, XXIV, 177.
- United States, XIV, 800; XXV, 893.
- infection by human trypanosomes, XXV, 286.
- losses from tetanus, XXI, 80.
- lymphangitis affecting, XXIV, 86.
- market classes and grades, XIX, 1069 (Ill.); XX, 372, 592 (U. S. D. A.).
- molasses for, XIV, 691, 1001; XVII, 492, 687.
- notes, XX, 371.
- parasitic disease in Philippines, XIV, 400.
- poisoning by alsike clover, XVIII, 185 (Tenn.).
- poisoning by oleanders, XXI, 681 (Ariz.).
- quarantine regulations in Canada, XVIII, 1080.
- raising, XVII, 1002.
- raising and use, XVIII, 765.
- rations for, XV, 288; XX, 1171.
- rough rice for, XXIII, 672 (La.).
- sweet potatoes for, XXII, 729 (Ala. Tuskegee).
- unbroken, in United States Army, XXIII, 673.
- use for farm work, XIV, 1000.
- Mullein, white, sugar from, XXIV, 608.
- Müller, A., biographical sketch, XVII, 824; XVIII, 10.

Multiceps—

- multiceps, investigations, XXIV, 87 (U. S. D. A.), 390 (U. S. D. A.).
- multiceps, parasitic in coyotes, XXV, 882.
- serialis, investigations, XXIV, 87 (U. S. D. A.).
- serialis, parasitic in squirrels, XXV, 883.
- spp., descriptions, XXIV, 88 (U. S. D. A.).
- synonymy, XVII, 1168 (U. S. D. A.).
- Municipal engineering and sanitation, treatise, XIV, 615.

- Munising area, Mich., soil survey, XVII, 740 (U. S. D. A.).
- Munroa squarrosa, analyses, XXV, 131 (Wyo.).
- Munroe crucible, preparation and solvents for, XXI, 710.
- Munson, W. M., biographical sketch, XXIII, 499.
- Murgantia histrionica. (See Harlequin cabbage bug.)
- Muriate of potash— (See also Potassium chlorid.)
analyses, XIII, 526 (Vt.), 540 (Mass.), 713 (R. I.), 730 (Conn. State), 730 (Mass.), 730 (N. J.), 1014 (Ohio); XIV, 10 (Vt.), 649 (Conn. State), 649 (Mass.), 750 (N. J.), 1058 (La.); XV, 572 (N. J.), 663 (Conn. State); XVI, 34 (Mass.), 34 (R. I.), 349 (R. I.), 658 (Conn. State), 744 (R. I.); XVII, 229 (Pa.), 846 (Conn. State), 847 (R. I.), 1041 (Vt.), 1143 (Mass.); XVIII, 1108 (R. I.).
- effect on—
color of flowers, XVI, 48 (R. I.).
composition of rye, XVIII, 633.
potato scab, XX, 344 (Mass.).
- fertilizing value, XVIII, 226 (Mass.), 227 (Mass.); XIX, 140 (Va.), 226 (Mass.), 625 (Ind.), 939 (Minn.), 1017 (N. J.); XX, 238 (Md.), 327 (Mass.), 339 (Mass.), 522 (R. I.), 538 (R. I.), 923, 931, 933, 1036 (Ga.); XXI, 23, 134 (N. Y. Cornell), 328 (Fla.), 426 (N. Y. Cornell), 443, 538 (Ala. Tuskegee), 731; XXII, 31 (Hawaii); XXIII, 35 (Fla.); XXIII, 234; XXIV, 233 (Mass.), 434 (Can.), 540 (Ohio); XXV, 442 (Ind.), 832 (Pa.).

adulteration, XX, 65.

analyses, XXV, 368.

culture in French Guinea, XXIII, 243.

exports from Gold Coast, XXII, 341.

feeding value, XX, 174.

composition charts, XXIV, 67 (U. S. D. A.).

cultivated, improvement, XVIII, 698.

culture, XVII, 142; XXI, 440.

culture—

experiments, XV, 773 (Cal.); XXII, 639 (S. C.).

in Argentina, XVII, 662.

California, XX, 839.

China, XXIV, 737 (U. S. D. A.).

Japan, XVIII, 735.

Maryland, XIX, 1145 (Md.); XX, 394 (U. S. D. A.).

Oregon, XVII, 468; XXI, 45 (Oreg.).

Texas, XX, 643; XXII, 640.

United States, XIII, 651.

description, XV, 253.

dietetic value, XXIV, 466.

digestibility, XV, 492 (U. S. D. A.).

fat and nitrogen content, XXI, 414; XXIV, 267.

food value, XIX, 258 (U. S. D. A.); XX, 464 (U. S. D. A.).

grafting and budding, XX, 598.

import duties in foreign countries, XVI, 53 (U. S. D. A.).

in Georgia, catalogue, XV, 675.

iron and phosphorus content, XX, 1161.

lime and magnesia in, XXI, 30.

malted, analyses, XIII, 577 (Me.).

marula, analyses, XVIII, 663, 1148.

Nuts—Continued.

new, descriptions, XVII, 142 (U. S. D. A.); XXI, 738 (U. S. D. A.).

nutritive and economic value, XXIII, 64.

oil-producing, industry, XVI, 148 (U. S. D. A.).

Para rubber, analyses, XXI, 668.

pine, analyses, XXII, 665.

preservation, XX, 770.

production in California, XVI, 1078.

production in Ohio, XVI, 365.

purin content, XXIII, 770.

Queensland notes, XVII, 867.

snout beetles affecting, XXIII, 261 (W. Va.).

tallow, analyses, XXI, 668.

use, XV, 495.

varieties, XVI, 260 (Mich.), 566 (U. S. D. A.); XVII, 37 (Mich.); XVIII, 37 (Mich.), 936 (Utah); XIX, 944; XX, 143 (Mich.).

varieties for—

Georgia, XIX, 648 (Ga.).

North Tyrol, XXIII, 343.

Washington, XXIV, 342.

waste, composition, XV, 43.

yebb, analyses, XIX, 170.

yebb, food value, XXIII, 767.

Nux vomica, barium chlorid for, XIX, 179.

Nyctinomus mexicanus, notes, XXIII, 356.

Nympaea tetragona, analyses, XIX, 765.

Nymphæa—

new hybrid, XIII, 859.

structure of stems, XIV, 11.

Nymphomania in cows, ovarian cysts as a cause of, XVI, 122.

N'youti, culture experiments, XIX, 834.

Nysius—

angustatus, injurious to cotton, XXIII, 462 (U. S. D. A.).

angustatus, notes, XIII, 571 (Okla.); XXI, 249.

euphorbiæ, transmission of *Leptomonas davidi* by, XXV, 53.

minutus, notes, XIII, 869 (U. S. D. A.); XIV, 672 (U. S. D. A.), 1092 (U. S. D. A.).

vinitor, fungus parasite of, XIII, 1068.

vinitor, notes, XIII, 158, 371, 471; XVIII, 152, 161.

Nyssa aquatica, studies, XVII, 150 (U. S. D. A.).

Nyssomyzomyia rossi, malarial infection of, XXV, 259.

Nyssorhynchus—

maculatus, notes, XXII, 157.

spp., notes, XXIV, 755.

Oak— (*See also* Quercus.)

and beech stands, soil physics of, XXIII, 146.

bark beetle, notes, XVI, 175 (U. S. D. A.).

boring insect, notes, XVII, 376.

buds, expansion as affected by light, XXIII, 27.

Oak—Continued.

- disease, new, XIV, 778; XVI, 988.
 disease, studies, XX, 454.
 diseases, notes, XVII, 376; XVIII, 248; XXI, 448 (U. S. D. A.); XXII, 742; XXIII, 252.
 diseases, treatment, XVI, 982.
 extract, photodynamic work of, XX, 1026.
 flea-beetle, notes, XIV, 66.

Pepsin—

and chymosin, identity, XXIII, 305.
 as affected by—
 anilin colors, XX, 110.
 boric acid, XXI, 609.
 shaking, XXII, 470.
 autodigestion, XVI, 495.
 chemical study, XIV, 177.
 determination, XVII, 530; XX, 705.
 determination of digestive action, XIV,
 681.
 differentiation from rennet, XX, 209.
 digestive power as affected by tem-
 perature, XXIII, 271.
 effect on cheese ripening, XIII, 388;
 XVIII, 673.
 filtration, XXIV, 510.
 formation as affected by different sub-
 stances, XIII, 376.
 proteolytic action, XIII, 975, 976;
 XIV, 681; XV, 798.
 solution for determining digestible pro-
 tein, XVIII, 523.
 use in cheese making, XVII, 177
 (Can.), 400; XIX, 74 (Can.).
 Pepsis, new species, description, XXI, 763.
 Peptic digestion, retarding by salts, XVI,
 289.
 Peptids, determination, XXIII, 707.
 Peptolytic substances, occurrence in the
 blood, XXV, 179.

Peptone—

as affected by lactobacillin, XXV, 609.
 decomposition in soils, XXIV, 430,
 717.
 effect on—
 ammonification in soils, XXII, 120
 (N. J.), 121 (N. J.).
 blood corpuscles, XXII, 72.
 nitrification in soils, XX, 518;
 XXIII, 622, 721.
 nitrogen in soils, XXIV, 326.
 soil bacteria, XXII, 120 (N. J.).

Peptone—Continued.

feed—

feeding value, XIII, 879.

for pigs, XV, 501; XVI, 499.

sheep, XIX, 1067.

from gelatin, chemical study, XV, 704.

occurrence in seeds, XVI, 847.

physiological effects, XVI, 1105.

silk, preparation and use, XXIV, 511.

Peptones—

analyses, XX, 661.

bacteriolysis, XVII, 300.

casein, containing phosphorus, studies, XXIII, 304.

decomposition, XVIII, 120.

nutritive value, XV, 389; XX, 719.

separation from lower amido bodies, XVII, 433, 614.

vegetable, effect on germination of seeds, XVIII, 127.

Peptonoids, analyses, XX, 661.

Peranabrus scabricollis, notes, XVI, 70 (U. S. D. A.).

Perchlorate—

of potash. (See Potassium perchlorate.)

reduction, XVI, 638.

Perchlorates—

determination, XIII, 416, 711; XIV, 117, 737; XV, 568; XVII, 7.

in fertilizers, XIII, 730.

nitrate of soda, XIII, 32.

injurious effects, XIII, 33, 235; XIV, 558; XV, 567, 764.

Percolation—

experiments, XIV, 639 (Cal.).

investigations on chalk soils, XXII, 15.

Perdix perdix, introduction into United States, XXIII, 154 (U. S. D. A.).

Perennials, herbaceous, planting chart, XVII, 667.

Perfume—

farm in Australia, XIII, 197.

industry in New Caledonia, XIII, 356.

industry in southern France, XIII, 356.

plants—

culture, XIV, 50; XXI, 536.

culture and distillation, XVII, 666.

description, XIV, 420.

paper on, XXII, 737.

Perfumes—

artificial, treatise, XXI, 307.

extraction, XIV, 50; XVI, 978.

formation in plants as affected by culture medium, XV, 555.

manufacture, XXI, 307.

source and extraction, XIX, 544.

Pergesa porcellus, development of eye spots, XVI, 793.

Periarthritis tarsal, chronic, in horses, XVI, 611.

Peribronchitis, nodular, in horses, XIV, 503.

Pericardial fluid, bactericidal power, XVI, 822.

Pericarditis, traumatic, in heifers, XX, 678 (Nev.).

Peridermium—

aciculum, studies, XVIII, 946.

cerebrum, notes, XVIII, 248.

fructigenum n. sp., description, XXIV, 550.

jaapii, notes, XIV, 262.

ornamentale n. sp., description, XIV, 159.

peckii, notes, XXV, 545 (Conn. State).

pini—

characteristics, XXIII, 152.

corticola, notes, XXV, 458.

culture experiments, XVI, 787.

densifloræ, relation to Coleosporium, XXIII, 552.

notes, XXII, 549.

spp., notes, XIX, 953, 1149; XXIII, 456; XXV, 553.

strobi—

injurious to white pine, XXIII, 456.

inoculation experiments, XIII, 469; XX, 951.

notes, XVI, 888; XXI, 748 (U. S. D. A.); XXII, 52, 151; XXIV, 343; XXV, 344 (Ohio).

studies, XXI, 644; XXIII, 344.

Peridroma saucia. (See Cutworm, variegated.)

Perilampus—

inimicus n. sp., description, XXIII, 162 (U. S. D. A.).

platygaster, notes, XX, 955 (U. S. D. A.).

Perilla ocymoides oil, study, XV, 122.

Perilloides (Perillus) bioculatus, notes, XXIV, 655 (U. S. D. A.).

Perillus claudus, control of potato beetle larvæ by, XX, 351 (Mich.).

Periodical cicada. (See Cicada, periodical.)

Periodicals—

in Library of Department of Agriculture, XIII, 1107 (U. S. D. A.).

new, XIV, 827.

Periplaneta americana. (See Cockroach, American.)

Periploca nigrescens, notes, XVII, 45.

Perisporium wrightii, notes, XX, 34 (U. S. D. A.).

Perissoterpis—

carnesi, description, XXIII, 564.

javensis, notes, XXIII, 56 (U. S. D. A.).

Peritelus ornatus, notes, XX, 762.

Peritoneum, proliferation of epithelium around foreign bodies, XV, 610.

Peritonitis—

in cattle and horses, XIX, 278.

traumatic, resembling anthrax, XIV, 923.

tubercular, in children, XIV, 915.

Perkinsiella—

- n. spp., descriptions, XXIV, 456.
 saccharicida n.sp., description, XV, 489.
 saccharicida, notes, XVI, 143 (U. S. D. A.), 277 (Hawaii); XX, 959 (U. S. D. A.); XXV, 665 (U. S. D. A.).
 vastatrix, notes, XXII, 362.
 Permanganate, reduction by chlorids in water, XVI, 537.
 Pernter, J. M., biographical sketch, XX, 600.

Peromyscus—

- michiganensis, injurious to corn, XXII, 751 (Ky.).
 revision, XXI, 151 (U. S. D. A.).
 spp., destruction, XX, 551 (U. S. D. A.).

Peronea—

- hypericana n. sp., description, XXIII, 761.
 minuta—
 characteristics, XXI, 56.
 notes, XXIII, 59 (Wis.); XXIV, 557.
 remedies, XXI, 157 (Mass.).
 studies and bibliography, XXI, 157 (Iowa).

Peronoplasmopara cubensis, notes, XVII, 156 (Conn. State).

Peronospora—

- cubensis atra n. var., description, XIV, 455.
 cubensis, notes, XVI, 851.
 effect on leaf respiration, XVIII, 347.
 effect on wine, XX, 1163.
 effusa, notes, XXV, 846 (Va.).
 grape hybrids resistant to, XXIV, 452.
 infestans, notes, XIV, 1085.
 jaaplana n. sp., description, XXIV, 47.
 maydis, notes, XIX, 153.
 notes, XXIII, 651.
 ononidis n. sp., description, XXIII, 545.
 parasitica, notes, XIII, 464, 757 (N. J.); XIV, 532; XVII, 153 (Conn. State), 374; XXI, 51.
 parasitica, treatment, XXIII, 446 (Fla.).
 phoenixæ, notes, XV, 593.
 polygoni, notes, XV, 486.
 schachtii, notes, XXI, 642; XXIII, 348.
 schleideniana, description, XVI, 170 (N. Y. Cornell).
 schleideniana, notes, XVII, 1162; XIX, 954 (Can.); XXIV, 247 (Mass.).
 sparsa, description and treatment, XXIII, 654.
 sparsa, notes, XVIII, 645.
 spp., notes, XX, 453; XXI, 626.
 treatment, XV, 781; XVI, 678; XX, 757; XXI, 54.

Peronospora—Continued.

- trifoliorum, notes, XX, 846 (N. Y. State); XXIII, 740.
 viticola— (See also Grape downy mildew.)
 description, XXIII, 353.
 notes, XIII, 365, 661.
 relation to weather, XIV, 61; XIX, 1048.
 treatment, XVIII, 845; XXIII, 651; XXV, 751.

Peronosporaceæ—

- host plants, XIX, 1048.
 monograph, XIII, 258.
 Peronosporales, studies, XXI, 626.

Peroxidase—

- detection in milk, XXV, 807.
 guaiac test for, XXV, 13.
 in seeds, XIX, 931; XX, 130; XXII, 133.
 new method of isolating, XXIV, 122.
 purification, XXIII, 9.
 reaction in milk, XXIII, 309.
 reaction, studies, XXI, 707.
 relation to catalase, XXV, 609.
 rôle of in germination of seeds, XXII, 720.
 soluble, in mammary glands, XXIII, 285.

Peroxids—

- destruction of toxins by, XIV, 1015.
 organic, effect on bacteria, XIV, 334.
 Perrisia (Cecidomyia) pyri, notes, XXV, 157.

Perry—

- as affected by condition of pears, XXIII, 211.
 County, Ala., soil survey, XV, 658 (U. S. D. A.).
 examination, XIX, 411.
 fermentation, factors affecting, XX, 1182.
 making, sulphurous acid in, XVIII, 374.
 making, treatise, XV, 365.
 prevention of turbidity in, XXIII, 211.
 standardization, XX, 310.
 studies, XXI, 361.

Persea—

- gratissima, etiolated seedlings, XIV, 528.
 transpiration, XX, 829.

Persillés goat cheese, manufacture, XXI, 578.

Persimmon disease, notes, XV, 591 (N. C.).

Persimmons—

- analyses, XXV, 744 (U. S. D. A.).
 Chinese, notes, XVII, 368.
 culture, XV, 967.
 culture experiments, XV, 773 (Cal.); XXV, 741 (P. R.).
 culture in Texas, XXII, 640.
 distribution in United States, XVII, 1162.

Persimmons—Continued.

- fermentation experiments, XIX, 634 (Fla.).
- improvement, XVIII, 444.
- Japanese—
 - culture, XV, 148 (Cal.); XVI, 467 (Fla.); XX, 39 (P. R.).
 - culture and use, XIX, 843 (La.).
 - curing, XIX, 743.
 - juice from unripe fruit, XIV, 11.
 - notes, XIII, 135 (Ala. College).
 - post-ripening of, XXV, 202.
- new, descriptions, XIX, 236 (U. S. D. A.); XX, 239 (U. S. D. A.); XXI, 738 (U. S. D. A.); XXV, 540 (U. S. D. A.).
- notes, XXIV, 147 (P. R.).
- premature falling, XXV, 436 (Fla.).
- processing experiments, XXV, 744 (U. S. D. A.).
- ripening, XV, 1079; XVII, 612; XVIII, 443, 626; XXV, 28.
- ripening, Japanese method, XVII, 618.
- seedless, studies, XXII, 340.
- sprouting, XV, 968.
- tannin in, XVIII, 626.
- varieties, XV, 968; XVI, 972 (Cal.); XXI, 544 (Tex.).

Persola tomentosum, notes, XX, 949.

Persons, aged, food consumption, XXII, 561 (U. S. D. A.).

Perspiration—

- composition, XIII, 580.
- human, studies, XV, 991.
- observations on, XIV, 788.

Persulphates, detection, XXI, 11.

Peruvian guano, solubility of nitrogen in, XXIV, 322 (Conn. State).

Pestalozzia—

- aloea, notes, XXIII, 353.
- celestri, notes, XIII, 224.
- clusiae n. sp., description, XXIII, 153.
- funerea, description, XVII, 1165 (Mo.).
- guepini, description, XIV, 265.
- guepini, notes, XIII, 961; XVI, 380; XVII, 374, 776, 1084; XVIII, 945; XX, 848; XXIV, 353.

hartigii—

- betulae n. var., description, XVIII, 651.
- life history, XXII, 52.
- notes, XIII, 1061.

palmarum, notes, XIV, 671 (U. S. D. A.); XVII, 1084; XIX, 50, 957; XX, 454; XXI, 150, 245; XXIV, 647.

palmarum, treatment, XVIII, 846.

spp., notes, XVIII, 1057; XIX, 350, 1051 (U. S. D. A.); XXV, 553, 847.

uvicola, studies, XX, 451 (Nebr.).

Pestis gallinarum, notes, XXV, 889.

Petals, movements, XVII, 453.

Petalura gigantea, studies, XXII, 356.

Petechial fever—

- in cattle, XV, 86.
- horses, XV, 727; XVI, 97; XVII, 915.

Petechial fever—Continued.

- notes, XIX, 278.
 - treatment, XIV, 493, 705; XVI, 1028.
 - variations of corpuscles in, XX, 87.
- Petermann, A., biographical sketch, XIV, 103.
- Petri dish rack, description, XX, 979 (Mich.).
- Petrochelidon lunifrons, destructive to hop flea beetles, XXV, 150.
- Petræca phænicea* notes, XIV, 1052.
- Petrol for agricultural motors, XVII, 599.
- Petrolatum liquidum, use in Babcock test; XXIV, 79 (Ind.).

Petroleum—

- analyses, XV, 852 (Ky.); XVIII, 913 (Ky.); XXI, 308 (Ky.).
- as a cattle dip, XVII, 499.
- aversion of rats to, XXIII, 154.
- crude—
 - analyses, XIII, 1014 (Ohio); XV, 1054 (Ky.); XVII, 1041 (Ky.).
 - as a disinfectant, XVII, 403.
 - remedy for San José scale, XIII, 69.
 - substitute for kerosene, XV, 60.
 - an insecticide, XIII, 517, 869 (U. S. D. A.); XIV, 464, 469 (Fla.), 586 (N. J.), 989.
 - effect on fruit trees, XIII, 665 (U. S. D. A.).
 - effect on nursery stock, XVIII, 1044 (Del.).
 - for spraying, XVII, 38 (Mich.).
 - preparation of emulsions, XVII, 1094 (U. S. D. A.).
 - spraying experiments, XIII, 65, 69 (Idaho).
 - tests, XVIII, 91 (N. Mex.); XIX, 52 (Can.).
 - use, XIII, 370 (N. Y. State).
- distillate, spraying experiments, XV, 695 (Cal.); XVI, 71 (U. S. D. A.).
- effect on foliage, XIV, 370 (Oreg.).
- emulsion, digestibility, XIV, 594.
- emulsion, preparation and use, XVIII, 162 (Del.); XXII, 549; XXIII, 157 (U. S. D. A.).
- for treating seed corn, XXI, 246 (Kans.).
- insecticidal value, XXIV, 262 (U. S. D. A.).
- methods of analysis, XXI, 521.
- oils, analyses, XXI, 341 (Can.).
- oils, preparation and use, XVIII, 455 (U. S. D. A.).
- use as a wood preservative, XXV, 649 (U. S. D. A.).
- use on roads, XIV, 615.

Petrology of North Carolina, bibliography, XXIII, 520.

Petrophora ferrugata, immature stages, XX, 656.

Petroselinum sativum, sowing experiments, XXIV, 731.

- Pe-tsal—
culture, XVI, 367; XVII, 367.
notes, XVIII, 837 (N. J.); XIX, 1040 (N. J.).
- Petstemoin lævigatus in Vermont, XXII, 638 (Vt.).
- Petunias—
breeding experiments, XIX, 1041 (N. J.); XXII, 140 (N. J.).
fertilizer experiments, XXV, 237.
inheritance of color in, XXV, 542.
inheritance of double flowers in, XXIV, 633.
notes, XIV, 574.
- Petwun, nature and use, XXII, 644.
- Pezicula cinnamomea—
description, XIV, 778.
on oaks, XIV, 462.
- Peziza willkommii—
notes, XIV, 266; XIX, 754; XXII, 548, 549.
relation to source of seed, XXIII, 652.
- Phaeopholis pallida n. sp., description, XXIV, 62.
- Phacidium falconeri, notes, XVI, 989.
- Phædon—
æruginosa. (See Water-cress leaf beetle.)
armoraciæ, notes, XXV, 461.
betulæ, notes, XV, 56; XIX, 352.
cochleariæ, notes, XXI, 653.
- Phænocephalidæ, catalogue, XXV, 158.
- Phænus imperata, notes, XIII, 770.
- Phæophytin, studies, XXI, 227.
- Phæoseptoria oryzae n. sp., description, XXIII, 347.
- Phæosphæria oryzae n. g. and n. sp., description, XXIII, 347.
- Phagocytes—
bactericidal action, XIX, 1080.
biology, XXIII, 682.
structure and function, XIV, 1016.
- Phagocytosis—
as affected by quinin and morphin, XXV, 881.
causes of, XIX, 882.
during fatal infections, XIII, 90.
effect on colostral milk, XXIV, 77.
in fowl cholera in rabbits, XIV, 505.
serum, XIX, 475.
influence of bacterial endotoxins on, XXIII, 785.
studies, XXV, 180.
- Phalacrus corruscus, destruction of cereal smuts by, XX, 554.
- Phalænæ in British Museum, catalogue, XXI, 760.
- Phalaris— (See also Canary grass.)
bulbosa, notes, XXIV, 731.
commutata—
analyses, XXIII, 771; XXIV, 769.
composition, XXI, 72.
notes, XXIV, 234, 335.
- Phanerogams—
absorption of amids by, XXIII, 725.
asexual reproduction in, XIV, 841.
oxydases in, XIII, 115.
- Phanerotoma, new species, notes, XXI, 651 (U. S. D. A.).
- Phaonia personata, notes, XXI, 764.
- Pharaxonotha—
kirschii, studies and bibliography, XXV, 50 (U. S. D. A.).
sp., notes, XXIV, 341.
- Pharcidia oryzae n. sp., description, XXIII, 347.
- Pharmaceutical products—
adulteration, congress, XIX, 798; XX, 400.
examination, XX, 512 (N. Dak.).
- Pharmacology—
and therapeutics, textbook, XXIV, 81.
bibliography, XX, 1168; XXIII, 770.
- Pharmacopœia—
United States, digest of comments, XXIV, 81.
veterinary, XV, 113, 194.
- Pharyngitis—
infectious, in horses, XIV, 300; XVII, 505.
notes, XXI, 183.
- Phaseolunatin in—
beans, XV, 556.
plants, XVIII, 330; XIX, 129.
- Phaseolus—
aconiti folius, culture, XIV, 561.
helvolus, analyses, XIII, 1036.
lunatus—
hydrocyanic acid in, XVII, 347; XVIII, 544, 626, 663, 729; XX, 128, 528, 928, 1161; XXIII, 29.
poisoning of animals by, XVII, 1012; XVIII, 183.
toxic properties, XIX, 1061.
- multiflorus—
effect of injury to cotyledons, XXIII, 723.
pollen, germination, XXII, 527 (Wis.).
transformations of albuminous substances, XIII, 20.
- mungo—
as a green manure, XVIII, 338; XXIII, 642.
culture, XIV, 561.
notes, XIII, 442 (Kans.).
- semierectus, analyses, XIII, 1036.
- spp., analyses, XXV, 272.
- spp., economic value, XXI, 732 (U. S. D. A.).
- spp., hydrocyanic acid in, XVIII, 126.
- spp., notes, XV, 674.
- spp., varieties in America, XXI, 43 (N. Y. Cornell).
- vulgaris—
absorption of amids by, XXIII, 725.
as affected by formaldehyde, XXV, 434.
composition at various stages, XXII, 229.
hemicelluloses in seed coats of, XXIII, 704.
history, XXII, 449.

Phaseolus—Continued.

vulgaris—continued.

hybridization, XIV, 249 (Nebr.).

inheritance of color in, XXII, 40 (Nebr.); XXV, 537.

manus, potash requirements, XVIII, 137.

poisoning of animals by, XVII, 1012.

seedlings as affected by deficiency of lime, XXIII, 329.

Phasgonophora sulcata, notes, XVII, 786 (N. Y. Cornell).

Phasianidæ, sex of hybrids in, XXI, 270.

Phasianus torquatus in Massachusetts, XXI, 450.

Phasmidæ—

in United States, XV, 383.

studies, XVI, 682.

Phasmophaga, new species, description, XXII, 464.

Pheasant—

canned, examination, XX, 771.

cecum nodule parasites, studies, XXII, 790.

diseases, notes, XXIII, 178 (U. S. D. A.).

eggs, incubation experiments, XXIV, 180.

hybrid, description, XXIV, 577.

Pheasants—

breeding experiments, XXIV, 54; XXV, 870.

breeds, description, XX, 571.

eye disease, XVI, 104.

feeding habits, XX, 456.

in Massachusetts, XXI, 450.

Russia, studies, XXIII, 675.

raising, XV, 807; XXIII, 178 (U. S. D. A.).

raising and hunting, XXIII, 178.

raising in Oregon, XX, 76.

sex of hybrids in, XXI, 270.

temperature in, studies, XXII, 790.

Pheidole—

dentata commutata, notes, XXII, 655 (S. C.).

megacephala, notes, XXII, 156 (Hawaii).

spp., notes, XXIII, 558 (U. S. D. A.).

Phelipæa—

muteli, notes, XVII, 878.

ramosa, description, XXII, 348.

spp., notes, XVII, 566.

Phellomyces sclerotiphorus, notes, XIV, 1085; XIX, 46, 851; XX, 1043.

Phenacaspis eugeniae, notes, XXV, 358 (Hawaii).

Phenacetin—

harmfulness, XXI, 563 (U. S. D. A.); XXII, 166 (U. S. D. A.).

investigations, XV, 853 (U. S. D. A.).

Phenacoccus—

acericola, notes, XVII, 619; XX, 760, 1145; XXIV, 454.

Phenacoccus—Continued.

cholodkovski n. sp., description, XXI, 649.

dearnessi, notes, XVII, 266 (Mont.).

ramonæ n. sp., description, XXI, 757.

Phenazeturic acid in the animal body, XXI, 664.

Phenetol-carbamid, detection in foods and beverages, XIII, 107.

Phengodes—

laticollis, notes, XV, 975 (Conn. State).

plumosa, notes, XXIV, 454.

Phenol—

antiseptic value, XVI, 915.

compounds, effect on wheat seedlings, XIX, 1129.

disinfecting value, XXV, 281, 491.

effect on—

bacteria, XXI, 321.

mitosis, XXIII, 628.

plants and micro-organisms, XXV, 434.

soils, XX, 218.

wheat, XVIII, 625.

yield of crops, XX, 718.

fungicidal value, XXIII, 649.

role of in cork formation, XVIII, 826.

standardization, XXI, 84.

toxicity as affected by temperature, XX, 737.

use in soil analyses, XXIII, 705.

Phenolic disinfectant, analyses, XVII, 425.

Phenolin, value, XVI, 718.

Phenological—

data, recording, XVII, 1127.

observations—

at Wauseon, Ohio, XVI, 1057.

in Canada, XIII, 23, 112.

United Kingdom, XIX, 312, 917.

Phenology—

relation to horticulture, XIX, 539.

studies, XVIII, 311 (U. S. D. A.); XXIII, 516.

Phenolphthalein—

absorption by milk, XX, 975; XXIV, 581.

alkali salts of, XIX, 407.

as a hydrocyanic-acid reagent, XXII, 304.

Phenomenal berries, culture and marketing, XXI, 637 (Oreg.).

Phigalia atrigataria, remedies, XIV, 268 (Mich.).

Philadelphus—

coronarius, cut, preservation, XVIII, 44.

spp., culture, XVII, 141 (Can.).

varieties, XXIV, 441 (Can.).

Philænus spumarius (=Aphrophora spumaria), notes, XXV, 257.

Philampelus achemon, notes, XIII, 156 (Colo.); XIX, 759 (Cal.).

Philanthus diadema, notes, XX, 657.

- Philippia**—
oleæ, notes, XIX, 160; XXII, 60.
spp., notes, XV, 275.
- Philippine**—
Board of Agriculture, new appointments, XXIII, 299.
Bureau of Agriculture—
notes, XIII, 304.
report, XXI, 496.

apicola, studies, XXII, 746.
betæ—
as a cause of heart rot, XXIII, 648.
fixation of nitrogen by, XVIII, 1027.
injurious to sugar beets, XXIV, 248.
notes, XV, 51; XVIII, 344, 647, 746, 844; XIX, 151, 347, 1049; XXI, 147, 446; XXII, 149; XXIII, 348.
studies, XVI, 886; XXII, 347; XXV, 845.
treatment, XXIII, 248.
beticola, notes, XIII, 147.
bohémica n. sp., description, XXIII, 751.
brassicæ, notes, XVI, 381.
bulbicola, notes, XIII, 224.
chrysanthemi, notes, XIV, 777.
mali, parasitism, XXIII, 454.
mali, studies, XXII, 547 (Me.).
myxæ, n. sp., description, XIII, 365.
napo-brassicæ, notes, XVI, 62; XVII, 1162; XXI, 744.
oleandrina n. sp., notes, XVIII, 342.
- oleracea**—
description, XVIII, 845.
notes, XVII, 1164; XX, 649; XXV, 653 (Ohio).
studies, XXIV, 348.
radicis n. sp., descriptions, XIX, 425.

Phoma—Continued.

- reniformis, notes, XVI, 678.
- roumii n. sp., notes, XXI, 342.
- solani, notes, XX, 346.
- spp. as affected by tannin, XXIII, 330; XXV, 524.
- spp., notes, XV, 782; XIX, 856; XX, 546; XXIII, 147, 646 (Ariz.).
- subclircinata, notes, XIII, 466 (N. J.); XVIII, 48 (Conn. State).
- tabifica, notes, XVIII, 647, 844; XXI, 642; XXIII, 546.
- tiliæ n. sp., notes, XIII, 1061.

Phomopsis alcapercrassæ, notes, XXIII, 355.

Phonolite—

- fertilizing value, XXII, 25, 324, 325, 432, 718; XXIII, 24, 324, 325, 626, 719; XXIV, 24, 134, 323, 425, 427; XXV, 24, 217, 322, 428, 629, 727.
- in Central Africa, XVI, 241.
- meal, fertilizing value, XXIII, 525.
- methods of analysis, XXII, 25.
- relation to plant diseases, XXIII, 324.

Phonolith—

- fertilizing value, XX, 1118; XXI, 223.
- waste, utilization, XVIII, 540.

Phora—

- new species, descriptions, XXII, 361.
- ruficornis, viviparity in, XXIII, 365.

Phoracantha—

- recurva, notes, XIX, 557.
- spp., notes, XV, 382.

Phoradendron flavescens—

- anatomy and biology, XXI, 534.
- leaf blight, notes, XXIV, 159.

Phorbia—

- brassicæ. (See Cabbage root maggot).
- ceparum. (See Onion maggot.)
- ceporum. (See Onion maggot.)
- fusciceps, notes, XIV, 165 (U. S. D. A.); XXI, 349 (Fla.); XXV, 555 (Me.).
- lupini, notes, XIV, 267 (Cal.).
- rubivora, notes, XVI, 577 (Wash.).

Phoridæ, studies, XXIII, 664.

Phormia regina—

- notes, XXV, 555 (Me.).
- parasitism, XXIII, 162.

Phormium—

- insects affecting, XXIV, 56.
- tenax, food plant of mealy bug, XXIII, 660 (La.).

Phorocera—

- leucania, notes, XXI, 251 (Ky.).
- serriiventris, viviparity in, XXIII, 365.

Phorodon humuli. (See Hop aphids.)

Phosphate—

- agricultural, fertilizing value, XVI, 556, 1064; XVII, 17; XX, 21, 222; XXII, 524.
- analysis, mechanical agitator for, XXIII, 302; XXIV, 120.
- deposits—

American, conservation, XXII, 433.
at Mount Holly Springs, XIX, 20 (Pa.).

Phosphate—Continued.

deposits—continued.

 tæda, differentiation from *P. palustris*, XXII, 344.
 tæda, studies, XXIV, 42 (U. S. D. A.).
 virginiana, studies, XXV, 647 (U. S. D. A.).

Pionea—

- rimosalis, notes, XIV, 165 (U. S. D. A.).
 straminalis, notes, XVII, 160 (Can.).

Pionnotes—

- betæ, notes, XVIII, 343.
 rhizophila, notes, XVIII, 343.

Piophilæ casei. (See Cheese skippers.)

Pipe-making machinery, description, XXI, 292.

Piper nigrum, culture, XIV, 658.

Pipes—

- manufacture from gourds, XXII, 238 (U. S. D. A.).
 steel-concrete, XVII, 709.

Pipette—

- for milk test, description, XIV, 942.
 sampling milk, XVI, 91 (Wis.).
 new automatic, XVII, 114.

Pipiza radicum, notes, XVI, 682.

Pipunculidæ, notes, XVII, 477 (Hawaii).

Pipunculus vitiensis n. sp., description, XVIII, 652 (Hawaii).

Piricularia—

- caudata n. sp., description, XVI, 888.
 grisea, description, XIV, 877.
 grisea, notes, XVIII, 947; XX, 946 (Del.); XXI, 743 (Iowa).
 oryzae, notes, XIV, 877; XVIII, 947, 1056; XX, 53 (La.).
 spp., notes, XIX, 956.

Piroplasma—

bigeminum—

- bacterial form, XV, 303.
 bibliography, XXIII, 667.
 biology, XVIII, 478.
 chromatin masses, XIX, 282.
 development, XIX, 479.
 notes, XIX, 184, 579; XXIV, 484; XXV, 484.
 parasite resembling, XVI, 101.
 studies, XXI, 785; XXIII, 667.
 transmission by ticks, XXV, 586.
 treatment, XXII, 583.

bovis—

- description, XXIII, 484.
 mode of multiplication, XXIII, 155.
 notes, XXII, 83.

Piroplasma—Continued.

canis—

- as affected by drugs, XXI, 488.
 bibliography, XX, 88; XXIV, 481.
 culture experiments, XXIV, 481.
 degenerative appearances in, XXIII, 786.
 development, XX, 1190.
 distribution in dogs, XXIII, 589.
 infection experiments, XXI, 785.
 life history, XVIII, 880; XX, 88.
 morphology and biology, XVIII, 780.
 morphology and life history, XX, 1190.
 notes, XVI, 72; XIX, 481; XXI, 83, 586, 785; XXII, 83.
 studies, XIX, 283, 377.

commune, studies, XXII, 582.

equi—

- cultivation, XXIII, 155.
 notes, XV, 926; XVI, 1135; XVII, 89; XIX, 187; XX, 1086.
 studies, XIII, 694.

gibsoni (tropicus), identity, XXV, 183.

hudsonius bovis, notes, XXI, 580.

mutans, notes, XIX, 184; XX, 680; XXI, 483, 580; XXII, 488; XXV, 782.

n. spp., descriptions, XXIII, 792.

ninense n. sp., description, XXIII, 287.

ovis, notes, XV, 1120.

parvum—

- as affected by cold, XXI, 763.
 culture experiments, XIX, 283.
 development, XXV, 285.

rossi n. sp., description, XXIV, 161.

sp., culture experiments, XIX, 282.

spp., development, XXIV, 83.

spp., morphology and biology, XVIII, 877.

spp., notes, XX, 787, 879, 1190; XXI, 683; XXV, 282.

spp., occurrence in South Africa, XXIV, 83.

spp., rôle of in cattle diseases, XXIV, 481.

Piroplasmoses—

- notes, XVII, 1118.
 prevalence in Dutch East Indies, XVIII, 582.
 transmission, XV, 818, 819.

Piroplasmosis—

and anthrax, differentiation, XXV, 784.

bacillary, diagnosis, XXIII, 484.

bacilliform, in cattle, XVII, 1015; XX, 284.

bovine—

- immunization, XXV, 484.
 in Hungary, XXV, 88.
 Queensland, XXIV, 484.
 southern Rhodesia, XXV, 484.
 notes, XV, 1014; XVIII, 582; XIX, 579; XX, 879, 1191; XXI, 683; XXIV, 386; XXV, 781.

Piroplasmosis—Continued.

bovine—continued.

crown gall affecting, XXIV, 249 (U. S. D. A.).

culture, XV, 148 (Cal.).

culture in—

California, XIII, 248.

France, XV, 1079.

Oregon, XVII, 463; XX, 336 (Oreg.).

Steiermark, XVI, 565.

western Europe, XIII, 854 (U. S. D. A.).

depreciation in, studies, XXIII, 630.

dried, analyses, XVI, 949 (Cal.); XVIII, 662.

endotrophic mycorrhiza in, XXIII, 528.

exportation, XVI, 264 (U. S. D. A.).

fertilizer experiments, XIX, 39 (Oreg.).

Prunes—Continued.

foliage as affected by insecticides, XIV, 370.

insects affecting, XXV, 40 (Oreg.).

new varieties, description, XVI, 157 (U. S. D. A.).

packing in cans, XIX, 967 (Cal.).

pear thrips affecting, XXIV, 455 (U. S. D. A.).

physiological investigations, XXIV, 40.

pollination as affected by soil and season, XVII, 42 (Oreg.).

propagation, XIV, 253.

protection from frost, XIII, 248.

pruning, XVII, 42 (Oreg.).

spraying with Paris green, XVI, 797 (Oreg.).

stoneless, notes, XIII, 647.

stoneless, origin, XVII, 250.

sugar, notes, XIV, 440.

sugar, origin, XVII, 250.

sulphuring, XVIII, 40.

termites affecting, XXIV, 163.

varieties, XVI, 972 (Cal.); XVIII, 143; XIX, 38 (Oreg.).

varieties for Pacific slope, XVIII, 637; XIX, 946.

Pruning—

directions for, XVII, 253.

effect on growth of apple trees, XIV, 573.

notes, XVIII, 194 (Kans.); XIX, 146.

physiology of, XXII, 732.

principles of, XVII, 558 (Mass.).

tools, descriptions, XVII, 253.

treatise, XXV, 643.

Prunus— (*See also* Cherries and Plums.

americana, development, XVI, 540.

amygdalus, analyses, XIX, 765.

amygdalus, forcing branches, XIV, 663.

besseyi—

culture and crossing, XVI, 369 (S. Dak.).

notes, XIII, 454.

possibilities of, XVI, 159.

value in plant breeding, XVIII, 637.

demissa, value in plant breeding, XVIII, 637.

geniculata n. sp., description, XXIV, 642.

gummosis, studies and bibliography, XXIV, 746.

hydrocyanic acid in buds, XV, 340.

insititia, composition at various stages, XXII, 131.

javanica, rôle of hydrocyanic acid in, XXIII, 330.

mahaleb, disease affecting, XXIV, 350.

pumila, possibilities of, XVI, 159.

serotina, notes, XVIII, 1133 (U. S. D. A.).

simoni, breeding experiments, XVI, 730.

Prunus—Continued.

Pumpkin—

- beetle, banded, notes, XXI, 559.
- catsup, analyses, XVIII, 960.
- oil, analyses, XVI, 741.
- seeds—
 - analyses, XXV, 272.
 - chemistry of, XXII, 766.
 - lime and magnesia in, XXI, 30.

Pumpkins—

- analyses, XVII, 41 (N. Y. State).
- and barley for horses, XIII, 584.
- as affected by carbon bisulphid, XX, 518.

Pumpkins—Continued.

- as affected by tobacco smoke, XXV, 225.
- canning in the home, XXI, 278 (U. S. D. A.).
- crossing experiments, XIV, 217.
- culture, XXIV, 235.
- culture in Michigan, XX, 144 (Mich.).
- Dacus spp., affecting, XXIV, 55.
- digestibility, XVIII, 69.
- effect on milk, XXV, 479.
- fertilizer experiments, XV, 672 (R. I.); XX, 516.
- for cows, XV, 1109 (Vt.).
- pigs, XIII, 274 (Can.); XIX, 569 (U. S. D. A.); XXI, 570.
- formation of starch in, XXI, 727.
- irrigation experiments, XIV, 195 (Ariz.); XXIII, 394 (U. S. D. A.).
- self-fertility in, XXI, 29.
- transmission of sugars by, XXI, 333 (Iowa).
- varieties, XIII, 346 (S. Dak.), 452 (Mich.); XIV, 144 (Can.), 650 (La.), 1063 (N. H.); XVI, 261 (Mich.); XVII, 1155 (N. H.).

Pumps—

- at Newcastle exhibition, XXI, 490.
- centrifugal, tests, XVIII, 589.
- compound centrifugal, XVII, 507.
- construction and operation, XXIII, 395 (U. S. D. A.).
- for irrigation, installation, XX, 885.
- hand, limit of use, XIV, 927.
- installation, XXIII, 190.
- notes, XV, 622.
- tests, XVI, 930 (U. S. D. A.); XVII, 705 (U. S. D. A.).
- treatise, XVII, 815.
- turbine, notes, XVIII, 189.

Punches, notes, XXV, 568 (Iowa).**Punica granatum**—

- culture in Crimea, XIV, 442.
- host of orange thrips, XXV, 657 (U. S. D. A.).

Punkies, notes, XVIII, 952 (U. S. D. A.).**Pupipara**, studies, XXIII, 665.**Purdue University**—

- agriculture at, XVII, 411 (Ind.).
- new agricultural building, XIII, 612.
- notes, XIII, 294, 397, 1004; XIV, 197; XV, 1137; XVI, 833, 1139; XVII, 513; XVIII, 395; XIX, 292, 493, 593; XX, 96, 196, 294, 593, 894; XXI, 595, 693; XXII, 596; XXIII, 597; XXIV, 93, 296, 597; XXV, 795.

Purdy, Carl, biographical sketch, XIII, 860.**Purin**—

- bases in caviar, XXI, 660.
- bases, occurrence in soils, XXIV, 524.
- bodies—
 - in foods, XVII, 483.
 - urine of live stock, XVIII, 572.
- investigations, XVIII, 660.
- compounds, metabolism, XXIV, 368.

Purin—Continued.

determination in foods, XXIII, 306, 769; XXIV, 266.

determination in urine, XXII, 310.

excretion as affected by—

• chocolate and coffee, XXI, 770.

muscular work, XX, 1167.

for treating irrigation water, XXIII, 440.

free diet, therapeutic effect, XX, 67.

investigations, treatise, XX, 67.

metabolism, XVIII, 964; XX, 265, 1164; XXII, 267.

metabolism, physiology of, XXI, 67.

occurrence in lower fungi, XXV, 567.

Purple scale—

injurious to citrus fruits, XXIII, 53.

notes, XIII, 266 (U. S. D. A.), 767;

XXI, 752, 757; XXII, 160, 252

(P. R.); XXIII, 362; XXIV, 355;

XXV, 358 (Hawaii).

parasitism, XXII, 744; XXIII, 564.

remedies, XX, 555 (U. S. D. A.);

XXI, 354 (U. S. D. A.), 356 (U. S. D. A.).

Purpositive matter, living, treatise, XXIV, 574.

Purpura hemorrhagica, treatment, XV, 412, 928; XXV, 380.

Purslane—

composition and use, XIII, 378 (Mass.).

destruction, XXV, 37 (Hawaii).

effect on soil temperature and moisture, XVI, 444.

host of orange thrips, XXV, 657 (U. S. D. A.).

Pus—

cells. (See Leucocytes.)

germs, destruction, XX, 986 (Wis.).

Pusa Research Institution, XXIII, 246.

Putnam—

County, Mo., soil survey, XXI, 618 (U. S. D. A.).

scale, notes, XIII, 156 (Colo.), 767;

XIV, 169 (U. S. D. A.), 466; XVI,

1100; XVII, 478; XXI, 60 (Mo.

Fruit); XXV, 556 (Colo.).

scale, studies, XIII, 767.

Putoniella marsupialis, notes, XXV, 157.

Putorius arizonensis, protection, XX, 551 (U. S. D. A.).

Putrefaction—

modification of racemic glutaminic acid in, XXII, 114.

products, bactericidal to anthrax bacillus, XXV, 85.

Putrescin in cheese, XIV, 805 (N. Y. State).

Pwé-nyet, notes, XXI, 658.

Pyaung, culture and parasitism, XXIV, 246.

Pyelonephritis—

bacillary, pathological anatomy in, XXIII, 389.

in cattle, etiology, XIV, 1022.

hogs, XVII, 88.

Pyemia, chronic, in pigs, studies, XVI, 513.

Pygæra bucephala, notes, XIV, 463.

Pyknometer, description, XVIII, 862.

Pylorus, ferment in mucous membrane of, XIV, 791.

Pyobacillosis in various animals, notes, XXIV, 388.

Pyocyanase—

bactericidal action of, XXV, 283.

effect on experimental anthrax, XIV, 504.

for immunization against anthrax, XIV, 814.

treatment of blackleg, XXIV, 389.

treatment of streptococcus infection, XV, 403.

tests, XXV, 585 (Del.).

trypanocidal and spirocheticidal action, XXIII, 483.

Pyocyaneus bacilli, virulency tests, XXIV, 83.

Pyogenes aureus, dissemination by fruits, XXII, 369.

Pyralidæ, notes, XVI, 275.

Pyralis—

costalis, notes, XX, 351 (Mich.).

farinalis, notes, XX, 257 (U. S. D. A.); XXI, 558 (N. C.).

Pyrameis cardui, notes, XIV, 166.

Pyramid caterpillar, notes, XX, 1049 (Conn. State).

Pyrausta—

machæralis, notes, XXI, 159.

nelumbialis, parasitism, XXIII, 367.

ochosalis, notes, XV, 168.

rantalis, remedies, XVI, 387 (Okla.).

vastatrix, notes, XXV, 357.

Pyrenochaeta phloxidis n. sp., notes, XIX, 446.

Pyrethrum—

analyses, XIV, 472 (U. S. D. A.).

culture and use, XV, 790.

gall of, XIX, 99.

notes, XIII, 575.

powder—

investigations, XV, 279 (U. S. D. A.).

notes, XVI, 176; XXV, 764 (U. S. D. A.).

preparation and use, XIX, 455.

value as an insecticide, XVI, 891.

Pyrethrophorus costalis, notes, XXI, 652, 792.

Pyreheliometer observations, XIX, 1113

(U. S. D. A.); XX, 811 (U. S. D. A.);

XXI, 525 (U. S. D. A.); XXIII, 311

(U. S. D. A.).

Pyridin—

bases, assimilation by plants, XVII, 348.

bases, methods of analysis, XXIV, 410.

compounds, effect on wheat seedlings, XIX, 1129.

effect on germination of corn, XXI, 153 (N. Y. Cornell).

picrate, effect on hides, XXIV, 789.

- Pyrimidin—
 derivatives, occurrence in soils, XXIV, 524.
 group, physiological action, XV, 289.
- Pyrites—
 effect on soil fertility, XXIII, 623.
 production in United States, XX, 826.
 roasted, effect on barnyard manure, XVII, 951.
- Pyritic earth, fertilizing value, XXIV, 427.
- Pyro, Joseph, biographical sketch, XVII, 824.
- Pyrocatechin—
 effect on fermentation, XXI, 165.
 effect on plant cells, XXI, 424.
 relation to guaiacum reaction, XXV, 634.
- Pyrogallie acid, effect on—
 plant respiration, XXIII, 629.
 soil acidity, XXIII, 320.
- Pyrogallol—
 effect on—
 rust formation, XXI, 207 (U. S. D. A.).
 soils, XIX, 14 (U. S. D. A.); XXIII, 623; XXIV, 523.
 transpiration of plants, XXII, 721.
 oxidation by hydrogen peroxid, XXIV, 511.
- Pyrol, woolly, analyses, XIII, 1036.
- Pyronema—
 culture experiments, XXII, 452.
 growth, investigations, XXIII, 629.
- Pyrophila pyramidoides, notes, XX, 1049 (Conn. State).
- Pyrophosphates, fertilizing value, XXV, 631.
- Pyrophosphoric acid—
 compounds, XVII, 1037.
 transformation into orthophosphoric acid, XIV, 737.
- Pyropolyporus—
 igniarius, injurious to maples, XXIV, 352.
 spp., parasitic, studies, XXIII, 751.
- Pyrops candelaria, life history, XXIII, 756.
- Pyrox, tests, XXV, 456 (N. J.).
- Pyrus—
 baccata—
 for making jelly, XIX, 174.
 hybrids, XVI, 265.
 notes, XVII, 145 (Can.).
 domestica, post-ripening of, XXV, 202.
 malus, notes, XVII, 145 (Can.).
 new species, XVI, 156.
 prunifolia, notes, XVII, 145 (Can.).
 rivularis as dwarf fruit stock, XIX, 35 (Alaska).
 rivularis, pear blight affecting, XXIV, 451.
 spp., breeding experiments, XXV, 643 (Can.).
 syriaca, introduction from Palestine, XXIII, 538 (U. S. D. A.).
- Pythiacystis citrophthora—
 n. g. and n. sp., studies, XVIII, 345, 945 (Cal.).
 treatment, XIX, 658 (Cal.).
- Pythium—
 debaryanum—
 injurious to sugar beets, XXIV, 248.
 notes, XIII, 147; XVIII, 344, 746; XIX, 347; XX, 546, 846 (N. Y. State).
 studies, XXII, 347; XXIII, 654; XXV, 845.
 gracile, injurious to ginger, XXIII, 432.
 gracile, notes, XXV, 655.
 palmivorum, injurious to palms, XXIV, 351.
 palmivorum, notes, XX, 454.
 sp., notes, XVIII, 555; XXV, 847.
 sp., treatment, XVIII, 554 (Ohio).
 studies, XVIII, 1142.
- Python sebæ, helminths in, XXII, 791.
- Quack grass—
 analyses, XVI, 188 (N. Dak.).
 destruction, XVI, 251 (Mich.); XVIII, 140 (Minn.); XX, 36 (Wis.); XXI, 737 (Iowa); XXIV, 147 (Wis.); XXV, 641 (N. Dak.), 836 (U. S. D. A.).
 host plant of Hessian fly, XXI, 557.
 host plant of timothy stem-borer, XXV, 57 (U. S. D. A.).
 notes, XVI, 883 (N. Dak.); XVII, 233 (Iowa).
 seeds, studies, XXIV, 640 (U. S. D. A.).
 studies, XXI, 543; XXIV, 640 (S. Dak.).
 treatise, XXIII, 732.
 underground organs, studies, XXIII, 727.
- Quadrupeds, dynamics of locomotion in, XXIII, 577.
- Quagga, hybrid, Lord Morton's, studies, XXIV, 376.
- Quaggas, differentiation of species, XXIII, 274.
- Quail disease, notes, XIII, 182; XIX, 84 (U. S. D. A.).
- Quails—
 breeding experiments, XXI, 450; XXIV, 54.
 cold storage, XX, 560 (U. S. D. A.).
 economic value, XVI, 134 (U. S. D. A.); XVII, 476 (U. S. D. A.).
 notes, XVII, 781.
 raising, XIV, 693; XVI, 1009.
 raising in confinement, XV, 998.
 relation to fruit industry in California, XXIII, 555 (U. S. D. A.).
- Quamoclit coccinea, grafting, XVII, 563.
- Quantitative analyses—
 tables for use in, XIII, 619.
 weighing precipitates, XIII, 613.
- Quarantine—
 conditions in Oklahoma, XVII, 500.
 laws in Japan, XVI, 123.
 regulations in Canada, XVIII, 1080.
 station at Athenia, XV, 520 (U. S. D. A.).
 stations in Canada, XVI, 605.
- Quarries, abandoned, reforestation in France, XXI, 740.

Quarter evil, prevalence in—

Cape of Good Hope, XXIV, 479.
Orange River Colony, XX, 1080.

Quartz—

crushed, effect on nitrate solutions, XXIV, 620.
fertilizing value, XX, 524 (R. I.).
lamps, sterilization of water by, XXIII, 713.
sand, effect on microbial cultures, XXV, 226.

Quebracho extract, production, XVIII, 448 (U. S. D. A.).

Quednau estate, description, XV, 964.

Queen bees, notes, XIII, 163, 476.

Quercus—

ægylops, notes, XIII, 142.
alba, notes, XIX, 244 (U. S. D. A.).
aquatica disease, notes, XXI, 343 (Fla.).
gall midges affecting, XXIV, 58.
ilex, leaf parasite affecting, XXIV, 251.
macrocarpa, notes, XVIII, 742 (U. S. D. A.).
pedunculata as a stock for chestnuts, XVIII, 47.
phellos, notes, XXIII, 252.
prinus, notes, XX, 543 (U. S. D. A.).
robur, notes, XIV, 256 (Cal.).
rubra, introduction into Belgium, XXIV, 344.
rubra, notes, XVIII, 742 (U. S. D. A.).
salicina wood, distribution of pressure in, XIX, 747.
spp., analyses, XV, 263 (U. S. D. A.).
spp., differentiation, XXII, 540.
spp., hybridization experiments, XXIV, 243.
spp., insects affecting, XXIII, 756.
spp., leaves, forage value, XV, 286 (Cal.).
spp., notes, XVI, 377.
spp., resistant to mildew, XXIII, 50.
suber—
disease, notes, XXII, 742.
in New South Wales, XIV, 258.
notes, XIII, 753.

tozza mildew, notes, XX, 1142.

Querquedula crecca, Leucocytozoon affecting, XXIV, 88.

Quicklime—

effect on soil bacteria, XXIII, 231.
fertilizing value, XXIII, 232.

Quillaia bark, use in insecticides and fungicides, XXV, 225.

Quince—

and pear, graft hybrid, XV, 677.
bacterial blight, notes, XIX, 45 (Can.).
bacterial blight, studies, XXIII, 49.
blight, wintering over, XXV, 848 (Colo.).
brown rot, notes, XIV, 461.
crown gall, investigations, XXIII, 149.
curculio, notes, XIII, 763 (N. J.); XIV, 169 (U. S. D. A.).
curculio, remedies, XVII, 784 (N. Y. Cornell).

Quince—Continued.

diseases—

in western New York, XIII, 149 (N. Y. State).
notes, XV, 163 (N. C.); XXIV, 40; XXV, 545 (Conn. State).
treatment, XX, 52 (N. Y. Cornell).

fire blight, studies, XXII, 747 (N. Y. Cornell).

jam, adulteration and misbranding, XXIV, 464 (U. S. D. A.).

juice, analyses, XXI, 767.

leaf blight, notes, XVII, 985.

leaf blight, studies, XXIII, 549.

leaf spot, notes, XIII, 762.

leaf spot, perfect stage, XXI, 748.

products, determination of salicylic acid in, XXIII, 709.

rots, notes, XV, 589.

rust, notes, XV, 53, XXIV, 245 (Mass.).

stock, effect on pear scion, XXV, 339.

tumors, investigations, XIX, 1153 (U. S. D. A.).

Quinces—

analyses, XVII, 41 (N. Y. State).

chemical studies, XVI, 465.

composition of juices, XIII, 577.

culture, XVI, 365 (Mass.); XXIV, 40.
culture—

and marketing, XV, 581 (N. C.).
experiments, XV, 773 (Cal.).

in Argentina, XVII, 662.

Pennsylvania, XIX, 741.

endotrophic mycorrhiza in, XXIII, 528.

flower formation, XIII, 917 (Wis.).

fresh, preservation, XXII, 341.

injury by Bordeaux mixture, XIX, 50 (N. Y. State), 51 (N. Y. State).

insects affecting, XV, 168 (N. C.); XXIV, 40.

introduction from Palestine, XXIII, 538 (U. S. D. A.).

Japanese, postripening investigations, XXII, 704.

origin of variegation in, XIV, 740.

parthenogenesis in, XXII, 639.

pear blight affecting, XXIV, 451.

plant food used by, XVII, 39 (N. Y. State); XIX, 644 (N. J.).

preservation, XVIII, 838.

propagation by cutting, XVI, 162.

pruning and training, XVI, 671 (Tenn.).

ringing, XVII, 467.

salicylic acid in, XIV, 892 (Mont.).

varieties, XIII, 349 (Mich.), 552 (N. Mex.); XIV, 143 (Mich.), 660 (Va.); XV, 38 (Mich.); XVI, 49 (N. H.), 261 (Mich.), 371, 972 (Cal.), 1034 (Nev.); XVII, 661 (Can.); XVIII, 37 (Mich.); XX, 143 (Mich.).

varieties for home orchard, XXIV, 149 (Mich.).

Quinces—Continued.

winter injuries, XVII, 558 (N. Y. State).

winterkilling, XVII, 141 (Can.).

wounded, changes due to, XX, 1027.

Quinin—

culture, XIX, 245.

effect on—

phagocytosis, XXV, 881.

plant respiration, XXIII, 629.

plants, XXV, 433.

Quinoa, culture and use, XVIII, 39.

Quinol—

occurrence in pear tree buds, XVI, 642.

transformation into glucosids, XXIII, 725.

Quinone, poisonous properties, XIV, 13.

Quiscalus crassirostris—

destruction of mole crickets by, XXV, 255.

destruction of ticks by, XXII, 558.

introduction in island of St. Kitts, XIII, 719.

Quittor—

immunization, XXIII, 783; XXV, 380.

treatment, XVI, 127.

Ráb, use in preparing rice seed beds, XXIII, 129.

Rabbit—

botfly, notes, XIV, 464.

brush, analyses, XXIII, 71 (Nev.).

cestode, new, description, XXI, 84.

flick as a fertilizer, XVIII, 21.

traps, descriptions, XIX, 756; XXV, 446 (Kans.).

Rabbits—

anaphylaxis experiments with, XXIV, 283.

anatomy of, treatise, XXIV, 160.

as affected by—

bleached flour, XX, 861 (N. Dak.).

kainit, XXIII, 582.

sodium cinnamate, XIX, 1182.

Trypanosoma gambiense, XXIV, 482.

yohimbine, XXI, 570.

blood of fetus as affected by bacterial infection of mother, XIII, 889.

book on, XX, 1174.

breeding, XXIII, 178.

breeding, influence of male parent in, XXIII, 571.

calcium requirements, XX, 170.

destruction, XIII, 227, 531; XVI, 135, 341, 797, 1020; XVIII, 350, 651; XX, 57, 551, 551 (U. S. D. A.), 1144; XXI, 553; XXII, 352.

destruction in—

Australia, XVIII, 455.

New South Wales, XIV, 843; XV, 559.

New Zealand, XVIII, 982.

digestion experiments, XIII, 170, 171, 978; XVII, 1002; XVIII, 566; XX, 364; XXII, 72, 568; XXIII, 667.

Rabbits—Continued.

eating by cattle, XVII, 405.

economic relations, XX, 251 (U. S. D. A.).

effect on Australian flora, XX, 251.

enemies of, XXIV, 160.

frozen, in Australia, XVII, 716 (U. S. D. A.).

heredity in, XXI, 269, 772; XXIV, 771.

heredity of coat characters in, XVI, 1055.

host of spotted fever tick, XXV, 756 (U. S. D. A.).

immunization against—

amanite poisoning, XXV, 683.

anthrax, XVI, 100, 201, 924; XX, 577 (La.).

cowpox, XXIII, 481.

fowl cholera, XVII, 299; XVIII, 1085.

hemorrhagic septicemia, XVIII, 1085; XXV, 183.

hog cholera, XVIII, 383.

pneumonia, XVII, 402.

pox, XXIII, 286.

rabies, XIX, 84; XX, 578.

sarcoma, XXIII, 584.

streptococcic infection, XXV, 184.

swine plague, XVIII, 1085; XXIII, 486; XXIV, 284.

tuberculosis, XVI, 922, 1040.

immunization experiments, XXIV, 83; XXV, 380, 584.

in Australasia, XVI, 1055.

Germany, XIV, 336; XXIV, 160.

Kansas, XXIII, 356.

Kentucky, XIII, 531 (Ky.).

New South Wales, XV, 1055.

North America, XXII, 53 (U. S. D. A.).

infection experiments, XXIV, 284 (Kans.).

infection experiments per rectum, XXIV, 184.

inheritance of immunity to toxins by, XX, 1071.

injuries to—

agriculture, XV, 80.

fruit trees, XV, 774.

trees, XVIII, 691 (Ohio).

injurious, notes, XIII, 267.

inoculated, toxic products in blood serum, XVIII, 1162.

jack, destruction, XVII, 159 (Nev.); XX, 551 (U. S. D. A.).

metabolism experiments, XV, 601, 892; XVIII, 660, 759; XX, 170, 465, 1166; XXI, 168 (U. S. D. A.); XXIII, 272; XXIV, 368.

Multiceps serialis affecting, XXIV, 87 (U. S. D. A.).

notes, XVI, 889; XX, 1048 (Ohio); XXI, 555.

nutrition experiments, XXV, 369.

Rabbits—Continued.

- parasites in digestive tract of, XXII, 689 (S. C.).
- plague infection in, XXIV, 82, 556, 748.
- poisoning by—
 - calcium cyanamid, XXI, 530.
 - fertilizers, XVIII, 585.
 - loco weeds, XX, 281 (U. S. D. A.).
 - plants, XIX, 1079 (U. S. D. A.).
- production of polyvalent serums from, XXIII, 785.

Resin—

- acid from red pine, XIII, 713.
- and mineral oil, methods of analysis, XXV, 414.
- canals, structure in white fir, XXIII, 445.
- cup, description, XXIII, 644.
- detection in orange oil, XX, 708.
- detection in soft soap, XIV, 889.
- exploitation, XXII, 740.
- hydrating ferments in, XX, 1025.
- manufacture, XX, 449.
- methods of analysis, XIV, 546.
- notes, XIV, 267 (Cal.); XX, 151; XXI, 496, 658.
- oil, source, XX, 50.
- soda wash, insecticidal value, XXIV, 262 (U. S. D. A.).
- treatise, XVIII, 743.
- wash, use, XIV, 584 (U. S. D. A.).
- washes, preparation and use, XX, 255, 257.
- yields from *Pinus longifolia*, XXIII, 543.

Resinous products of *Dipterocarpaceæ*, XX, 49.

Resorcin—

- as a milk preservative, XIX, 178.
- effect on plant cells, XXI, 424.
- hydrochloric-acid reactions, XX, 909.

Resorption—

- and digestion, laws of, XXII, 769.
- in the intestines, XV, 67.

Respiration—

- and digestion, handbook, XXII, 769.
- apparatus—
 - at Helsingfors, XVIII, 962.
 - description and tests, XX, 1167.
 - for men, new, XVI, 287.
 - plants, XIII, 21 (Wis.); XVI, 39 (Wis.).
 - small animals, description, XXIV, 174; XXV, 471.
- Jaquet, tests, XX, 68.
- notes, XIV, 637.
- paper on, XXV, 471.
- Pettenkofer, tests, XIX, 1063.
- Sondén-Tigerstedt test, XVI, 186.
- as affected by—
 - sunlight, XIV, 478.
 - tea and coffee, XIV, 477.

Respiration—Continued.

calorimeter—

- at Berlin Agricultural College, XXV, 173.
- check tests, XXIV, 195.
- construction, XV, 173 (Pa.).
- construction and operation, XXV, 570 (U. S. D. A.).
- control tests, XXIII, 470.
- description, XVII, 165 (U. S. D. A.); 1098; XVIII, 962, 1151 (U. S. D. A.); XIX, 971 (U. S. D. A.); XX, 566; XXIV, 601; XXV, 867.
- experiments, value, XIV, 319.
- for animals, XV, 737, 1036, 1037; XVII, 275 (Pa.).
- new, notes, XX, 734.
- new uses for, XXIV, 605.
- notes, XX, 169.
- tests, XXIV, 468 (Pa.).

calorimeters, descriptions, XXIII, 470.

endospermic, in seeds, XX, 734.

experiments—

- at Carnegie Institution, XXI, 366.
- with animals, XV, 799 (U. S. D. A.); 1044; XVII, 380 (Pa.); XVIII, 512.
- diabetic patients, XXI, 666.
- dogs, XX, 1167.
- fruit, XXV, 729 (U. S. D. A.).
- infants, XX, 1167.
- men, XIII, 376; XV, 886 (Conn. Storrs); XVI, 80; XVII, 888, 1098; XXIV, 268 (U. S. D. A.), 668.
- men, mercurial poisoning in, XXI, 467.
- plants, XXV, 729.
- sheep, XIX, 1167.
- steers, XVII, 579 (U. S. D. A.); XIX, 866 (U. S. D. A.), 867 (Pa.).

in fungi as affected by light, XIV, 839.

injured leaves, XIV, 739.

plants, XIV, 840; XVII, 234; XXV, 124.

in plants as affected by—

- different stimulants, XV, 226.
- metallic salts, XIV, 121, 943.
- strength of solutions, XIV, 943.
- temperature, XVI, 229, 619.

in poultry, XXII, 790.

- seeds, XVI, 167 (U. S. D. A.).
- wheat as affected by temperature, XIV, 839.

intramolecular, in plants, XVI, 133, 745.

intramolecular, in seeds, XIV, 154.

Respiratory—

exchange—

- apparatus, description, XXI, 665; XXV, 570.
- as affected by body position, XXV, 270.

- Respiratory—Continued.
 exchange—continued.
 as affected by food, XVII, 486.
 in infants, XXI, 665.
 relation to surface area, XXV, 68.
 quotient as affected by—
 age, XVII, 70.
 altitude, XXIV, 669.
 preceding diet, XXV, 267.
 surroundings, XIV, 597.
 quotient—
 calculation, XV, 1101.
 determination, XIV, 992.
 in static work, XV, 65; XVII, 1100.
- Restaurants, inspection in—
 England, XVIII, 1066.
 Missouri, XXII, 567.
- Retinia—
 austriana n. sp., notes, XVIII, 457.
 buoliana, notes, XIII, 367; XVI, 890.
 frustrana, studies, XXV, 855.
 resinella, notes, XIV, 64.
 spp., notes, XV, 596.
- Reversion, new views concerning, XXIII, 670.
- Rhabdocnemis (Sphenophorus) obscurus, studies, XXV, 665 (U. S. D. A.).
- Rhabdometra n. sp., description, XXIII, 488.
- Rhabdonema strongyloides as a pig parasite, XX, 584.
- Rhabdophaga—
 heterobia, notes, XVII, 676.
 salicis, notes, XIV, 464.
- Rhabdospora—
 cæspitulosæ, notes, XIX, 659.
 coffeæ, notes, XIX, 657.
 coffeicola, description, XVI, 988.
 oxycocci n. sp., description, XIX, 446.
 theobromæ n. sp., description, XVI, 888.
- Rhagium lineatum, notes, XXIV, 455 (Can.).
- Rhagodia—
 linifolia, notes, XIV, 235 (Cal.).
 spinescens inermis, notes, XIV, 235 (Cal.); XV, 765 (Cal.).
 spp., culture, XIV, 653 (Cal.).
- Rhagoletis—
 cerasi—
 introduction into England, XXIII, 459.
 notes, XXV, 250.
 remedies, XIX, 55.
 cingulata. (See Cherry fruit maggot.)
 new species, notes, XX, 1152.
 pomonella. (See Apple maggot.)
- Rhagophthalmidæ, catalogue, XXIII, 465.
- Rhamnose, effect on—
 metabolism, XIV, 73.
 nitrogen, fixation, XX, 1116.
- Rhamnus—
 prinoides rust, studies, XX, 946.
 spp., studies, XXV, 651 (U. S. D. A.).
- Rhaptothrips, new species, description, XXIII, 255.
- Rhea—
 americana, notes, XXIII, 279.
 culture experiments, XIV, 561.
 culture in India, XXII, 445.
- Rheotropism—
 of roots, XIII, 110.
 studies, XIV, 120, 226.
- Rheum rhaponticum—
 notes, XXIV, 47.
 use in medicine, XVIII, 636.
- Rheumatic cure, misbranding, XXV, 769 (U. S. D. A.).
- Rheumatism—
 acute, in horses, XV, 620.
 diagnosis, XXI, 183.
- Rhigozum trichotomum, analyses, XXIV, 371.
- Rhina barbirostris, notes, XXIV, 255.
- Rhinanthaceæ, parasitic, investigations, XXIII, 727.
- Rhinaria perdix, notes, XIV, 467.
- Rhinhyptia sp., notes, XXI, 646.
- Rhinitis in hogs, XVIII, 583.
- Rhinoceros—
 beetle, notes, XIV, 671 (U. S. D. A.).
 white, raising for meat, XXII, 381.
- Rhipicentor—
 nuttalli, description, XX, 656.
 vicinus n. sp., description, XX, 764.
- Rhipicephalus—
 annulatus, anatomy and histology, XIX, 355.
 annulatus, notes, XVII, 57.
 appendiculatus, notes, XV, 1126; XVI, 72; XVII, 591, 592; XVIII, 1064; XXI, 763; XXIV, 683.
 appendiculatus, relation to amakebe, XXV, 882.
 australis. (See Margaropus australis.)
 decoloratus—
 notes, XVI, 72; XVII, 57, 266; XX, 787; XXV, 586.
 remedies, XIX, 684.
 transmission of spirillosis by, XX, 680.
 evertsi, notes, XVII, 912.
 evertsi, relation to anaplasmosis in donkeys, XXV, 183.
 new species, descriptions, XX, 1154; XXI, 654.
 sanguineus, notes, XVI, 72; XVIII, 880; XIX, 481; XXI, 184; XXII, 558.
 shipleyi, transmission of Texas fever by, XV, 302, 303.
 simus, notes, XVII, 592, 912.
 simus, transmission of Texas fever by, XV, 303.
 spp., descriptions, XIV, 780.
 spp., distribution in South Africa, XVI, 408; XVII, 804.
 spp., fumigation experiments, XXV, 887.
 spp., life history, XVIII, 357.

- Rhipicephalus*—Continued.
 spp., notes, XVIII, 876; XX, 681.
 spp., prevalence in Uganda, XXIII, 485.
 spp., transmission of African coast fever by, XVII, 189; XVIII, 84.
texanus, notes, XX, 1055; XXII, 355.
- Rhizina undulata*, notes, XXIV, 453, 652.
- Rhizobia*, biology of, XVII, 960.
- Rhizobium*—
leguminosarum—
 culture, XIII, 718.
 fixation of nitrogen by, XX, 18.
 formation of slime by, XVIII, 1031.
 structure of, XVIII, 1032.
 mutable, motility, XV, 17.
- Rhizobius*—
graminis, notes, XV, 378.
lophanthæ, notes, XVII, 782 (U. S. D. A.).
towomb, notes, XVII, 676.
ventralis, notes, XIII, 67; XVI, 71 (U. S. D. A.); XIX, 760; XXI, 160; XXIII, 257; XXIV, 559.
- Rhizoctonia*—
 disease of potatoes in Ohio, XIV, 580.
 diseases in United States, XIII, 55 (N. Y. Cornell), 55 (N. Y. State).
medicaginis, occurrence in America, XXV, 547.
solani, fruiting stage, XV, 686.
solani, notes, XIV, 159 (Colo.), 160; XVI, 677; XVIII, 151, 646.
 sp., notes, XIV, 157 (Colo.), 266, 671; XV, 782; XVI, 271 (N. Y. Cornell), 788 (Fla.), 887 (Ohio); XVII, 567; XX, 846 (N. Y. State); XXIII, 355, 646 (Ariz.), 743; XXIV, 347 (Miss.); XXV, 548 (Can.).
 sp., studies, XXII, 246; XXIII, 447.
 sp., treatment, XVIII, 554 (Ohio), 648 (Ohio).
 spp. as affected by tannin, XXV, 524.
strobi, notes, XIII, 465.
violacea, notes, XV, 374, 484; XVI, 479; XVIII, 56, 151, 646; XIX, 151; XX, 451; XXI, 147; XXIII, 348, 741; XXV, 246.
violacea, studies, XVI, 67; XXII, 346, 746; XXIII, 741.
- Rhizoglyphus*—
echinopus, notes, XIV, 885; XVI, 791; XVII, 162; XX, 61; XXI, 753; XXIV, 654.
hyacinthi (*echinopus*), notes, XXV, 664.
- ¹ *Rhizomaria piceæ*, notes, XVII, 1171.
- Rhizomorphic root rot* of fruit trees, investigations, XIII, 150 (Okla.).
- Rhizomucor parasiticus*—
 inoculation experiments with animals, XVI, 301; XVII, 917.
 notes, XVII, 186.
- Rhizomys splendens* injurious to rubber plants, XIX, 1155.
- Rhizopertha dominica*, studies, XXV, 663 (U. S. D. A.).
- Rhizophagus populinus*, notes, XIII, 662.
- Rhizophidium fungicolum* n. sp., description, XIV, 455.
- Rhizopus*—
equinus, inoculation experiments with animals, XVI, 301; XVII, 917.
necans, notes, XIV, 62.
niger, latent vitality of spores of, XXIII, 721.
nigricans—
 as affected by nutrient solutions, XXII, 27.
 dissemination by fruits, XXII, 369.
 relation to blind staggers, XXIV, 284 (Kans.).
 resistance of spores to heat, XIV, 330.
 spore formation, XV, 123 (U. S. D. A.).
 studies, XX, 948, 1025; XXV, 350 (La.).
 source of nitrogen for, XXII, 725.
 spp., notes, XXI, 145 (Me.).
 spp., relation to depreciation in prunes, XXIII, 630.
- Rhizosphæra abietis*—
 n. g., description, XVIII, 650.
 notes, XIX, 155.
- Rhizotrogus solstitialis*, notes, XIV, 987.
- Rhodamine red*, feeding to fowls, XXIII, 572.
- Rhode Island*—
 College—
 extension work, XVII, 410; XVIII, 887.
 notes, XIII, 297, 496, 904; XIV, 98, 512; XV, 100, 939, 1137, XVI, 112, 309, 1141; XVII, 514, 820, 1204; XVIII, 796; XIX, 196, 495, 797; XX, 197, 493, 596, 799, 998; 1098; XXI, 97, 499; XXII, 200, 497; XXIV, 297, 800; XXV, 698.
 Metropolitan Park Commission, XXII, 449; XXIII, 736.
 soil survey, XVII, 740 (U. S. D. A.).
- Station—
 financial statement, XIII, 798; XV, 198; XVI, 107, 831; XVII, 924; XVIII, 1174; XX, 195; XXI, 295; XXIII, 95; XXV, 394.
 guide to grounds, XVII, 307.
 notes, XIII, 297, 496, 699, 904, 1108; XIV, 512, 1035; XV, 100, 202, 312, 732, 833, 1030; XVI, 112, 309, 412, 833, 1038, 1141; XVII, 101, 202, 309, 514, 718, 820, 927, 1204; XVIII, 96, 495, 597, 693, 796, 999, 1177; XIX, 96, 196, 293, 495, 1196; XX, 493, 695, 799, 998; XXI, 499; XXII, 298, 497,

Rhode Island—Continued.

Station—Continued.

195; XXI, 295; XXIII, 95;

XXV, 394.

Rhodes grass—

analyses, XXII, 69 (Hawaii); XXIII,
771.

introduction from South Africa, XV,
249 (U. S. D. A.).

Rhodesia, information concerning, XVII,
512.

Rhodesian cattle disease, tick fever, or red-
water. (See African coast fever.)

Rhodites rose, description, XXIII, 355.

Rhodochytrium spilanthis, notes, XX,
550.

Rhododendron—

buds, studies, XXI, 31.

cankers, studies, XIX, 755.

lace bug, notes, XXIV, 454, 750 (Conn.
State).

leaves—

as thermometers, XVII, 222
(U. S. D. A.).

chlorin content, XXI, 30.

fungi on, XVI, 989.

Rhododendrons—

cold storage for, XVII, 369.

color as affected by different sub-
stances, XVIII, 44.

crossing, XVI, 161.

fertilizer experiments, XIII, 140, 1049.

insects affecting, XXIV, 361.

magnesium sulphate for, XVIII, 445.

poisonous to stock, XX, 189.

varieties for Scotland, XX, 842.

Rhodoneura myrtea fenestrata, injurious
to rubber, XIX, 760.

Rhombostibella rosea n. g. and n. sp., de-
scription, XIV, 455.

Rhopalocera—

of Java, monograph, XXII, 359.

Transvaal, list, XXII, 359.

Rhopalocystis nigra, description, XXV, 546.

Rhopalosiphum—

arbuti n. sp., description, XXIV, 57.

berberidis, studies, XX, 1149.

lactuce, notes, XIII, 70.

ribis, notes, XIII, 574, 873.

violæ n. sp., description, XXI, 451.

violæ, notes, XIII, 263 (U. S. D. A.).

Rhubarb—

absorption by milk, XX, 975.

analyses, XVII, 41 (N. Y. State);
XVIII, 237.

as affected by flea beetles, XXI, 155
(U. S. D. A.).

beetles, notes, XIV, 586 (N. J.).

Rhubarb—Continued.

blight, notes, XVIII, 58.

Chinese, composition, XIV, 1044.

cooking, XIII, 949.

crimson winter, origin, XVII, 250.

culture, XIII, 949; XIV, 38; XVII,
253 (Ark.), 863 (Alaska).

culture in—

Alaska, XVI, 141 (U. S. D. A.).

England, XVIII, 237.

Germany, XVIII, 237.

disease, new, description, XXIV, 47.

fertilizer experiments, XIII, 645; XIV,
963; XV, 672 (R. I.); XVII, 234
(Mass.); XVIII, 226 (Mass.); XIX,
226 (Mass.); XX, 327 (Mass.);
XXIV, 233 (Mass.), 640.

forcing, XIV, 144.

forcing—

experiments, XXV, 536.

in the dark, XV, 471; XVII, 618.
winter, XVI, 871.

with ether, XVII, 250 (Vt.), 716
(U. S. D. A.); XIX, 235 (Vt.),
645 (N. J.).

leaves, proteolytic enzymes in, XVII,
542.

mildew, notes, XV, 485.

new variety, XV, 964.

occurrence of allantoin in, XXV, 168.

preparation for the table, XVIII, 237.

use in medicine, XVIII, 636.

varieties, XIV, 144 (Can.).

Rhus—

coriaria as a pepper adulterant, XXI,
10.

coriaria, notes, XX, 512 (U. S. D. A.).
diversiloba, forage value, XV, 286
(Cal.).

spp., notes, XIX, 129.

tox, use in cases of tetanus, XXIII,
585.

toxicodendron, notes, XV, 15.

trilobata, value in plant breeding,
XVIII, 637.

Rhynchites—

betuleti—

color dimorphism in, XXI, 753.

notes, XXIII, 53.

remedies, XXIII, 666.

bicolor, notes, XIII, 264 (U. S. D. A.);
XIV, 63 (Mont.); XV, 382 (Mont.);
XXIII, 764.

bicolor, prevalence in Massachusetts,
XXII, 759.

minutus, effect on strawberries, XIV,
65.

spp., notes, XXI, 653.

Rhynchodiplodia citri, notes, XVI, 382.

Rhyncholophus sp., parasitic on range cat-
terpillar, XXIII, 464 (U. S. D. A.).

Rhynchophora of United States, XIX, 1157;
XX, 1050.

Rhynchophorus—

cruentatus, notes, XIV, 671 (U. S.
D. A.).

Rhynchophorus—Continued.

- ferrugineus, notes, XVI, 178; XVIII, 159.
 palmarum, notes, XIV, 671 (U. S. D. A.); XVII, 268; XXIV, 255; XXV, 254, 855.
 phenicis, notes, XIX, 1159; XXV, 251.

Rhynchosporium graminicola—

- notes, XIV, 1083.
 studies, XIII, 963.

Rhynchota—

- bibliography, XXIII, 765; XXIV, 161.
 hymenopterous parasites, XXIII, 765.
 of India, XX, 1148; XXIII, 358.
 stridulating organs, XIII, 71.

Rhyolites in central Africa, XVI, 241.

Rhyphus punctatus, notes, XXIII, 254 (Me.).

Rhysallus atriceps, notes, XIII, 371 (N. Y. Cornell).

Rhysipolis sp., notes, XXIII, 159 (Del.).

Rhysotricha halstedii, notes, XXI, 626.

Rhytisma—

- concaum n. sp., description, XIV, 455.
 spp., notes, XIX, 156.

Rib grass—

- analyses, XX, 69; XXIII, 771.
 in Vermont, XXII, 638 (Vt.).

Ribbed rhagium, notes, XXIV, 455 (Can.).

Ribes—

- aureum, fungus disease affecting, XXV, 849.
 diseases, notes, XXII, 151.
 leaves, chlorin content, XXI, 30.
 spp., cambium miners affecting, XXIV, 561 (N. Y. State).
 spp., hydrocyanic acid in, XVIII, 126.
 spp., notes, XX, 951.

Rice—

- absorption of nitrites by, XXIII, 725.
 adulteration and misbranding, XXV, 769 (U. S. D. A.).
 albumin, toxic properties, XXII, 768.
 analyses, XIV, 558, 856; XVI, 82; XVII, 788; XIX, 163, 867 (Conn. State); XX, 775; XXI, 165 (Me.), 367 (Can.), 463 (Me.), 564, 766; XXII, 30 (Hawaii), 64 (Hawaii), 68, 172, 566 (Me.); XXIII, 169, 237, 467; XXIV, 568, 573, 763, 768; XXV, 767.
 and oat flour, relation to pellagra, XXIII, 568.
 wheat starch, differentiation, XXI, 522.
 army worm affecting, XXIII, 254 (Hawaii); XXV, 357.
 as a cause of beriberi, XIX, 1164; XX, 358; XXI, 466; XXIII, 271, 793; XXIV, 66; XXV, 572.
 foodstuff, XXV, 767.
 as affected by naphthalin, XIX, 325.
 affected by salt water, XXI, 540 (Tex.).
 assimilation of ammonium salts by, XXII, 328.

Rice—Continued.

- Austrian, for horses, XVI, 725 (U. S. D. A.).
 bacterial disease, description, XV, 590.
 biological value of nitrogen in, XXIII, 69.
 black Burmese, notes, XIII, 1073.
 blast, investigations, XVIII, 244 (S. C.).
 blight, studies, XXIV, 743.
 bran—
 analyses, XIV, 790 (Wis.); XV, 802 (Wis.); XVI, 584; XVII, 891 (Wis.), 1177 (Hawaii); XVIII, 571 (La.), 968 (Tex.); XIX, 564 (Tex.), 867 (Conn. State), 867 (La.), 970 (Wis.); XX, 864 (La.), 1065 (Tex.); XXI, 668 (Miss.); XXIV, 374 (Tex.), 573.
 digestibility, XV, 288; XVI, 187 (La.).
 phytin content, XIX, 966.
 protective power in rice diet, XXV, 866.
 use against beriberi, XXII, 768; XXV, 170.
 breeding, notes, XXI, 132.
 brusone—
 investigations, XVIII, 450, 1055; XIX, 751, 956.
 loss of resistance to, XVIII, 946.
 notes, XVIII, 150.
 studies, XXI, 243.
 treatment, XVIII, 947.
 bug, notes, XXI, 649; XXII, 357.
 by-products—
 analyses, XVI, 1107 (Tex.); XXII, 670 (La.), 670 (Miss.); XXIII, 73 (Miss.), 572 (Tex.); XXIV, 672, 768; XXV, 477 (La.).
 feeding value, XVII, 894 (Tex.); XXIV, 93 (U. S. D. A.).
 for live stock, XXI, 569 (La.).
 improvement, XVII, 489.
 utilization, XVII, 615.
 cleaning and polishing, XIV, 435; XX, 1159.

use in carbonated beverages, XVIII, 421.
use in insecticides and fungicides, XXV, 225.
- Sapotas**, analyses, XVI, 669 (U. S. D. A.).
- Saprophytes**—
growth as affected by boric acid, XXIII, 370.
in milk, XXI, 674.
- Sapsuckers**—
biological relations, XIII, 22.
yellow-bellied, economic relations, XXI, 646.
- Sarapoda bombiformis**, notes, XXIII, 755.
- Sarcina**—
aurantiaca as affected by gases, XX, 627.
mobilis n. spp., notes, XX, 674.
- Sarcobatus**—
sp. as a host plant of beet leafhopper, XXIII, 557 (U. S. D. A.).
vermiculatus, analyses, XV, 13 (N. Mex.), 889 (Ariz.).
vermiculatus, notes, XIII, 731 (U. S. D. A.).
- Sarcocystis**—
cameli n. sp., description, XXIV, 588.
tenella, notes, XVIII, 1166; XXIII, 486.
tenella, spore structure, XVIII, 1166.
- Sarcocysts** in the camel, XXIV, 588.
- Sarcocoma**—
alveola, prevalence in Australia, XX, 1080.
in fowls, studies, XXIV, 286.
fowls, transmission, XXV, 90.
rabbits, immunization, XXIII, 584.
notes, XXV, 650 (U. S. D. A.).
- Sarcomata**, transplanting, XV, 511.
- Sarcophaga**—
caridei n. sp., description, XIX, 162.
georgina, notes, XX, 258 (U. S. D. A.).
lineata, parasitic on crickets, XXV, 853.
sp., parasitism, XXIII, 162.
spp., notes, XXI, 161.
spp., parasitic on locusts, XX, 852.
spp., relation to leprosy, XXIV, 756.
trivittata, notes, XXI, 559.
- Sarcophagidæ**—
destruction of organic matter by, XIX, 56.
of Kongo, XX, 1147.
parasitic on gipsy moth, XXIV, 757 (U. S. D. A.).
- Sarco-phosphoric acid** in nervous system, XVI, 82.
- Sarcopsylla**—
gallinacea, distribution on rats, XXV, 57.
gallinacea, notes, XV, 490; XXI, 554; XXII, 361.
penetrans, notes, XIII, 475 (Va.); XX, 760; XXII, 559.
- Sarcoptes**—
mutans, notes, XIII, 67; XXI, 646.
scabiei—
notes, XIII, 475 (Va.); XVII, 57.
suis, description, XVII, 88 (U. S. D. A.).
suis, notes, XVI, 205.
sp. as a cause of rat disease, XXI, 636.
spp., notes, XIII, 266.
- Sarcoptic scabies** in pigs, XVI, 97.
- Sarcorhamphus gryphus**, bird lice affecting, XXIV, 57.
- Sarcosporidia**—
eosinophilous cells in, XX, 484.
in horses, XX, 880.
pigs in Sweden, XV, 87.
sheep, studies, XVIII, 1166.
morphology and biology, XV, 1130.
- Sarcosporidiosis**—
in a horse, XXIII, 482.
horses, bibliography, XXIII, 483.
the opossum, XXIV, 481.
prevalence in Queensland, XXII, 783.
relation to loco disease and dourine, XXII, 784.
studies, XXI, 79; XXV, 880.
- Sardine**—
industry in Norway, XXII, 263.
paste, analyses, XVIII, 857.
waste, fertilizing value, XXV, 729.
- Sardines**—
adulteration, XXII, 164; XXIII, 271 (U. S. D. A.), 568 (U. S. D. A.).
analyses, XXII, 662 (Conn. State); XXIV, 667 (N. Dak.).
canned, tin salts in, XXIV, 763.
canned, toxic properties, XVIII, 960.
labeling, XXIV, 764 (N. Dak.).
misbranding, XXIII, 769 (U. S. D. A.).
preparation in France, XVIII, 856 (U. S. D. A.).
use as fertilizer, XVIII, 618.
- Sarracenia purpurea**, new pigment in leaves, XIV, 528.
- Sarraja**, prevalence in Sudan, XX, 876.
- Sarson**, water requirements in India, XXIII, 332.
- Saskatoon**, notes, XIII, 244 (Can.).
- Sassafras**—
heart rot, notes, XIX, 550.
posts, durability, XXIV, 644 (Ohio).
sprouts, destruction, XVII, 974 (Ark.); XVIII, 1095 (U. S. D. A.).

Saturnia—

- pavonia, introduction into New York, XXIV, 54.
- pyretorum, life history, XXIV, 58.
- yama-mai silk, coloring matter, XVIII, 558, 958.

Saturnian moths, notes, XVI, 177.

Saturniidae parasites, notes, XXII, 754.

Sau tree, culture on tea plantations, XVIII, 338.

Sauces—

- condimental, adulteration, XVIII, 164 (U. S. D. A.).
- examination, XX, 168.
- inspection in Massachusetts, XXV, 65.

Sauerkraut—

- examination, XIX, 1163; XXIV, 667 (N. Dak.)
- fermentation, XXIV, 717.
- fermentation experiments, XXI, 615.
- manufacture, XIX, 966.
- varieties of cabbages for, XXIII, 142

Saunders, W., biographical sketch, XIII, 290 (U. S. D. A.).

Sauromatum tubers, forcing experiments, XXIII, 41.

Sausage—

- acidity of, significance, XXV, 612.
- analyses, XVI, 284; XX, 707, 1009, 1157; XXI, 65, 165, 165 (Me.), 659; XXII, 566, 662 (Conn. State); XXIII, 567 (Me.).
- binding material in, XIX, 460.
- bologna, adulteration, XVIII, 461; XXIV, 566.
- canned, analyses, XX, 63, 771.
- casing, slimy, micro-organisms on, XXII, 762.
- composition and price, XVI, 799.
- corn meal in, detection, XVII, 576.
- examination, XVIII, 259 (N. Dak.), 854 (Conn. State), 960 (Tex.); XIX, 1062 (Me.), 1163; XXIV, 125, 566; XXV, 165.
- formaldehyde in, XVIII, 757.
- hygienic preparation, XX, 658.
- in Spain, XV, 523 (U. S. D. A.).
- legislation concerning, in Indiana, XXI, 463.
- manufacture from infected meat, XVI, 96.
- manufacture in Prussia, XVII, 716 (U. S. D. A.).
- methods of analysis, XXI, 613.
- micro-organisms in interior of, XXV, 265.
- mixtures, adulteration, detection, XIX, 765.
- nut, analyses, XX, 771.
- pork, examination, XXV, 368 (Me.).
- pork, inspection, XXIII, 65 (Me.).
- preparation for smoking, XX, 1059.
- preservatives in, XVII, 487.
- skins, identification of coloring matter in, XXI, 108.

Sausage—Continued.

- transmission of anthrax to man by, XXI, 783.
- water content, XVIII, 1149; XX, 771.

Savanna—

- blackbird, destruction of ticks by, XXII, 558.
- soils, relation to moisture, XXIII, 314.

Savannah River, stream flow, XXV, 418 (U. S. D. A.).

Savastana odorata, notes, XIII, 323 (S. Dak.).

Savin oil, detection, XX, 1110.

Savory—

- culture experiments, XX, 335 (Vt.).
- winter, analyses, XVII, 41 (N. Y. State).

Sawdust—

- and gypsum as a feeding stuff, XXI, 667.
- as a litter, XXII, 434.
- ashes, analyses, XVII, 847 (R. I.).
- cakes for horses, XXV, 276.
- detection in foods, XVII, 1135; XXV, 110.
- determination of moisture in, XXIII, 112.
- economic application, XVI, 140.
- effect on productivity of soils, XX, 1115.
- fertilizing value, XIV, 234.
- fuel value, XVIII, 191.
- in streams, effect on fish, XVI, 341.
- manufacture of ethyl alcohol from, XXI, 187.

Sawflies—

- American, synopsis, XXII, 558.
- catalogue, XXIV, 662 (U. S. D. A.); XXV, 362 (U. S. D. A.).
- injurious to pecans, XXII, 465.
- life history, XXIII, 366.
- notes, XIII, 368 (U. S. D. A.), 770; XIV, 463, 1098; XV, 56 (Can.), 382 (Mont.); XVI, 387 (U. S. D. A.), 989 (Conn. State), 1096 (N. J.); XVII, 1172; XIX, 455 (U. S. D. A.), 552, 756 (Me.); XXII, 58.
- parthenogenesis in, XIX, 557.
- remedies, XVI, 484.
- studies, XXI, 756.

Sawfly—

- larvæ in apples, XX, 955.
- violet, notes, XVII, 265 (U. S. D. A.).
- western grass-stem, studies, XXIII, 56 (U. S. D. A.).

Sawmills—

- establishment, XIV, 974.
- statistics, XIX, 243 (U. S. D. A.).

Saw-tooth grain beetle, studies, XXI, 558 (N. C.).

Scabies— (See also Cattle, Dog, Horse, and Sheep mange or scab.)

- eradication, XXIII, 387, 789.
- in cattle—
 - description and treatment, XIV, 191 (U. S. D. A.).

Scabies—Continued.

in cattle—continued.

- notes, XV, 410, 730 (Kans.).
- symptoms and treatment, XXV, 886 (S. Dak.).

in horses and mules, notes, XV, 718.

- laboratory animals, studies, XXV, 87.

rabbits, XXV, 788.

prevalence in—

- Cape of Good Hope, XXIV, 479.
- Germany, XX, 876.
- Orange River Colony, XX, 1081.
- Transvaal, XX, 679, 787.

psoroptic, of cattle, XIII, 88.

sarcoptic, of horses, XIII, 88.

Scabiosa australis, notes, XIV, 52 (Pa.).

Scale—

bee, description, XVIII, 164.

black. (*See* Black scale.)

bug, remedies, XXIII, 253 (Hawaii).

California, red, notes, XV, 980.

cottony cushion. (*See* Cottony cushion scale.)

cottony maple, remedies, XVII, 378 (N. J.).

flat, notes, XIII, 266 (U. S. D. A.), 767.

Florida red. (*See* Florida red scale.)

fluted. (*See* Cottony cushion scale.)

Forbes. (*See* Cherry scale.)

gloomy. (*See* Gloomy scale.)

greedy. (*See* Greedy scale.)

green, notes, XV, 378, 784, 981; XXI, 253, 648; XXIV, 355.

hemispherical. (*See* Hemispherical scale.)

Howard. (*See* Howard scale.)

imported, notes, XIV, 66.

Indian wax, notes, XIV, 781.

insect—

- diseases, notes, XX, 556 (Fla.).
- new, description, XIX, 55.
- parasites, notes, XX, 1147.

insecticides, tests, XX, 939 (Mich.).

insects—

catalogue, XXV, 463 (U. S. D. A.).

descriptions, XVII, 163 (Conn. State); XX, 554.

destruction by Bengal beans, XXI, 658.

dissemination, XXII, 357.

distribution, XVIII, 353.

distribution as affected by temperature, XX, 852 (N. H.).

eating by birds, XIX, 251 (U. S. D. A.).

fumigation, XVI, 795.

fungoid parasites of, XXIV, 246.

gathering of honey from, XXII, 760.

grass-infecting, notes, XXII, 58.

in Cyprus, XV, 979.

Egypt, XXII, 751.

Japan, XIX, 1157; XXIII, 54.

Scale—Continued.

insects—continued.

in Lesser Antilles, XIII, 767.

Missouri, XXI, 60 (Mo. Fruit).

Nebraska, XXII, 656.

New York, XIII, 767.

New Zealand, XXIV, 57.

Uganda, XXV, 53.

West Indies, XIV, 780; XV, 58; XXIV, 355.

insects injurious to—

citrus fruits, XIII, 160, 266 (U. S. D. A.).

coconut palms, XXIV, 255.

date palms, XIX, 759 (Ariz.); XXV, 656.

flax, XXIV, 56.

laurel, XXI, 649.

limes, XXIV, 355.

peaches, XXV, 338 (U. S. D. A.).

rubber, XXIV, 354.

sugar cane, XIII, 573.

tea, XX, 61.

Insects—

national collection, XX, 161 (U. S. D. A.).

natural enemies, XIV, 463, 782.

new genus and species, descriptions, XXII, 357.

new parasites of, XXIII, 564.

new species, descriptions, XV, 56; XX, 351 (U. S. D. A.); XXI, 649.

notes, XIII, 370, 1062 (Fla.), 1063; XIV, 267 (Cal.), 267

(Mich.), 466, 587, 885, 1097; XV, 168, 691, 692, 880, 974

Screens—

for nurseries, description, XX, 152.

muslin, for corn breeding work, description, XXV, 835 (Va.).

Screw—

bean, notes, XIII, 731 (U. S. D. A.);

XIV, 666.

worm—

fly, notes, XIII, 475 (Va.); XIV,

884; XXI, 160, 161; XXII, 559.

notes, XIV, 702, 1097; XXII, 559.

parasitism, XXIII, 162.

Scudderia texensis, notes, XIV, 586 (N.

J.); XV, 391 (U. S. D. A.); XVII, 974

(Ark.).

Scurfy—

bark louse. (See Scurfy scale.)
scale—

- life history and control, XXIII, 156 (U. S. D. A.).
- notes, XIII, 69, 470, 472, 767, 875, 967; XIV, 65 (Mass.), 169 (U. S. D. A.), 780; XV, 58 (Conn. State), 168 (N. C.), 377, 546, 975, 978 (Del.); XVI, 274 (Can.); XVII, 881, 1092, 1169; XVIII, 456; XIX, 54 (Del.), 55 (Tenn.), 352, 1156 (Can.), 661 (N. J.); XX, 560 (Md.), 1050 (Minn.), 1145, 1146; XXI, 60 (Mo. Fruit), 554; XXIII, 59 (Wis.).
- remedies, XVIII, 161, 251, 351; XX, 958 (Va.); XXII, 560.

Scurvy—

- from using pasteurized milk, XXII, 680.
- grass, culture and use, XVIII, 39.
- in South Africa, treatment, XX, 770.
- studies, XIX, 1165.

Scutellista cyanea—

- life history and habits, XXIV, 563.
- notes, XIV, 883; XVI, 71 (U. S. D. A.); XVIII, 59; XIX, 1159.
- parasitic on olive black scale, XXV, 161.

Scutigera forceps—

- notes, XIV, 374 (U. S. D. A.).
- remedies, XXII, 560.

Seymus—

- intrusus, destruction of mealy bugs by, XXIII, 661 (La.).
- marginicollis, notes, XVII, 265 (U. S. D. A.).
- punctum, notes, XX, 953 (U. S. D. A.).

Sea—

- baths, effect on metabolism in man, XVI, 288.
- bird manure, analyses, XXIV, 19.
- bird reservations in Alaska, XXIII, 153 (U. S. D. A.).
- blite—
 - as a host of beet leaf-hopper, XXIII, 557 (U. S. D. A.).
 - ash analyses, XV, 13 (N. Mex.).
 - composition and nutritive value, XIV, 378.
- defenses, construction, XV, 827.
- effect on climate, XVIII, 527, 814.
- fowl excreta, effect on volcanic rocks, XVIII, 915.
- kale—
 - disease, treatment, XX, 451.
 - industry, notes, XXII, 764.
 - Rhizoctonia disease, studies, XXIII, 247.
- levels, atmospheric temperature at, XXII, 216.
- lion manure, analyses, XXIV, 19.
- lion reservations in Alaska, XXIII, 153 (U. S. D. A.).

Sea—Continued.

- mud, fertilizing value, XXIII, 325; XXV, 626.
- mussels, utilization, XXV, 163.
- salt, fertilizing value, XXIV, 542.
- temperature, XIV, 552 (U. S. D. A.).
- urchin eggs, electrical conductivity of, XXIV, 575.
- urchins as affected by lecithin, XXIII, 774.
- water—
 - absorption of ammonia by, XIV, 1055.
 - as a dust preventive, XX, 288 (U. S. D. A.).
 - fungicide, XIII, 661.
- water, effect on—
 - foliage, XVI, 20.
 - germination of seeds, XVIII, 1031.
 - plants, XIV, 15, 423; XIX, 727.
 - soils, XIX, 516.
- water—
 - expansion, XIV, 835.
 - nitrification in, XX, 716.
 - nitrobacteria in, XXII, 723.
 - nitrogen-fixing bacteria in, XVIII, 915.
 - nitrogenous compounds in, XVIII, 816; XX, 15.
 - nitrous acid in, XVII, 533.
 - silica in, XVIII, 816.
 - storage of heat in, XX, 806.
 - synthetic preparation, XV, 103.
- Seal fat, analyses, XVIII, 168.
- Sealing wax, analyses, XXI, 111.
- Seashore climate, XIV, 552 (U. S. D. A.).
- Seasonal forecasts—
 - for Pacific Coast States, XIII, 117 (U. S. D. A.).
 - notes, XVI, 1056.
- Seasoning materials, effect on yeast fermentation, XXIII, 63.
- Seasons—
 - effect on vertical temperature gradients, XXIII, 311 (U. S. D. A.).
 - relation to precession of equinoxes, XVI, 27.
 - warm and cold, relative duration, XIII, 117 (U. S. D. A.), 118 (U. S. D. A.).
 - wet and dry, in California, XV, 231 (U. S. D. A.).
- Seaweed—
 - analyses, XIII, 1031 (Mass.); XIV, 130 (Can.); XVII, 1143 (Mass.); XVIII, 121 (Can.); XX, 827; XXII, 68; XXIII, 25; XXIV, 227, 625; XXV, 794 (P. R.).
 - ash, preparation of potash salts from, XXI, 122.
 - calcium and magnesium oxids in, XIX, 129.
 - cloth from, XXIV, 337.
 - composition, XX, 732.
 - digestibility, XIII, 977.
 - economic, of Hawaii, XIX, 457 (Hawaii), 492 (Hawaii).

Seaweed—Continued.

- edible, analyses, XX, 777, 964.
- feeding value, XIII, 775, 977.
- fertilizing value, XIII, 332 (Me.), 332 (N. H.); XV, 1054; XVI, 20.
- pentosan content, XIX, 259.
- utilization, XVII, 787; XX, 525.

Secale—

- cereale, analyses, XXV, 272.
- cereale, self-sterility, XIX, 23.
- montanum, notes, XXIV, 136.
- spp., notes, XVIII, 231.

Secchium edule—

- composition and nutritive value, XIV, 378.
- notes, XVI, 465.

Secretary bird, eating of locusts by, XX, 57.**Secretin, studies, XX, 1063.****Secretions, internal—**

- paper on, XXIII, 783.
- products of, XXV, 107.

Security stock food, analyses, XVII, 276 (N. Dak.).**Seed—**

- disease, description, XXIII, 445 (U. S. D. A.).
- hay, analyses, XV, 171 (Can.).

Seeds—

- analyses, XVII, 349 (U. S. D. A.); XXV, 131 (Wyo.).
- as a food for muskrats, XXIII, 357 (U. S. D. A.).
- for matting, culture, XXIII, 233 (Hawaii).
- Nebraska, notes, XX, 368 (Wyo.).
- notes, XIII, 323 (S. Dak.); XVIII, 229 (Wyo.).
- quality as affected by fertilizers, XXI, 132.
- studies, XV, 226.

Sedimentation—

- apparatus for soil analysis, XVI, 228.
- relation to drainage, XVII, 1020.

Sediments, irrigation, effect on crops, XVIII, 427 (Ariz.).**Sedum spectabile, studies, XIX, 529.****Seed—**

Simodactylus cinnamomeus, injurious to cotton, XXII, 58 (Hawaii).

Simulidæ of Kongo, XX, 1147.

Simulids, notes, XXI, 646.

Simulium—

- columbacense in Roumania, studies, XXIII, 664.
- inexorable n. spp., descriptions, XXIII, 664.
- meridionale. (See Turkey gnat.)
- of Brazil, XXIII, 762.
- reptans, notes, XIX, 558.
- spp., in Sudan, XVIII, 477.
- spp., poisoning of cattle by, XXI, 180.
- spp., relation to pellagra, XXIV, 757.
- venustum, remedies, XVI, 683 (N. H.); XXIV, 755.

Sinapis— (See also Mustard.)

- alba, analyses, XXV, 272.
- arvensis, destruction, XXI, 424 (Me.).
- arvensis, studies, XXIII, 732.
- nigra, phosphorus in, XV, 750.
- nigra, poisoning of cows, XIV, 500.
- sinensis, composition and nutritive value, XIV, 378.

Sindora wallichii, oil of, XVII, 1076.

Sinoxylon—

- anale, notes, XIV, 472.
- conigerum, notes, XXII, 59 (Hawaii).
- crassum, notes, XIV, 472.
- senegalense, notes, XXI, 647.
- sp., notes, XXII, 751.

Sipha—

- flava, studies and bibliography, XX, 1051 (U. S. D. A.).
- glycericæ, description, XXIII, 757 (Me.).

Siphanta—

- acuta, notes, XVI, 143 (U. S. D. A.); XVIII, 59.
- notes, XXI, 450.

Siphoniscæ ærodromia n. g. and n. sp., description, XXII, 654.

Siphocoryne avenæ. (See Grain aphid, European.)

Siphona geniculata, viviparity in, XXIII, 365.

Siphonaptera—

- American, monograph, XVI, 487.
- bibliography, XXIV, 161.
- identification, XXII, 56.
- new genus, description, XX, 857.
- noncombed-eyed, revision and bibliography, XX, 1149.
- of San Francisco, Cal., XX, 1149.

Siphonodon australe, notes, XVII, 256.

Siphonophora—

- cerealis, notes, XX, 153.
- citrifolii, notes, XXIII, 362.
- fodiens, notes, XVIII, 59.
- pelargonii, notes, XIX, 659.
- rosæ, notes, XIV, 887; XV, 275, 980.
- rosæ, parasitism, XXIII, 367.
- rosarum, anatomy, XXIV, 164.
- rosarum, anatomy and bibliography, XXI, 757.

Siphonostegia chinensis, parasitism, XX, 1126.

Sires, pure-bred, effect on milk, XXI, 271 (Pa.).

Sirex—

- gigas, notes, XIII, 263; XV, 788.
- habits and life history, XIX, 160.
- juvencus, notes, XIII, 263; XV, 788; XVI, 1096.

Sirup—

- adulteration, XXII, 67 (U. S. D. A.), 566 (U. S. D. A.), 767 (U. S. D. A.); XXIII, 468 (U. S. D. A.); XXV, 64 (U. S. D. A.), 669 (U. S. D. A.).
- industry in United States, XV, 246 (U. S. D. A.).
- misbranding, XXII, 67 (U. S. D. A.), 263 (U. S. D. A.), 566 (U. S. D. A.), 767 (U. S. D. A.); XXIII, 168 (U. S. D. A.), 371 (U. S. D. A.), 468 (U. S. D. A.), 568 (U. S. D. A.); XXV, 64 (U. S. D. A.), 468 (U. S. D. A.), 669 (U. S. D. A.).

Sirups—

- analyses, XIV, 682; XVII, 270 (N. Dak.), 575 (Ark.), 576; XVIII, 565; XX, 511 (N. Dak.), 862, 960 (Conn. State); XXI, 359, 566; XXII, 662 (Conn. State), 766.

determination of—

- degree of Baumé, XIII, 524.
- glucose in, XV, 224.
- moisture in, XIX, 295.

- flavoring, analyses, XV, 283 (Conn. State).

fruit—

- adulteration and misbranding, XXIII, 468 (U. S. D. A.).
- adulteration, detection, XXII, 65.
- crystallization of sugar from, XXII, 614.
- keeping qualities, XXIII, 509 (U. S. D. A.); XXV, 265.
- manufacture and food value, XVIII, 259 (U. S. D. A.).
- manufacture from sugar cane in Georgia, XIV, 711 (U. S. D. A.).
- methods of analysis, XVII, 460 (U. S. D. A.), 529; XIX, 614; XXI, 10; XXIII, 307.
- soda fountain, standards, XXII, 664 (Nev.).
- starch. (*See* Starch sirups.)
- sugar, keeping qualities, XXIII, 509 (U. S. D. A.).

Sisal—

culture—

- and preparation, XIV, 1062; XX, 1031.
- uses, XV, 669 (P. R.).
- in Hawaii, XV, 244 (Hawaii); XVI, 143 (U. S. D. A.).
- Porto Rico, XVIII, 226 (U. S. D. A.); XX, 32 (P. R.).
- fertilizer experiments, XX, 820.
- industry, XIII, 641.
- industry in Hawaii, XXI, 41.
- industry in New South Wales, XXII, 637.

Sisal—Continued.

- leaf-spot disease, studies, XX, 155.
- potash requirements, XX, 221.
- pulp, composition and use, XXIV, 528.

Sisymbrium—

- altissimum, notes, XVII, 240 (N. Dak.); XXII, 638 (Vt.).
- spp., infection experiments, XXIII, 653.

Sisyrinchium micranthum, notes, XV, 1017.

Sisyropa—

- hemerocampæ n. sp., description, XXII, 464.
- new species, notes, XX, 1052 (N. Y. State).

Sitania brevifolium, analyses, XXV, 131 (Wyo.).

- Sitka Station, report, XIII, 125 (U. S. D. A.); XIV, 559 (U. S. D. A.); XV, 132 (U. S. D. A.); XVI, 140 (U. S. D. A.); XVII, 349 (U. S. D. A.).

Sitodrepa panicea—

- injurious to stored tobacco, XXII, 464.
- notes, XIII, 667.

Sitones—

- flavescens, notes, XXI, 454 (Ill.).
- hispidulus, studies, XXII, 758 (U. S. D. A.).
- lineatus, notes, XIII, 968; XIV, 987.

Sitophylus granarius, notes, XVIII, 1144.

Sitotroga cerealella. (*See* Angoumois grain-moth.)

Sitta, composition, XVIII, 217.

Sium—

- cicutæfolium, notes, XV, 161 (N. Dak.), 822 (N. Dak.).
- sisarum, culture and use, XVIII, 39.

Size, manufacture from bone, XIII, 634.

Sizing paste, analyses, XIII, 124 (Mass.); XIV, 649 (Mass.).

Skeleton—

- bug, notes, XX, 756.
- development as affected by lecithin, XIV, 684.
- of domestic horse, variations in, XXIII, 477.

Skim milk—

- analyses, XIII, 82 (Conn. State); XIV, 184 (Mass.); XVI, 599, 913; XX, 370 (Va.); XXI, 414; XXII, 173 (Ohio); XXIII, 281; XXIV, 182.
- bacterial content, XXI, 476.
- buttermilk, manufacture and marketing, XXI, 578 (N. C.).
- buttermilk, notes, XXII, 595 (U. S. D. A.).
- cheese, making, XXI, 478.
- composition, XX, 1075.
- condensed, standards, XXIII, 778 (Ind.); XXIV, 382 (Ind.).
- detection, XX, 274; XXI, 211; XXIII, 12; XXIV, 514.
- device for measuring, XXI, 679.
- digestibility, XIII, 674 (Md.); XXIV, 172.
- dried, for horses, XIX, 1172; XX, 177.

Skim milk—Continued.

food products, XIII, 975.

for calves, XIII, 174 (Nebr.); XIV, 184, 792 (Nebr.), 793 (Mo.); XV, 295, 393, 730 (Kans.), 808 (Miss.); XVI, 498, 1111 (Kans.); XVII, 277 (Miss.), 387 (Idaho), 716 (U. S. D. A.), 894, 904 (Can.); XVIII, 973; XIX, 171, 468, 675, 870 (Va.); XX, 175, 369, 468, 866 (N. C.), 1066; XXI, 669; XXII, 73 (N. Y. Cornell); XXIII, 74 (Wis.).

cows, XVI, 1011 (Conn. Storrs).

pigs, XIII, 1079 (N. Y. Cornell), 1081 (Tenn.); XIV, 793 (Mo.), 1109; XV, 501 (Tenn.), 604 (Del.), 900 (Ariz.), 1103 (Can.); XVI, 85 (Oreg.), 295 (N. Y. Cornell), 692 (N. H.), 1115 (S. Dak.); XVII, 282 (Miss.), 896 (Can.), 896 (Conn. Storrs); XVIII, 71 (Mont.), 264 (Utah), 475; XIX, 171; XX, 370 (Va.), 470, 667 (Mont.), 780; XXI, 369 (Can.), 473, 569; XXII, 271 (Ind.), 575 (Ga.); XXIII, 178 (Minn.), 379 (Can.).

poultry, XIV, 793 (Mo.); XV, 176 (Can.), 177 (Mass.), 1106 (Can.); XVIII, 270 (W. Va.), 469 (Can.).

improvement for baking purposes, XVI, 1017.

manufacture of casein from, XXIV, 614.

methods of analysis, XX, 1108.

pasteurization, XVI, 91 (Wis.), 1123; XIX, 178 (Wis.).

pasteurized, feeding value, XIX, 178 (Wis.).

powdered, analyses, XXIV, 182.

products, utilization, XX, 476.

spread of tuberculosis by, XIX, 79 (Wis.), 979; XXIII, 479.

studies, XX, 1074.

substitutes for calves, XVI, 1111 (Kans.); XXV, 774.

sweet and sour, for pigs, XXIII, 476.

testing, XIV, 289.

use in butter making, XXI, 578 (Md.).

use in ice cream, XXV, 64 (U. S. D. A.).

utilization, XIII, 589; XV, 913; XVI, 1017; XXIV, 68 (U. S. D. A.).

variations in fat content, XV, 505, 506.

Skimming experiments with a balance centrifuge, XVI, 403.

Skin—

disease resembling tuberculosis, XIII, 695.

diseased, leucocytes in, XIX, 180.

diseases in fowls, XV, 1023.

diseases in horses, XIII, 996; XV, 1020.

Skin—Continued.

disinfection, XIV, 391.

excretion of carbon dioxid and water by, XIV, 788.

food, misbranding, XXIII, 568 (U. S. D. A.).

Skins—

infected with anthrax, disinfection, XIX, 383.

of animals, identification, XXI, 347 (U. S. D. A.).

prevention of damage to, XXIV, 379.

sausage, identification of coloring matter in, XXI, 108.

Skirret, culture and use, XVIII, 39.

Skorup, manufacture and use, XXIII, 182.

Skulls—

fossil, cattle, notes, XXI, 571.

identification, XXI, 347 (U. S. D. A.).

Skunks—

destruction of gophers by, XXIII, 154 (U. S. D. A.).

of genus *Chincha*, XIII, 531 (U. S. D. A.).

notes, XX, 1048 (Ohio).

protection, XX, 551 (U. S. D. A.).

revision of genus *Spilogale*, XVIII, 555 (U. S. D. A.).

Sky—

color, research work, XIV, 745.

color, theories, XXI, 113 (U. S. D. A.).

larks, feeding habits, changes in, XIX, 1053.

light, variations in, XVI, 1057.

overcast, studies, XXI, 113 (U. S. D. A.).

polarization, studies and bibliography, XXIV, 16 (U. S. D. A.).

tints, notes, XIX, 212 (U. S. D. A.).

Slag for road construction, XXIII, 489 (U. S. D. A.).

Slate soils of New South Wales, analyses, XXIII, 521.

Slaughterhouse—

by-products, notes, XIX, 1022.

municipal, in Berlin, XVII, 716 (U. S. D. A.).

products, statistics, XIV, 904.

refuse—

as a fertilizer, XVIII, 21.

effect on pork, XXIV, 67 (N. Dak.).

handling and use, XX, 525.

utilization, XIV, 717; XVI, 212.

system in England, treatise, XIX, 1187.

tankage, analyses, XIV, 649 (Conn. State); XV, 663 (Conn. State);

XVI, 658 (Conn. State); XVII, 846 (Conn. State).

Slaughterhouses— (*See also* Abattoirs.)

administration, XVIII, 80.

construction, XVIII, 80.

cooperative in Denmark, XVI, 495; XIX, 882; XXI, 796; XXIV, 394.

Slaughterhouses—Continued.

- hygiene of, XXV, 876.
- improvement in Great Britain, XIX, 675.
- in Australia, XVII, 1112.
- New Zealand, XVI, 1021.
- inspection, XVIII, 80; XXII, 164; XXIII, 65 (U. S. D. A.); XXIV, 666 (N. Dak.).
- inspection in—
 - Cape of Good Hope, XVI, 300.
 - Holland, XVI, 300.
 - Utah, XXV, 166.
 - Virginia, XXIII, 168.
 - Wyoming, XX, 1060.
- laboratories for, XXII, 164.
- public, in Scotland, XXI, 566.
- study of animal anatomy in, XXII, 570.

Slaveholding, economic cost in cotton belt, XVII, 303.

Sleds, dynamometer tests, XIV, 196 (N. H.).

Sleep, loss of, effect on—
 formation of uric acid, XV, 493.
 metabolism, XIV, 788 (U. S. D. A.).

Sleeping sickness—
 auto-agglutination of red blood cells in, XXV, 286.

bibliography, XXI, 255; XXII, 683.
 enumerative method of study, XXIII, 786.

etiology, XXII, 56.
 histological observations on, XX, 789.
 mechanical transmission by flies, XXIV, 756.

notes, XVIII, 987; XX, 765; XXI, 255, 652; XXII, 557.

occurrence in Sénégal, XXV, 782.

prevalence in Uganda, XXII, 581.

prevalence in Zambesi, XX, 1081.

relation to—
 antelopes, XXV, 285.
 cattle and antelopes, XXIV, 586.
 flies, XXII, 56.
 fowls, XXV, 286.

Glossina palpalis, XXV, 260.

review of literature, XX, 789.

studies in German East Africa, XXII, 684.

Sleepy disease of chickens, XVII, 811.

Sleet—
 notes, XIII, 425 (U. S. D. A.).
 storm in Ohio, XXI, 616 (U. S. D. A.).
 weight of, XIX, 10 (U. S. D. A.).

Slime—
 formation in milk, XIX, 778.
 formation, relation to nitrogen fixation, XX, 18.

mold, grass-killing, notes, XVIII, 842.

Slimeflux—
 notes, XIII, 960.
 of trees, studies, XIII, 868.

Slippery elm, notes, XVIII, 1133 (U. S. D. A.).

Sloeberry, postripening investigations, XXII, 704.

Slop—

dried, analyses, XXIV, 369.
 feeding, investigations, XXIV, 71 (U. S. D. A.).

Slough grass—

hay, digestibility, XXII, 71 (S. Dak.).
 notes, XVIII, 229 (Wyo.).

Sludge—

analyses, XIII, 332 (Mass.); XV, 24 (Can.), 26; XXI, 212 (R. I.).
 fertilizing value, XIII, 340 (Can.).
 from filter beds, analyses, XVIII, 220 (Mass.).

Slugs—

injurious to Para rubber, XXIV, 354.
 notes, XV, 547; XVI, 791; XVII, 51; XVIII, 161, 352; XIX, 452 (Md.); XX, 457.
 remedies, XVI, 177; XVII, 1054; XVIII, 651; XIX, 157.

Slum gum, analyses, XXII, 12 (Hawaii).

Small holdings and allotments act in England, XXIII, 693.

Smallpox—

studies, XV, 81.
 transmission by cats, XX, 577.

Smartweed, destruction, XXI, 737 (Iowa).

Smedes area, Miss., soil survey, XV, 658 (U. S. D. A.).

Smegma bacillus, bacilli resembling, XIV, 812.

Smelter—

fumes— (*See also* Fumes.)
 effect on agriculture, XVI, 447 (Utah); XIX, 222, 223.
 effect on plants, XVI, 953 (U. S. D. A.); XX, 627, 831.
 effect on soils, XX, 831.
 wastes, effect on plants and animals, XXIII, 430 (U. S. D. A.).

Smerinthus—

ocellatus, notes, XIX, 352.
 quercus, notes, XIII, 474.

Smicraulax, new genera, description, XXI, 247.

Smilacina stellata, notes, XVI, 508 (Utah).

Smithia microti n. sp., description, XXIII, 393.

Smith's swine plague bacteria, studies, XXII, 788 (Ark.).

Smoke—

as a preventive of frost, XVI, 343.
 disposition, XXIV, 17 (U. S. D. A.).
 effect on—
 climate, XIX, 512.
 forests, XX, 831.
 oats, XXI, 744.
 pine forests, XXIII, 726.
 plants, XIII, 1017; XIV, 633; XXII, 230, 325.
 vegetation, XIII, 527; XXV, 434.
 injuries by, XVII, 198 (U. S. D. A.).
 oven, portable, description, XXI, 490.
 pollution of air by, XXII, 15.
 prevention, XXIV, 312 (U. S. D. A.).
 wood, as a food preservative, XX, 362.

- Smokehouse, beef, description, XXI, 490.
- Smudges, protection of orchards by, XXIII, 144 (U. S. D. A.), 341 (U. S. D. A.), 441 (U. S. D. A.).
- Smut— (*See also* Barley smut, Corn smut, etc.)
 as affected by tannin, XXV, 524.
 effect on forage plants, XIX, 346.
 effect on wheat, XIX, 346.
 grass, culture, XIV, 1059 (La.).
 in fodder plants, toxicity, XX, 379.
 infection, studies, XIX, 446.
 seed treatment, XVI, 851; XVII, 262.
 spores as affected by passage through animals, XXIV, 550.
 spores, quantitative estimation, XVI, 570.
 treatment with formaldehyde, XVIII, 163 (Can.).
- Smuts of—
 Australia, bibliography, XXIV, 46.
 Australia, monograph, XXIV, 45.
 Connecticut, XVII, 374.
 Utah, catalogue, XXIV, 447.
- Smythurus luteus, notes, XVII, 881.
- Snail industry in France, XXII, 76.
- Snails—
 African, notes, XXIV, 751.
 destruction, XVIII, 651; XXV, 687.
 injurious to coffee, XXII, 351.
 intermediate host of liver fluke, XXV, 486.
 manatee, notes, XXIII, 462 (Fla.).
 notes, XVI, 791; XVII, 51; XVIII, 59, 161; XX, 457; XXII, 751.
 remedies, XIX, 157, 858.
- Snake—
 bites, treatment, XVIII, 455; XIX, 781.
 grass, food of, XIV, 167.
 parasites, notes, XXI, 184.
 poisons, XIII, 89.
 worm, notes, XIII, 155.
- Snakeroot—
 Seneca, culture, XVIII, 241 (U. S. D. A.).
 Seneca, culture experiments, XX, 335 (Vt.).
 white, as a cause of animal diseases, XXI, 383.
 white, poisoning of stock by, XIX, 1080 (U. S. D. A.).
- Snakes—
 destruction of gophers by, XXIII, 154 (U. S. D. A.).
 hemogregarines in, notes and bibliography, XXI, 686.
 importation into Hawaii, XVIII, 157 (U. S. D. A.).
 inoculation with tubercle bacilli, XIX, 182.
 of Pennsylvania, XVIII, 651.
- Snapdragon—
 anthracnose on toadflax, notes, XIII, 759 (N. Y. State).
 disease, notes, XXII, 455.
 rust, notes, XV, 53.
- Snapdragons—
 breeding experiments, XIX, 1041 (N. J.); XXII, 140 (N. J.).
 culture, XXIV, 643.
 cut, preservation, XVIII, 44.
 sneezeweed, notes, XV, 303.
- Snout beetles—
 imbricated, notes, XIV, 1093.
 injurious to—
 apples, XXIII, 160 (W. Va.).
 nuts, XXIII, 261 (W. Va.).
 orchards, XXV, 262.
 notes, XVI, 990; XVII, 266 (Miss.); XX, 555; XXI, 653.
- Snow—
 accompanying thunderstorms in Italy, XIII, 1023.
 ammonia in, XIII, 721.
 analyses, XXIV, 519.
 and river floods, XV, 230 (U. S. D. A.).
 as affecting timber lines on mountains, XXI, 546.
 bugs, notes, XIX, 452 (Md.).
 colored, XIII, 827 (U. S. D. A.).
 composition as affected by meteorological factors, XVII, 532.
 conservation as affected by trees, XXI, 15 (Nev.).
 conservation by forest cover, XXI, 638.
 contamination of, XXIV, 519.
 crystals—
 evolution, XVII, 115.
 notes, XIII, 118 (U. S. D. A.); XVII, 222 (U. S. D. A.), 735 (U. S. D. A.).
 studies, XIII, 425 (U. S. D. A.), 828; XIV, 947 (U. S. D. A.).
 transformation, XXI, 113 (U. S. D. A.).
 depth and distribution, relation to climate, XXV, 116.
 diurnal exchange of heat in, XXIII, 15.
 early, in Alaska, XVII, 735 (U. S. D. A.).
 effect on—
 egg production, XVIII, 975 (Conn. Storrs).
 gipsy moth eggs, XXIII, 560.
 soil temperatures, XXII, 21.
 soot content of air, XXI, 302.
 fertilizing value, XX, 15; XXI, 308 (Can.); XXII, 316 (Can.); XXIV, 417 (Can.); XXV, 719.
 for poultry, XIX, 592 (U. S. D. A.).
 formation, XVI, 237 (U. S. D. A.); XVII, 1042 (U. S. D. A.).
 formation of timber lines by, XX, 242.
 heat exchange in, XIX, 710 (U. S. D. A.).
 in summer, paper on, XXV, 717 (U. S. D. A.).
 measurements as affected by wind, XIX, 512.
 mildew, notes, XIV, 263.
 nitrate content, XXV, 17.

Snow—Continued.

- nitrogen content, XV, 456; XXIII, 220; XXV, 509, 812.
 radioactivity of, XIV, 845 (U. S. D. A.); XIX, 713.
 red, in Michigan, XXI, 616 (U. S. D. A.).
 relation to—
 halos, XIX, 212 (U. S. D. A.).
 summer water supply, XXV, 418 (U. S. D. A.), 421 (U. S. D. A.).
 wheat maturity, XXIII, 631 (Alaska).
 rollers, notes, XVIII, 525 (U. S. D. A.), 526 (U. S. D. A.), 1109 (U. S. D. A.).
 specific gravity, XIX, 916 (U. S. D. A.); XXI, 616 (U. S. D. A.).
 water equivalent, XV, 230 (U. S. D. A.); XXI, 616 (U. S. D. A.).
 yellow, in Michigan, XIV, 16 (U. S. D. A.).
 Snowball louse, description, XXI, 649.
 Snowballs, forcing, with ether, XV, 775, 972; XVI, 268; XVIII, 639.
 Snowdrop disease, notes, XIV, 62.
 Snowdrops, carbohydrates of, studies, XXI, 319.
 Snowfall—
 and water equivalent, XVII, 11 (U. S. D. A.).
 apparatus for measuring, XXIV, 415 (Nev.).
 at Summit, Cal., XXIII, 617 (U. S. D. A.).
 catchment of, XXIII, 617 (U. S. D. A.).

 measuring, XXV, 417 (U. S. D. A.), 717 (U. S. D. A.).
 mountain, observations, XXV, 508 (U. S. D. A.).
 protection of crops from, XXV, 618.
 water equivalent, XIII, 425 (U. S. D. A.).
 Snowiellus, comparative studies, XXIV, 61.
 Snowsterm—
 At Grand Haven, Mich., XX, 1012 (U. S. D. A.).
 Christmas, 1906, XIX, 915 (U. S. D. A.).
 in Great Britain, XIX, 712.
 Snowstorms, dissipation by cannonading, XVI, 751.
 Snowy tree cricket, notes, XIV, 63 (Conn. State); XVII, 879 (U. S. D. A.).
 Snuff, statistics, XX, 640.

Soap—

- analyses, XIII, 1014 (Can.).
 as an insecticide, XIV, 63 (Conn. State).
 detection in bakers' goods, XIX, 458.
 determination in zwieback, XIX, 308.
 making, use of soy beans in, XXI, 733.
 manufacture from Kafr corn, XXIV, 464.
 methods of analysis, XXIV, 410.
 methods of examination, XIX, 1008 (U. S. D. A.).
 mixtures, preparation, XX, 164.
 napha, as a disinfectant, XXII, 393.
 notes, XIV, 267 (Cal.).
 olive, analyses, XVI, 949 (Cal.).
 resorption in intestines, XIII, 378.
 soft, methods of analysis, XIV, 889.
 solution, effect on soil bacteria, XIX, 625.
 trees in Florida, XVIII, 840.
 trees, notes, XVIII, 943.
 wash, preparation, XX, 255.
 washes, use, XVII, 1169.
 Soaps—
 bactericidal value, XIV, 819.
 commercial, composition, XVI, 796 (N. Y. State).
 disinfecting power, XVI, 98.
 manufacture, manual, XVIII, 476.
 preparation and use, XVIII, 455 (U. S. D. A.).
 Soapweed, ash analyses, XV, 13 (N. Mex.).
 Social—
 betterment in District of Columbia, XXI, 364.
 reform, treatise, XXII, 168.
 science, instruction in, XV, 548.
 Socialism, relation to agriculture in Italy, XXI, 293.
 Societies, miscellaneous, in Ireland, XXIII, 795.
 Society—
 for Horticultural Science, XV, 108, 207, 538, 682; XVI, 729; XVII, 616, 665, 868, 1125.
 Promotion of Agricultural Science, XIII, 396; XV, 542; XVI, 422, 621; XX, 1099; XXIV, 1, 194.
 of American Bacteriologists, XX, 495.
 Official Horticultural Inspectors, XIII, 496; XIV, 512.
 Southern Industrial Classes, report, XIX, 592.
 Sociology, rural, course in, XVII, 410 (U. S. D. A.), 1199.
 Sod—
 evaporation from, XIII, 428; XXIV, 317.
 mulch, effect on apples, XXI, 239 (N. Y. State).
 Soda—
 analyses, XXI, 463 (Me.).
 as a plant food, XXI, 212 (R. I.).
 assimilation by plants, XVII, 953; XVIII, 322, 1108.

Soda—Continued.

Bordeaux—

- chemical changes in, XXII, 456.
- effect on grape flowers, XXI, 52.
- effect on grapes, XX, 649.
- modified, notes, XXV, 354.
- preparation and use, XX, 951.

caustic, as a digestion reagent, XXIII, 73.

caustic, effect on fruit trees, XXI, 561.

copper sulphate, method of action, XXIII, 253.

determination in feldspar, XIX, 408.

disinfecting properties, XIII, 1020 (Md.).

effect on—

- growth of sugar beets, XX, 1018.
- micro-organisms and ferments, XX, 627.

plants, XXI, 316.

fertilizing value, XXII, 223.

fountain products, examination, XXIV, 667.

fountain sirups, standards, XXII, 664 (Nev.).

fungicides, crystallization of, XVII, 570.

lime, methods of analysis, XIX, 296.

lye, analyses, XVII, 425.

lyes, composition, XV, 747.

substitution for potash, XIII, 121 (N. Y. State), 539, 1030; XIV, 648, 851.

utilization by root crops, XVI, 556.

wash emulsion, preparation, XX, 457.

water—

- analyses, XVII, 575 (Ark.); XXI, 165 (Me.), 462.

determination of dirt in, XXV, 769.

inspection, XXIII, 567 (Me.).

Söderbaum, H. G., biographical sketch, XVIII, 10.

Sodic aluminic sulphate, adulteration, XXV, 769 (U. S. D. A.).

Sodium—

acetate, effect on peaches, XXIII, 164 (U. S. D. A.).

aluminate, effect on eggs, XXV, 678.

and copper sulphates, solubility of mixture, XIV, 164.

potassium, relation in soils, XVIII, 321.

potassium, similarity in behavior, XXI, 627.

arsenate, analyses, XXII, 365 (Can.); XXIII, 367 (Can.).

arsenicals, effect on vegetation, XXII, 235 (Mass.).

arsenite—

- analyses, XXI, 414 (N. Dak.).
- as a cattle dip, XIX, 684.
- effect on apples, XXV, 550.

benzoate—

antiseptic value, XVI, 915.

as a catsup preservative, XX, 861 (U. S. D. A.).

meat preservative, XVIII, 565.

Sodium—Continued.

benzoate—continued.

- as a milk preservative, XIX, 178.
- preservative, XXI, 767; XXII, 569.

chemistry of, in man, XXII, 771.

decision concerning, XX, 863 (U. S. D. A.).

detection in meat, XIX, 308.

determination in catsups, XXII, 112.

determination in jams and codfish, XXIV, 198.

effect on digestion, XIX, 179.

effect on human organism, XXIII, 669.

effect on meat, XX, 658.

effect on metabolism, XX, 361 (U. S. D. A.), 464 (U. S. D. A.); XXI, 257 (U. S. D. A.).

notes, XXI, 463 (Me.).

use in food products, XXIV, 264 (new).

physiological effects, XXII, 570.

bicarbonate—

absorption in large intestine, XXI, 265.

cafein, and acetanilid, separation, XX, 397.

effect on metabolism, XVI, 294.

effect on nitrogen excretion, XVIII, 661.

bisulphate, effect on solubility of phosphates, XXV, 631.

β -naphthol as a milk preservative, XIX, 178.

bromid, effect on—

germination and growth of plants, XIV, 28.

plant growth, XIII, 335.

carbonate—

- analyses, XIII, 713 (R. I.); XVII, 847 (R. I.); XXI, 212 (R. I.).

and oxalate, use in acidimetry, XVII, 10.

determination, XIII, 615.

carbonate, effect on—

capillarity of soils, XXV, 824.

germination and growth of wheat, XIV, 945.

nitrogen fixation, XXII, 427.

root curvatures, XXV, 633.

solubility of lead arsenate, XXIII, 164 (U. S. D. A.).

carbonate—

fertilizing value, XX, 727.

formation by plants, XIII, 330, 919 (U. S. D. A.).

formation in animals, XIII, 521 (Conn. State).

casein, absorption in the large intestine, XXI, 265.

chlorate, effect on germination and growth of wheat, XIV, 945.

Sodium—Continued.

- chlorid. (*See* Salt.)
- cinnamate, effect on rabbits, XIX, 1182.
- citrate, effect on—
 - coagulation, XIII, 178.
 - milk, XVIII, 369.
 - nitrate formation in soils, XXIII, 621.
 - nitrogen excretion, XVIII, 661.
- cyanid, absorption by plants, XXV, 433.
- cyanid, fumigation, XXIII, 367; XXV, 363 (U. S. D. A.).
- determination—
 - as pyrosulphate, XIV, 6.
 - in silicates, XIX, 1109; XX, 417.
 - soils, XVII, 731.
 - urine, XVI, 1050.
- effect on—
 - composition of plants, XXI, 212 (R. I.).
 - excretion of ammonia, XVI, 289.
 - formation of tissues, XX, 664.
 - growth of bone, XVI, 1005.
 - growth of cereals, XXI, 224 (R. I.).
 - plants, XXIII, 328.
 - sugar beets, XX, 232.
 - wheat seedlings, XX, 124 (R. I.), 125 (R. I.); XXIII, 28.
- fertilizing value, XVI, 32 (R. I.).
- fluorid—
 - as a butter preservative, XV, 1004; XVI, 1017.
 - milk preservative, XVII, 397; XIX, 178.
- effect on milk coagulation, XIX, 777.
- effect on plants, XVI, 20; XVIII, 434; XIX, 831.
- effect on wheat, XIX, 324.
- fertilizing value, XX, 431.
- hydrate, determination, XIII, 615.
- hydrate, effect on hemolytic serums, XXV, 180.
- hydroxid, effect on—
 - activity of yeast, XIX, 127.
 - casein, XXIII, 510.
 - digestibility of wheat straw, XIX, 771.
 - rennin, XIX, 777.
- hydroxid, preparation for laboratory use, XVI, 639.
- in river and rain water, XXI, 712.
- iodid—
 - determination in animal tissues, XXIV, 703.
 - effect on germination and growth of plants, XIV, 28.
 - effect on plant growth, XIII, 335.
- losses from soils, XXIII, 520.
- metabolism, XVII, 1000.
- methods of analysis, XXII, 8.
- nitrate. (*See* Nitrate of soda.)

Sodium—Continued.

- nitrite—
 - determination, XVIII, 109.
 - fertilizing value, XVIII, 923.
 - nitrification, XVII, 119.
- nitro-prussid, effect on plants, XVI, 952.
- oleate, effect on viruses, XXV, 283.
- oxalate, use in volumetric analysis, XV, 337.
- perchlorate, determination in nitrate of soda, XV, 1052.
- perchlorate, effect on plants, XV, 567.
- peroxid, detection in foods, XXV, 569.
- peroxid, use in analytical work, XVI, 536, 639.
- phosphate, effect on—
 - barnyard manure, XXI, 720.
 - calcium phosphate, XXIV, 25.
 - composition of milk, XVI, 1010; XX, 1177.
 - eggs, XXV, 678.
 - meat, XX, 658.
 - respiration in plants, XXII, 629.
 - transpiration of plants, XXII, 721.
- phosphate for pigs, XXII, 772 (Mo.), 772 (Ohio).
- phosphatid compounds, occurrence in body tissues, XXV, 271.
- picrate for the detection of potassium, XIII, 711.
- protection to plants and animals by, XX, 527.
- salicylate, absorption by milk, XX, 975.
- salicylate as a milk preservative, XVII, 397.
- salts—
 - agricultural value, XVII, 345 (R. I.); XVIII, 1113 (R. I.).
 - as affected by calcium sulphate, XIX, 526 (U. S. D. A.).
 - deposits in Egypt, XVIII, 324.
 - destruction of weeds by, XXI, 737 (Iowa).
- salts, effect on—
 - animals, XX, 1121.
 - Bacillus subtilis*, XXII, 531.
 - barley and rye, XVII, 652.
 - grasses, XXI, 128.
 - liver fluke, XXV, 687.
 - milk, XVIII, 1078.
 - milk coagulation, XIX, 777.
 - plants, XVII, 544, 232 (R. I.); XVIII, 1115 (R. I.); XIX, 526 (U. S. D. A.); XX, 1121; XXIV, 135.
 - rennet, XXI, 76.
 - root curvatures, XXV, 633.
 - rotation of sugars, XIII, 523.
 - seedling plants, XIII, 918 (U. S. D. A.).
 - soils, XIX, 719; XX, 1017 (U. S. D. A.).
 - solubility of potash, XXI, 715 (N. H.).
 - sugar cane, XVI, 662.

Sodium—Continued.

- salts, reaction with soils, XXI, 713 (N. H.).
- salts, resorption as affected by pressure, XIX, 180.
- selenate, effect on plants, XXIII, 629; XXV, 433.
- silicate, analyses, XVIII, 1150.
- silicate, effect on soil productivity, XXIII, 320.
- substitution for potash, XVI, 36; XVII, 232 (R. I.).
- sulphate—

- and carbonate mixture, effect on concrete, XX, 886 (Colo.).
- effect on iron phosphate, XXIV, 25.
- fertilizing value, XIX, 625 (Ind.); XXIV, 323.

sulphid, effect on vegetation, XXII, 235 (Mass.).

sulphite—

- as a meat preservative, XVIII, 565; XXIII, 166.
- milk preservative, XIX, 178.
- detection in presence of sodium salts, XXII, 707.
- determination, XVI, 897 (N. Dak.); XVII, 270 (N. Dak.).
- effect on coagulation of milk, XIII, 387.
- effect on metabolism, XXI, 260.
- effect on tadpoles, XVI, 901.
- excretion by dogs, XVI, 901.
- physiological effects, XVI, 901; XIX, 668 (U. S. D. A.).
- use in chopped meat, XXII, 565.
- use in sugar manufacture, XXIII, 311.

thiosulphate as a meat preservative, XVIII, 565.

urate, absorption by plants, XXV, 433.

urate, behavior in soils, XVI, 240.

zeolite, effect on plant growth, XXIII, 528.

Soft—

drinks—

- adulteration and misbranding, XXIV, 764 (U. S. D. A.); XXV, 368 (U. S. D. A.), 769 (U. S. D. A.).
- examination, XXV, 165.
- manufacture, XXV, 416.
- methods of analysis, XXIV, 199.

scale—

- destruction, XXI, 649, 650.
- notes, XXIII, 362; XXV, 656.
- synonymy, XXII, 753.

Soil—

acidity—

- as affected by superphosphate, XXI, 223 (Ohio).
- as affected by various salts, XXIII, 320.
- correction, XXIII, 129 (W. Va.), 137 (Oreg.).

Soil—Continued.

acidity—continued.

- detection, XXI, 703.
- determination, XVI, 14; XX, 308, 309, 704; XXI, 107; XXII, 124; XXIII, 11, 715; XXIV, 135, 197; XXV, 423, 525.
- effect on legume inoculation, XXIV, 222 (U. S. D. A.).
- effect on plants, XVII, 431; XXIII, 226.
- notes, XIV, 111, 418; XIX, 194 (U. S. D. A.); XX, 117.
- relation to nitrification, XXIII, 716 (Va. Truck).
- relation to productiveness, XXV, 724.
- studies, XV, 434; XVI, 252, 325.
- testing, XXIII, 523.

air—

- composition, XX, 817.
- factors affecting carbon dioxide content, XXV, 621.
- radio-active emanations in, XX, 817.

amendments, analyses, XVII, 10; XVIII, 10.

amendments, tests, XXV, 427.

analyses—

- as a guide to use of fertilizers, XV, 625 (Ohio); XVI, 756.
- by means of plants, XVI, 552, 858.
- definition of terms, XX, 916.
- interpretation for farmers, XVII, 939.
- interpretation regarding phosphoric acid, XXIII, 508 (U. S. D. A.).
- relation to forestry, XX, 618.
- sedimentation apparatus for, XVI, 228.
- studies, XXIII, 301, 302, 714.
- unification, XVIII, 415; XXIII, 416.
- value in intensive agriculture, XXIII, 314.
- value of, XV, 127; XVI, 28, 638; XVII, 944; XVIII, 321; XIX, 818 (Mass.); XXI, 718; XXIV, 713 (Mass.).
- variations in, XXI, 198.

bacteria as affected by—

- carbon bisulphid, XVIII, 533; XIX, 420, 625.
- cultivation, XXII, 21 (Kans.).
- lime, XX, 222; XXI, 417; XXIII, 231.
- manure, XIX, 421, 422.
- sterilization, XXI, 417.
- various substances, XIX, 625; 828 (N. J.); XXII, 120 (N. J.).

bacteria—

- conditions favoring development, XVI, 858.
- culture experiments, XXIV, 140.
- denitrifying, notes, XIII, 632.
- descriptions, XIII, 622.

Soil—Continued.

bacteria, effect on—

- lime nitrogen, XX, 924.
- metals, XXIII, 318, 422.
- nitrogenous decomposition, XVIII, 1026 (Wis.).
- phosphates, XX, 221 (Mich.), 222 (Mich.).

- gallinarum, notes, XVIII, 385.
- gallinarum, studies, XXV, 83.
- in cattle affected with Texas fever, XV, 303.
- new, in monkeys, XXII, 581.
- of fowls, XVII, 1018.
- paravum, notes, XVIII, 1166.
- tschichir, notes, XV, 1127.

Spirits—

- analyses, XX, 863.
- composition, XIV, 524.
- definitions, XXII, 765.
- drinking, report on, XXII, 667, 764.
- extraction from raisins, XXII, 416; XXIII, 711.
- statistics, XXI, 426.

Spirochaeta—

- anodontæ n. sp., description, XVIII, 681.
- anserina, notes, XV, 1023; XXII, 392.
- balbianii, studies, XXII, 790.
- biological position, XXI, 580.
- bovis cafferis n. sp., description, XXIV, 161.
- classification, XIX, 379.
- duttoni—
 - culture experiments, XXI, 388.
 - life history, XX, 1087.
 - organism resembling, XXII, 581; XXV, 586.
 - transmission, XXV, 782.
 - transmission in ticks, XXII, 387.
- eberthi, notes, XXII, 82.
- equi, organism resembling, XXIV, 385.
- gallinarum—
 - immobilization by procyanase, XXIII, 483.
 - morphology, XX, 483.
 - notes, XIX, 888; XX, 883, 1191.
 - organism resembling, XXII, 490.
 - studies, XXII, 189; XXIII, 188, 392.
 - transmission by *Argas* spp., XX, 685, 1154.
- granulosa penetrans, notes, XXV, 788.
- n. spp., descriptions, XXIV, 685.
- pertenuis, notes, XXV, 584.

Spirochaeta—Continued.

- pinnae, notes, XXI, 580.
 - pitheci n. sp., description, XXII, 581.
 - sp. as a cause of disease in pigs, XVIII, 678.
 - spp., behavior in *Acanthia lectularia*, XX, 1192.
 - spp., modes of division, XXII, 281.
 - spp., notes, XXI, 764; XXII, 189.
 - spp., transmission, XXIII, 162.
 - theileri, notes, XXII, 785.
 - theileri, occurrence in South Africa, XXIV, 83.
 - ziemanni, life history, XV, 1131.
- Spirochalcis** sp., notes, XXI, 559.
- Spirochetes**—
- division in, XXI, 793.
 - immobilization by procyanase, XXIII, 483.
 - in blood of chickens, XX, 483.
 - gastro-enteritis of dogs, XXIII, 792.
 - lesions in pigs, XXIII, 790.
 - notes, XXI, 256.
 - relation to other organisms, XX, 789.
 - treatise and bibliography, XXV, 859.

Spirochetosis—

- in fowls—
 - notes, XX, 89, 386, 883, 1191; XXI, 386; XXII, 189, 392, 490, 783; XXV, 186, 591.
 - studies, XXIII, 188, 392; XXV, 788.
 - treatment, XXIV, 187.
- in geese, studies, XXV, 282.
- geese, treatment, XXIV, 781.
- man and animals, XXI, 161.
- pathogenic, in horses, XXIV, 386.
- prevalence in India, XIX, 578.
- prevalence in South Annam, XXII, 785.
- rôle of infective granule in, XXV, 881.

Spirogyra—

- as affected by—
 - aluminum salts, XX, 929.
 - dicyandiamid, XX, 1020.
- fungi affecting, XXII, 249.

Spiroptera—

- as a cause of—
 - stomach lesions, XIX, 581.
 - tumors in horses, XIX, 83.
- megastoma, notes, XVII, 597; XXI, 791.
- reticulata in cattle, XXIII, 86.
- sanguinolenta in dogs, XVII, 917.
- strongylina, notes, XXII, 789.
- strongylina, occurrence in United States, XXV, 186.

Spittle insect, notes, XIII, 667, 1063.**Spleen**—

- abscesses of, XVIII, 774.
- edibility, XIX, 459; XX, 770.
- effect of removal on assimilation of nitrogen, XIV, 791.
- enzym, proteolytic, XVII, 486.
- function in digestion, XIII, 167.
- iron content, XXII, 372.

Spleen—Continued.

morphological changes in, XX, 183.

proteolytic enzymes in, XV, 995.

relation to iron metabolism, XXIV, 572.

rôle of, in trypanosome diseases, XIX, 478, 578.

Splenectomy, effect in tuberculosis, XVII, 82.

Splenic fever, prevalence in Jamaica, XXII, 583.

Splints in horses, XIX, 283.

Splitworms, injurious to tobacco, XX, 762; XXII, 464.

Spodoptera mauritia, notes, XXII, 458 (Hawaii); XXIII, 254 (Hawaii); XXV, 154, 357.

Spondias—

analyses, XVII, 788.

axillaris, notes, XXII, 236 (P. R.).

lutea, culture in Hawaii, XX, 143 (Hawaii).

Spondylitis, tuberculous, in cattle, XVII, 910.

Spondylocadium atrovirens, notes, XVIII, 450; XIX, 46, 851; XX, 51 (Conn. State), 1043; XXI, 243; XXII, 149.

Sponges, literature in 1900, XVI, 853.

Spongopora—

scabies, notes, XX, 649, 1043; XXII, 346.

scabies, studies, XXIII, 548, 646.

solani, notes, XIX, 46; XX, 450.

subterranea, history, XXII, 746.

subterranea, studies, XXII, 149, 746; XXIV, 742; XXV, 348.

Spontaneous combustion—

by bacteria, XX, 864.

of alfalfa hay, XIV, 176 (Kans.).

Spore formation, relation to oxygen fixation, XXIV, 32.

Spores—

chemical action of, XVIII, 827.

determination in tomato catsup, XXIV, 613 (U. S. D. A.).

microscopic, dissemination in the air, XXV, 143, 347.

quantitative estimation, XVI, 570.

Sporidesmium—

cavernarum n. sp., description, XVIII, 651.

exitiosum, notes, XIV, 980.

putrefaciens, notes, XXI, 147.

scorzonera n. sp., description, XV, 270.

solani varians n. var., notes, XVI, 478; XXII, 346.

Sporobolus—

airoides as a forage plant, XXIII, 634 (Ariz.).

airoides, ash analyses, XV, 13 (N. Mex.).

brevifolius, notes, XVIII, 229 (Wyo.).

cryptandrus, notes, XIII, 731 (U. S. D. A.).

indicus, analyses, XV, 67; XXIV, 769.

spp., analyses, XXV, 131 (Wyo.).

Sporobolus—Continued.

strictus, notes, XIII, 731 (U. S. D. A.).

wrightii, notes, XIII, 731 (U. S. D. A.).

Sporomyxa scauri n. g. and n. sp., description, XIX, 963; XX, 1154.

Sporonema, new species, descriptions, XIX, 446.

Sporothrix, studies, XXIV, 86.

Sporotrichosis—

in horses, XXI, 791.

man and horses, XXIV, 781.

Sporotrichum—

anthophilum, notes, XIX, 855 (Nebr.).

globuliferum—

destruction of Lecanium spp. by, XXI, 649, 650.

(entomophilum), notes, XX, 1048 (Conn. State).

notes, XIII, 870 (U. S. D. A.), 1068; XXV, 562 (Ohio).

parasitic on chinch bug, XXII, 655 (Kans.).

poae, notes, XX, 648 (N. Y. State). 1051.

sp., affecting grasshoppers, XIV, 374 (U. S. D. A.).

sp., injurious to white fly, XXIII, 462 (Fla.).

sp., parasitic on hemispherical scale, XXV, 254 (P. R.).

Sporozoa, parasitic, treatise, XX, 788.

Spots and stains, removal, XXII, 470.

Spotted—

blister beetle, notes, XX, 351 (Mont.).

fever, Rocky Mountain—

cause and treatment, XXII, 682.

distribution of tick, XXV, 59 (U. S. D. A.).

in rabbits, XXI, 582.

investigations, XXII, 785.

relation to typhus fever, XXII, 284.

studies, XX, 985.

transmission, XXI, 280; XXIV, 781; XXV, 161, 756 (U. S. D. A.).

kidney in calves, XIII, 94; XV, 1012.

root fly, notes, XX, 257 (U. S. D. A.).

Sprains, incurable, of tendons, tenotomy, XX, 986.

Sprat oil, chemical studies, XV, 955.

Sprats—

identification, XVI, 184.

smoking and canning, XVI, 184.

Sprayers—

horseback, for fruit growers, description, XXIII, 554.

knapsack, notes, XVII, 676.

power, demonstration, XVI, 798 (Ill.).

Spraying—

apparatus—

as affected by alkaline polysulphids, XVIII, 1058; XXIII, 554.

cost data, XXIV, 450.

Spraying—Continued.

apparatus—continued.

- dealers and manufacturers, XXII, 260 (Ala. College).

 - germination of seeds, XVIII, 136; XXI, 242.
 - growth of fungi, XVIII, 542.
 - plants, XXIII, 526 (Mo.); XXIV, 630.
 - seeds, XIII, 754.
 - solubility of soil carbonates, XIX, 819 (U. S. D. A.).
 - for fumigation, XXI, 355 (U. S. D. A.).
 - in milk, XVII, 695; XVIII, 474; XXIV, 13.
 - moor soils, XXV, 118.
 - methods of analysis, XXII, 9.
 - production in sugar products, XXII, 512.
 - production in United States, XX, 826.
 - standardization, XIV, 837 (S. C.); XVI, 1049.
 - tables for, XXIII, 523.
 - toxic properties, XXI, 340.

Sulphurous acid—

- absorption by meat, XVII, 1177.
- as a manure preservative, XXIII, 125.
- meat preservative, XXIII, 166.
- conversion into sulphuric acid, XXII, 312.
- detection in lime juice, XXII, 307.
- detection in meat, XXI, 704.
- determination, XXIV, 198.
- determination in—
 - air, apparatus for, XXI, 108.
 - chopped meat, XXIV, 409.
 - foods, XVII, 833; XX, 398; XXI, 11.

Sulphurous acid—Continued.

- determination in—continued.
 - gelatin, XXI, 704.
 - lime juice, XXII, 307.
 - meats, XVII, 1040; XVIII, 1148.
 - molasses, XIX, 296.
 - wine, XXI, 11, 305; XXII, 307; XXIV, 309; XXV, 206.
- effect on—
 - digestion, XVII, 1189; XVIII, 565.
 - gluten, XX, 907.
 - organisms in wine, XVIII, 772.
 - plants, XV, 340; XVI, 952; XX, 831; XXI, 219.
 - soils, XXI, 219.
 - urine, XVII, 1189.
- excretion by man, XX, 566; XXI, 665.
- for bleaching fruits and grain, XVI, 328.
- in beer, XXII, 66.
 - champagne, XXIII, 114.
 - cooked fruit, XX, 1162.
 - dried fruit, XX, 660.
 - foods, XIV, 894; XVI, 900; XX, 66.
 - organic compounds, XVI, 289.
 - wine making, XVI, 446 (Cal.); XVIII, 374, 772; XIX, 980; XX, 980.
- physiological effects, XVI, 901; XIX, 668 (U. S. D. A.), 969 (U. S. D. A.).
- studies, XVI, 1104.
- use in chopped meat, XXII, 564.

Sumac—

- adulteration, XIX, 129.
- as a pepper adulterant, XXI, 10.
 - affected by longitudinal compression, XXIII, 130.
- canker, notes, XIV, 582.
- culture and marketing, XX, 512 (U. S. D. A.).
- leaves, effect on soils, XXIII, 623.
- low, value in plant breeding, XVIII, 637.
- seed chalcis, notes, XXI, 351 (N. Y. Cornell).
- Sicilian, analyses, XX, 512 (U. S. D. A.).

Summer—

- drinks, examination, XXII, 263.
- fallowing, advantages, XV, 126 (Can.).
- fallowing, notes, XIV, 128 (Can.).
- resorts, sanitation in, XXIV, 519.
- sore, treatment, XXV, 386.

Sumter County—

- Ala., soil survey, XVII, 740 (U. S. D. A.).
- S. C., soil survey, XXI, 618 (U. S. D. A.).

Sun—

- effect on plant growth, XVII, 440.
- relation to climate, XX, 421.
- researches on temperature of, XXI, 113 (U. S. D. A.).
- spots and leafing and flowering of trees, XVII, 224.
- spots, frequency, XIV, 552 (U. S. D. A.).

Sun—Continued.

- spots, relation to—
 - atmospheric temperatures, XV, 560 (U. S. D. A.).
 - meteorology, XIV, 552 (U. S. D. A.); XV, 655.
 - rainfall, XV, 19; XVI, 751; XVIII, 528; XIX, 712.
 - temperature, XIII, 627; XXI, 15.
 - weather, XIII, 426 (U. S. D. A.), 828 (U. S. D. A.); XV, 560 (U. S. D. A.), 856 (U. S. D. A.); XX, 709.
 - winds, XIV, 338.

- spots, relative numbers, XIV, 552 (U. S. D. A.).
- total eclipse, Aug. 30, 1905, XVII, 222 (U. S. D. A.).
- variable action, XVII, 637 (U. S. D. A.).

Sunflower—

- leaves, assimilation, studies, XXIV, 30.
- roots as affected by pressure, XXI, 728.
- roots, distribution, XX, 732.
- rust, culture experiments, XVI, 787.
- rust, investigations, XVI, 274 (U. S. D. A.).
- seed cake—
 - analyses, XIV, 596; XXI, 471, 777; XXV, 272.
 - effect on milk, XX, 1175.
 - for cows, XX, 572; XXII, 477.
- seed meal, analyses, XXV, 871.
- seed oil, analyses, XV, 223; XVII, 889.
- seeds—
 - analyses, XX, 468; XXI, 525; XXV, 272.
 - composition, XIII, 378 (N. H.).
 - germination, XX, 927; XXIV, 628.
 - lime and magnesia in, XXI, 30.
 - proteolytic changes in, XX, 828.

Sunflowers—

- analyses, XXV, 272.
- analyses and digestibility, XXIII, 72 (Nev.).
- as a shade for poultry, XV, 178 (Mont.).
- source of potash, XX, 24.
- as affected by—
 - iron sulphite, XXI, 436 (S. Dak.), 737 (Iowa).
 - longitudinal compression, XXIII, 130.
 - tension, XIX, 23; XXI, 318.
 - wind, XXI, 318.
- assimilation investigations, XXI, 319.
- breeding experiments, XXI, 28, 543.
- chemotropism of roots, XXV, 632.
- chlorophyll production by, XIX, 930.
- culture, XIII, 847; XXI, 332.
- culture—
 - composition, and uses, XIII, 45 (U. S. D. A.).
 - experiments, XIII, 732 (Pa.); XIV, 29, 132 (Can.); XVII, 36 (Mich.), 854 (Can.).

Sunflowers—Continued.

- culture—continued.
 - in Russia, XXIII, 439.
 - on Hunger Steppe, XXIII, 534.
 - sewage fields, XVIII, 436.
- dead, elimination of carbon dioxide by, XX, 830.
- formation of organic matter in, XXV, 126.
- formation of starch in, XXI, 727.
- germination as affected by manure, XXI, 737 (Iowa).
- grafting, XVII, 563.
- growth as affected by—
 - mushrooms, XVIII, 827 (N. Y. Cornell).
 - mutilation, XVII, 540 (Mass.).
- notes, XVI, 1068 (Can.).
- origin of chloroplasts in, XXV, 524.
- varieties, XIII, 1034 (Can.); XV, 28 (Can.), 1068 (Can.); XVII, 853 (Can.); XIX, 1132 (Can.); XXI, 327 (Can.); XXIII, 334 (Can.); XXV, 529 (Can.).
- water requirements, XXV, 127.

Sunlight—

- and drying, use in disinfection, XXV, 491.
- as affected by foliage, XXIII, 724.
- bleaching effect on flour, XXIV, 466 (Can.).
- effect on—
 - bacteria, XIV, 334; XIX, 78, 280.
 - carbon dioxide assimilation by plants, XXII, 28.
 - color changes in flowers, XXI, 319.
 - gaseous exchange in man, XIV, 478.
 - germination of pollen, XXII, 527 (Wis.).
 - germination of seed, XIV, 577, 975.
 - lice, XXIII, 589.
 - nitrate, XX, 218.
 - olive oil, XIX, 509.
 - plant growth, XVIII, 527.
 - soils, XXIII, 123.
 - sugar content of beets, XXI, 735.
 - tubercle bacilli, XXII, 786.
 - water requirements of crops, XXIII, 331.
- fertilizing value, XXIII, 222, 318, 523.
- pressure of, XVI, 237 (U. S. D. A.).
- Sunn hemp as a green manure, XXIII, 124.
- Sun's radiation, effect on earth's temperature, XX, 211.
- Sunset, green ray, XVII, 637 (U. S. D. A.).
- Sunshine—
 - at Aas Agricultural College, XVII, 116.
 - effect on—
 - cotton development, XX, 911.
 - plants, XIV, 739.
 - setting of fruits, XX, 41 (N. Y. State), 642 (N. Y. State).
 - in British Isles, XVIII, 914.
 - Colorado, XIII, 598 (Colo.).
 - Colorado Springs, XVII, 940.

destruction, XV, 483 (N. Dak.).

feeding value, XIV, 381.

host plant of beet leafhopper, XXIII, 557 (U. S. D. A.).

in Arizona, XVI, 863 (U. S. D. A.).

notes, XIII, 358 (Mass.); XX, 640.

Thistles—

as affected by iron sulphate, XXI, 436 (S. Dak.).

destruction, XVI, 883 (N. Dak.); XXII, 140 (Wis.); XXIII, 339 (Can.); XXIV, 729.

germination as affected by manure, XXI, 737 (Iowa).

notes, XV, 1085 (Vt.); XVII, 1153;

XX, 640.

Thlaspi arvense, notes, XVI, 883 (N. Dak.); XX, 640.

Thomas—

ammonium-phosphate—

decomposition, XVIII, 124.

fertilizing value, XVII, 649, 848; XVIII, 725; XIX, 826.

notes, XVIII, 124.

residual effects, XIX, 1124.

stability, XVIII, 539, 824.

slag. (See Phosphatic slag.)

Thomomys—

bottæ, host of *Ceratophyllus franciscanus*, XXIV, 61.

bottæ, susceptibility to plague, XXI, 751.

spp., destruction, XX, 551 (U. S. D. A.).

Thoms, G., biographical note, XIV, 620.

Thopa saccata, notes, XV, 169.

| *Thoracantha cyanea*, notes, XXV, 143.

Thoracic organs—

relation to chest measurements, XXII, 776.

relative importance, XXIII, 775, 776.

Thorium—

effect on plants, XX, 930.

salts, toxicity, XIX, 831.

Thosea—

cinereamarginata, notes, XVIII, 60.

recta, notes, XXI, 648.

Threadworms—

in grapevines and pear trees, XIX, 354.

red grouse, XXII, 189.

notes, XXI, 184.

Three—

days' sickness in cattle, studies, XXIII, 185.

lined leaf-beetle, notes, XX, 1048 (Conn. State).

Thremmatology, definition, XV, 541.

Threshing—

injury to seeds, XV, 197.

machinery in Russia, XV, 309.

machinery, treatise, XVIII, 192.

machines—

adjustment for cowpeas, XXI, 733 (Kans.).

interchangeable screens, XVII, 710.

trials, XIII, 795; XV, 622.

Thrips—

as a cause of onion blight, XX, 350 (Mass.).

injurious—

in Italy, XV, 276.

to cacao, XIX, 1159; XX, 257.

cotton, XXII, 59 (Hawaii).

plants, XXIII, 362.

tea, XXII, 357.

new genera and species, XXII, 752.

new species, description, XXIII, 557.

notes, XIV, 373 (Me.); XV, 589; XVIII, 557; XIX, 452 (Md.); XX, 351, 1151; XXI, 354 (U. S. D. A.), 654; XXII, 252 (P. R.), 751;

XXIII, 255; XXIV, 354, 656; XXV, 255.

of California, XVIII, 952 (U. S. D. A.).

physopus, notes, XIII, 571.

remedies, XIX, 858; XX, 560.

sexmaculata, notes, XX, 953 (U. S. D. A.).

tabaci. (See Onion thrips.)

Thrombosis in horses, XVI, 716.

Thrush—

in cattle, XIII, 493.

horses, XVIII, 1165.

notes, XVI, 128.

Thrushes—

dwarf hermit, destructive to ticks, XXV, 60.

feeding habits, XIX, 660, 856.

migratory, effect on dissemination of mistletoe, XXII, 722.

Thuja plicata, notes, XIX, 443 (U. S. D. A.).

lignicola, notes, XXIV, 717.
sp., effect on organic matter in soils, XXIII, 621.
- Trichogramma pretiosa**—
notes, XVIII, 61; XX, 1146; XXII, 459.
parasitic on codling moth eggs, XXIV, 63.
studies, XXI, 756.
- Trichogrammidæ**, notes, XVII, 783 (Hawaii).
- Trichogrammoidea lutea**, destructive to codling moth, XXIV, 55.
- Tricholoma**—
nudum, culture, XIV, 145.
transmutans as a cause of mycorrhizæ, XXI, 345.
- Tricholyga**—
grandis, notes, XXIV, 456.
grandis, studies, XX, 456 (U. S. D. A.).
spp., parasitic on silkworms, XXIV, 559.
- Trichomastix gallinarum**, notes, XXV, 789.
- Trichomes** of plants, heredity in, XXII, 230.
- Trichomonas**—
eberthi, notes, XXIV, 685.
spp., notes, XXV, 789.
- Trichophyton**—
gypseum granulosum, studies, XXII, 288.
holosericum album, notes, XXIV, 388.
tonsurans in cattle, XVI, 202.
- Trichophytosis**, transmission from cattle to man, XIV, 925.
- Trichopoda pennipes**—
notes, XIV, 270 (N. H.).
parasitic on cotton insects, XXIII, 462 (U. S. D. A.).
- Trichoptera**—
aquatic species in Adirondacks, XIII, 770.
bibliography, XXIV, 557.
larvæ, XV, 692.
metamorphosis, XV, 983.
new, from Japan, XVII, 988.
studies and bibliography, XXII, 154.
- Trichorrhexis nodosa**, etiology and treatment, XV, 306.
- Trichosiphum**, new species, studies, XXI, 247.
- Trichosoma**—
longicollæ, description, XXII, 189.
papillosum n. sp., description, XXIV, 486.
retusum, parasitic on chickens, XXV, 59.
tenaissimum in pigeons, notes, XIV, 193.

- Trichosphæria sacchari*—
 description, XV, 974; XVIII, 844 (Hawaii).
 notes, XIII, 361, 466; XIV, 263, 876, 1086; XVI, 789 (Hawaii); XVII, 472, 776; XIX, 753; XX, 58 (P. R.).
 relation to *Thielaviopsis ethacetica*, XXIII, 346.
- Trichosporium* sp., notes, XX, 82.
- Trichostongylus*—
pergracilis—
 description, XXII, 189.
 notes, XXI, 184.
 relation to grouse disease, XXIII, 590.
retortæformis, notes, XIX, 689 (U. S. D. A.).
 sp., relation to gastritis, XXIV, 786.

- Trissolcus murgantiæ*, notes, XX, 161 (U. S. D. A.).
- Tristeza*—
 in Argentina, XIII, 492.
 notes, XVII, 807.
- Tritico-nucleic acid*, studies, XIV, 326 (Conn. State).
- Triticum*—
dicoccum dicoccoides, discovery, XXIII, 534 (U. S. D. A.).
dicoccum, notes, XIII, 323 (S. Dak.).
repens, *Helminthosporium* diseases, XIV, 877.
spelta. (*See* Spelt.)
 spp., notes, XXIV, 136.
 spp., resistant to diseases, XXIII, 649.
 spp., yields, XXIII, 333 (Can.).
turgidum, analyses, XXI, 359.
villosum, notes, XIII, 323 (S. Dak.).
- Triton*—
cristatus, notes, XVIII, 357.
muticellus, notes, XVIII, 357.

- Tritoxa**—
 flexa, notes, XXII, 160 (N. J.).
 incurva, notes, XX, 257 (U. S. D. A.).
- Trochila populorum**, studies, XXIII, 751.
- Troctes**—
 divinatoria. (See Book-lice.)
 prenolepidis n. sp., description, XXII, 752.
- Troglodytes aëdon**, destructive to ticks, XXV, 60.
- Trogoderma tarsale**, notes, XV, 784; XX, 656.
- Trogus** spp., notes, XXII, 258 (U. S. D. A.).
- Trombidium**—
 holosericeum, notes, XIII, 266.
 locustarum, notes, XVIII, 353.
 sericum, notes, XXV, 459 (N. J.).
 sp., injurious to codling moth, XXI, 456 (U. S. D. A.).
- Trommsdorff leucocyte test for milk**, XXI, 675.
- Troop ships**, dietaries for, XIII, 269.
- Troops**—
 European, feeding in Manchuria, XXII, 470.
 feeding, XV, 492.
 preservation of meat for, XXII, 762.
- Tropæolum**—
 grafting experiments, XIV, 353.
 majus, transpiration, XX, 129.
 minus, gaseous exchange as affected by different forms of nitrogen, XIII, 20.
- Tropical**—
 diseases, immunity in, XXIII, 484.
 diseases, treatise, XXII, 556.
 medicine and hygiene, books, XXIV, 479.
 plants, culture, XIV, 448.
- Tropidacris dux**, injurious to coconut palms, XXIV, 255.
- Trout**—
 introduction into Natal, XVIII, 594.
 spawn, occurrence of phosphatids in, XXI, 609.
- Trox suberosus**, studies, XX, 456.
- Truck**—
 and alfalfa farm, management, XXV, 32 (Ohio).
 crop—
 diseases, notes, XXII, 452; XXIII, 247, 646; XXV, 650.
 diseases, treatment, XXIV, 447, 550 (N. Y. Cornell).
 malnutrition diseases, treatment, XXII, 147 (Va. Truck).
 crops—
 breeding and selection, XXII, 140 (N. J.).
 culture in Columbia River Valley, XXIII, 435 (U. S. D. A.).
 fertilizer experiments, XX, 236 (Md.); XXIII, 427 (U. S. D. A.).
 insects affecting, XIV, 1092 (U. S. D. A.); XXI, 559 (U. S. D. A.); XXII, 464; XXIII, 646, 759

 yield as affected by weather, XIX, 414.
 yields, XXI, 731.

Turnus butterfly, notes, XIV, 166.

Turpentine—

- adulteration, XV, 263 (U. S. D. A.); XXIII, 65 (U. S. D. A.), 168 (U. S. D. A.), 468 (U. S. D. A.), 769 (U. S. D. A.); XXIV, 567 (U. S. D. A.); XXV, 16 (U. S. D. A.), 468 (U. S. D. A.), 669 (U. S. D. A.), 769 (U. S. D. A.).
 and rosin industry in United States, XIII, 753.
 as a disinfectant, XVIII, 280.
 bactericidal action, XIV, 1016.
 beetles, notes, XXII, 159 (U. S. D. A.).
 borer, notes, XXIII, 161 (U. S. D. A.).
 detection in orange oil, XX, 708.
 effect on bacteria, XIII, 692.
 effect on seed corn, XXI, 57 (Ill.), 153 (N. Y. Cornell).
 examination, XXIV, 667.
 extraction from sawdust, XVII, 775.
 industry—
 in France, XXI, 49.
 United States, XVII, 1162.
 saving in, XVII, 979.
 statistics, XIX, 951.
 wastefulness in, XIV, 454.
 labeling, decision concerning, XX, 863 (U. S. D. A.).
 manufacture, XX, 449.
 methods of analysis, XX, 420, 420 (U. S. D. A.); XXV, 16 (U. S. D. A.).
 misbranding, XXIII, 65 (U. S. D. A.), 168 (U. S. D. A.), 468 (U. S. D. A.), 769 (U. S. D. A.); XXIV, 567 (U. S. D. A.); XXV, 669 (U. S. D. A.).
 oil, absorption by milk, XX, 975
 oil, analyses, XXI, 111.

Turpentine—Continued.

- orcharding, new method, XIV, 874 (U. S. D. A.); XV, 46 (U. S. D. A.).
 proposed specifications, XXV, 17 (U. S. D. A.).
 substitutes, methods of analysis, XX, 420.
 Turpentin—
 chipping experiments, XXV, 647 (U. S. D. A.).
 conservative, XXIII, 44, 147.
 cup and gutter system, results, XVII, 152 (U. S. D. A.).
 Turs, varieties, XXII, 232.

Turtle—

- eggs, analyses, XXIV, 367.
 industry in West Indies, XVIII, 668.

Turtles—

- bibliography, XX, 851.
 metabolism experiments, XXIII, 272.
 of Pennsylvania, feeding habits, XX, 851.
 raising in Japan, XIX, 73.

Turtur humilis, Leucocytozoon affecting, XXIV, 88.

Tuskegee Institute—

- notes, XXII, 296, 399.
 work, XVIII, 490.

Tussah, notes, XIX, 58.

Tussilago, destruction, XIV, 769.

Tussock moth—

- control in Rhode Island, XXIV, 454.
 notes, XIII, 65, 1064 (Can.); XIV, 371 (R. I.); XV, 877; XVI, 72 (N. H.), 682 (Me.); XVII, 988, 994 (Me.), 995; XVIII, 57 (Conn. State), 57 (N. J.), 158, 158 (Can.), 851 (Cal.), 1174 (Me.); XIX, 661 (N. J.), 959 (Can.), 1053 (Conn. State), 1156; XX, 161 (Ky.), 556 (N. H.); XXI, 56, 350 (Can.); XXII, 355 (Can.), 560; XXIV, 255 (Mont.).
 prevalence in Michigan, XX, 351 (Mich.).
 remedies, XXII, 560.
 rusty, in New York, XXII, 465.
 white-marked—

- biology, XX, 1052 (N. Y. State).
 injurious to corn, XXII, 751.
 notes, XIII, 574, 967; XIV, 67 (Mass.), 169 (U. S. D. A.), 268 (N. H.), 372 (Del.), 472 (Colo.), 586 (N. J.), 888, 984; XV, 168, 594 (Del.); XVI, 892 (Me.), 1096 (N. J.); XIX, 355; XX, 556 (N. H.), 653, 1050 (Minn.), 1146; XXI, 252; XXII, 57, 160 (N. J.), 355 (Can.), 465, 654; XXIV, 557.
 parasitism, XXV, 251.

Tutin, toxic properties, XXII, 486.

Tutu—

- plants, poisoning of animals by, XXII, 486.
 toxicity, researches in, XXIII, 582.

Tuv, analyses, XXI, 151.

Twig girdlers, notes, XV, 594 (N. C.); XVII, 479 (Fla.); XVIII, 750 (Ark.); XXII, 362, 798 (Okla.).

Twigs, ringing investigations, XIX, 833.

Twilight glows in the Pyrenees, XVII, 11 (U. S. D. A.).

Tychea brevicornis, notes, XIV, 1092 (Colo.).

Tydeus coccophagus, destructive to oyster-shell scale, XXV, 60.

Tylenchus—
 acutocaudatus, description, XIV, 265.
 acutocaudatus, notes, XIII, 154.
 devastatrix—
 as a cause of clover sickness, XIX, 346.
 injurious to hops, XXII, 364.
 notes, XIII, 366; XIV, 1086; XVII, 676; XVIII, 645, 648; XXI, 153; XXV, 452.
 remedies, XXIII, 547.
 studies, XXIII, 655.
 dipsaci (devastatrix), studies, XXIV, 55.
 dipsaci, notes, XXII, 246.
 oryzae, notes, XIV, 877.
 sp., notes, XIV, 770; XXIV, 154.
 spp., injurious in New Zealand, XXIV, 160.
 spp., studies and bibliography, XXI, 750.
 tritici, notes, XIV, 467; XVI, 788; XX, 156; XXI, 154, 747.

Tylogonus agave, studies, XXI, 423.

Tympanites—
 acute, treatment, XIX, 576.
 chronic, in cattle, XVIII, 778; XXI, 789.
 in bovine tuberculosis, XVI, 1132.
 cattle, treatment, XVIII, 877.
 treatment, XV, 191.

Tympanuchus cupido in Massachusetts, XXI, 450.

Tyndarichus navæ n. sp., description, XXIII, 56 (U. S. D. A.).

Type—
 fixation, historical method, XVI, 990.
 of steers, XIV, 482 (Kans.).

Typewriting, effect on metabolism, XXI, 568; XXV, 570.

Typhlitis, parasitic, studies, XXII, 790.

Typhlocyba—
 comes. (See Grape leaf-hopper.)
 picea, notes, XXV, 257.
 quercus, biology, XIX, 54.
 rosæ, notes, XIX, 557; XXIII, 757; XXIV, 454.

Typhlopsylla musculi, transmission of plague by, XX, 765.

Typhoanemia, infectious, studies, XXIII, 391.

Typhoid—
 bacilli—
 agglutination, XIII, 590; XIV, 697, 806.

Typhoid—Continued.

bacilli—continued.
 agglutination affinities, XVI, 231.
 agglutination in normal serums, XVI, 199; XXIV, 778.
 as affected by carbon dioxide, XVIII, 425 (U. S. D. A.).

1036 (Nebr.), 1117 (Cal.); XIX, 27 (N. Dak.), 132, (Kans.), 133 (Kans.), 134 (Kans.), 328 (Utah), 936 (Can.); XXI, 129 (Nebr.), 321 (Can.), 322 (Can.), 327 (Can.); XXII, 33 (S. Dak.), 330 (Can.), 441, 727 (S. Dak.); XXIII, 234 (Kans.), 335 (U. S. D. A.), 434 (U. S. D. A.), 535, 728 (N. Dak.); XXIV, 142 (Nebr.), 334 (S. Dak.), 639 (Cal.), 726 (N. Dak.); XXV, 30 (Utah), 739 (S. Dak.).

varieties for dry farming, XX, 437 (U. S. D. A.).

varieties for milling, XX, 357 (Utah).

yield in North Dakota, XVII, 237 (N. Dak.); XIX, 27 (N. Dak.).

yield on dry farms, XIX, 130 (Mont.).

dust, analyses, XIV, 790 (Wis.); XVII, 846 (Conn. State).

effect on—

carbon dioxid content of soils, XXIII, 523.

gizzard in hens, XXII, 72.

nitrate in soils, XX, 717.

nitrogen content of soils, XXIV, 422 (Utah).

soil constituents, XXV, 820 (Pa.).

soil fertility, XIII, 546 (Minn.).

soil moisture, XIV, 345; XVIII, 318; XXIV, 634, 708 (N. Dak.).

soils, XX, 435 (Minn.).

Egyptian, culture, XV, 963 (Wyo.).

electroculture, XIV, 353; XXV, 328.

elevator for treating diseases and wet grain, XV, 935.

endosperm as affected by different conditions, XVII, 24.

evaporation of water from, XV, 21.

examining and grading, XVI, 772.

exports from Russia, XVIII, 393 (U. S. D. A.).

exports from United States, XIII, 798 (U. S. D. A.); XVII, 602 (U. S. D. A.); XVIII, 787 (U. S. D. A.); XXIII, 93.

extract, photodynamic effect, XX, 1026; XXII, 27.

fallowing experiments, XXI, 43.

farina, digestibility as affected by cooking, XIX, 59.

feed, analyses, XIII, 173 (Vt.), 879 (Vt.); XIV, 72 (Vt.), 380 (Conn. State), 380 (N. J.), 683 (Pa.), 684 (Pa.), 904 (Conn. State); XV, 288, 497 (Conn. State), 993 (R. I.); XVI, 394, 903 (Conn. State), 904 (Mass.), 1108 (N. H.); XVII, 1100 (Conn. State), 1101 (N. J.), 1178

Wheat—Continued.

feed, analyses—continued.

(Mass.), 1178 (Me.); XVIII, 261 (R. I.), 862 (Conn. State), 965 (Iowa), 967 (Mass.); XIX, 66 (N. J.), 970 (Vt.), 1064 (U. S. D. A.), 1065 (Mass.), 1166 (N. H.); XX, 69 (N. J.), 1065 (Conn. State); XXI, 72 (N. H.); XXV, 71 (Mass.).
feeding value, XIII, 482; XIV, 406 (Okla.); XV, 730 (Kans.); XX, 1063 (U. S. D. A.), 1065 (U. S. D. A.).

fermentation in, XX, 225.

ferments in, XVI, 282.

fertilizer experiments, XIII, 235, 239 (Can.), 340 (Ohio), 439, 451, 541 (Ind.), 547 (Tenn.), 548, 639, 642, 643, 738, 847, 1008, 1036; XIV, 27, 29, 131 (Can.), 133 (Can.), 134 (Mass.), 236 (Cal.), 341, 352, 428 (Ohio), 432, 566, 752, 756, 954, 1059 (Colo.); XV, 137 (Can.), 138 (Can.), 144 (Pa.), 238 (S. Dak.), 463, 464 (Ohio), 469 (Ill.), 469 (Tenn.), 672, 765, 1065 (Can.); XVI, 138 (Md.), 139 (N. Dak.), 146 (N. Dak.), 242, 245, 250 (Can.), 351, 352, 553, 658, 663, 664, 762 (Mont.), 859, 860, 861, 862 (Miss.), 1070; XVII, 17, 126 (Can.), 128 (Can.), 130, 235 (Miss.), 330, 354 (N. J.), 357 (Ill.), 361 (Ill.), 361 (Okla.), 534 (Ill.), 539, 543, 848, 856, 952, 1057, 1141 (Ohio), 1148; XVIII, 20, 20 (W. Va.), 28, 29 (N. Mex.), 130 (Can.), 139 (Minn.), 219, 236 (Ind.), 628, 691 (Ohio), 717, 718 (Md.), 731, 1029, 1113, 1117 (Cal.); XIX, 27 (N. Dak.), 117 (Ill.), 124, 133 (Kans.), 219, 226, 228, 317 (R. I.), 318 (R. I.), 424, 425, 522, 538, 626 (N. J.), 824 (Md.), 833, 924 (Minn.), 925, 927, 934 (N. J.), 935 (Can.), 936 (Can.), 939 (Minn.); XX, 221, 491 (Ohio), 524 (R. I.), 624, 723, 724, 725, 822, 832, 922, 924, 1017 (Pa.), 1018, 1020; XXI, 23, 116 (Tenn.), 122, 216 (Ohio), 217 (Pa.), 222 (Ohio), 229, 230, 325 (Can.), 529, 621; XXII, 23 (Ohio), 25, 232 (Kans.), 331 (Can.), 431, 432, 434, 440, 441, 442, 537, 717; XXIII, 33, 126, 127, 135, 136, 232, 239, 239 (U. S. D. A.), 433, 531 (Can.), 532, 535, 626, 632, 633, 638, 717, 728 (N. Dak.), 730; XXIV, 22, 144, 226, 323, 335 (U. S. D. A.), 425, 440, 638 (Cal.), 716 (W. Va.); XXV, 33, 217, 322, 335, 630, 726, 733.

fertilizer requirements, XIII, 637; XXIII, 319 (U. S. D. A.).

fertilizers for, XIII, 1106 (Ohio).

fertilizing constituents removed by, XV, 126 (Mont.), 144 (Pa.).

Wheat—Continued.

fields and markets, treatise, XX, 1033.
fields, eradication of weeds from, XXIII, 339 (U. S. D. A.).
flag smut, notes, XVII, 982; XX, 345.
flag smut, studies, XXI, 642.
flintiness as affected by nitrate of soda, XXV, 334.

flinty, notes, XVIII, 236.

florist sterility in, XXIII, 451; XXIV, 743.

flour. (*See* Flour.)

fodder, analyses, XIII, 774 (N. J.).

food assimilation by, XXIV, 543.

foot disease, notes, XIV, 580, 978.

foot rot, notes, XIV, 367 (Oreg.).
for cows, XVI, 694 (Md.); XXIII, 579 (Pa.).

farm animals, XIII, 269.

pastures, XIII, 548 (Okla.).

pigs, XIV, 799 (Nebr.); XV, 711 (Wash.); XVI, 85 (Oreg.), 294 (S. Dak.); XVII, 1180 (Wyo.); XIX, 569 (U. S. D. A.); XX, 74 (Mo.); XXI, 570.

poultry, XIV, 285 (Cal.); XV, 177 (Mass.); XXII, 380 (Can.).

sheep, XV, 710 (Mont.); XVIII, 70 (Mont.); XXIII, 774.

steers, XV, 709 (Mont.), 804; XVIII, 69 (Mont.), 867 (N. Dak.).

formation and accumulation of starch in, XIV, 654.

freight rates, XIX, 286 (U. S. D. A.).

frosted, germination, XVII, 260 (N. Dak.).

frozen—

analyses, XXI, 329 (Can.), 367 (Can.).

feeding value, XIII, 174 (Utah); XXI, 368 (Can.).

for pigs, XXI, 370 (Can.).

poultry, XXII, 380 (Can.).

Fusarium diseases affecting, XXIV, 448.

garlicky, XVIII, 35 (U. S. D. A.).

germ middlings, analyses, XV, 288.

German grown, quality, XXIII, 40.

German, studies, XXIV, 567.

germination, XVI, 411 (Okla.).

germination as affected by—

carbon bisulphid, XVI, 785.

colloidal substances, XVIII, 624; XX, 225.

colored light, XVII, 1146.

copper sulphate, XIII, 657.

different salts, XIV, 28, 945.

formalin, XVII, 982 (Idaho).

fungicides, XVIII, 450, 1140;

XIX, 551; XXI, 242, 341 (Can.); XXIII, 47, 742.

galvanic currents, XXIII, 627; XXV, 25.

ozone, XVIII, 624.

soil treatment, XX, 1015.

Wheat—Continued.

germination as affected by—continued.
temperature, XV, 1084 (Can.);
XVII, 653.

weeds, XXI, 130 (Wash.).

germination, effect on quality of flour,
XXII, 263 (Kans.).

germination tests, XIV, 26 (N. Dak.);
XVII, 131 (Can.), 555; XVIII, 231;
XXII, 331 (Can.); XXIV, 145
(Kans.).

germs—

analyses, XIV, 790 (Wis.).

preparation of phosphatid from,
XXI, 302.

respiration investigations, XXII,
721.

gliadin—

content, XV, 1073 (Can.).

hydrolytic cleavage products,
XXV, 766.

physical properties, XXI, 607.

gluten—

analyses, XV, 987.

chemistry of, XVI, 439.

content, XV, 885.

determination of dry matter in,
XIX, 1109.

effect on tuberculosis, XX, 66.

proteins of, XVI, 581.

studies, XVI, 945.

glutenous and starchy, protein con-
tent, XVI, 1074 (Minn.).

glutenous, culture, XIII, 643.

grading system, description, XXIV,
145 (Kans.).

grains, development, XXIV, 37.

grains, strength and development,
XX, 1122.

grass—

analyses, XXIV, 769.

culture experiments, XX, 133
(Alaska); XXIII, 189 (U. S.
D. A.).

hay, digestibility, XXII, 71 (S.
Dak.).

mountain, notes, XVIII, 229
(Wyo.).

notes, XV, 854 (Wyo.); XVII,
233 (Iowa), 240 (Wyo.);
XVIII, 133 (S. Dak.).

seeds, studies, XXIV, 640 (U. S.
D. A.).

slender, culture experiments,
XVIII, 134 (S. Dak.).

slender, notes, XIII, 323 (S.
Dak.).

slender, root system, XVII, 23
(N. Dak.).

western, analyses, XIX, 532
(Wyo.).

western, notes, XX, 368 (Wyo.).

wild, value in plant breeding,
XVIII, 637.

yields, XXIII, 728 (N. Dak.);

classification, XIX, 1036 (Ill.); XXII, 138.

classification and naming, XX, 634.

for dry farming, XX, 437 (U. S. D. A.).

Germany, XIII, 948.

milling, XX, 357 (Utah).

special conditions, XVI, 38.

form of description, XV, 358 (U. S. D. A.).

imported, XXII, 234 (Kans.).

in Argentina, XVI, 663.

Queensland, XIII, 643.

nomenclature, XIV, 37.

resistant to alkali salts, XVII, 553 (U. S. D. A.).

resistant to diseases, XV, 267; XIX, 955; XXI, 745 (U. S. D. A.); XXIII, 649.

resistant to drought, XIX, 225.

vitality as affected by age, XIV, 529.

water content, XX, 740.

water requirements, XIV, 29 (Utah), 714 (U. S. D. A.); XVII, 753 (Colo.), 814, 841 (Can.); XVIII, 135 (Nev.), 629, 781, 881, 1037 (Can.), 1087 (U. S. D. A.); XIX, 11 (Can.); XXIII, 332.

weight as affected by heating, XXV, 135.

white spotted, XVII, 260 (N. Dak.).

wild, history, XXIII, 534 (U. S. D. A.).

winterkilling, XVIII, 1118; XXV, 640 (U. S. D. A.).

wireworms affecting, XXIV, 455 (Can.).

yellow—

berry, notes, XVII, 246 (Nebr.); XX, 835 (Kans.); XXI, 691 (U. S. D. A.).

rust, notes, XIV, 1083.

rust, studies, XIX, 153.

rust, wintering-over, XXIV, 743.

yield, XXI, 325 (Can.); XXV, 332, 735 (Kans.).

yield and weight as related to quality of flour, XXI, 358 (Can.).

Wheat—Continued.

yield as affected by—

autumnal rainfall, XVII, 10 (U. S. D. A.); XVIII, 313, 314, 713.

climate, XXIII, 732.

colored light, XVIII, 624.

early plowing, XXIII, 316.

electricity, XX, 736.

fallowing, XXIII, 136, 334.

fanning of seed, XXV, 739 (S. Dak.).

formalin, XIX, 936 (Can.).

fungi, XXII, 348.

grazing, XVIII, 467 (Miss.).

Hessian fly, XXI, 634 (Pa.).

injuries, XVIII, 630.

maturity, XIX, 1131 (Can.).

meteorology, XXI, 526.

precipitation, XX, 918; XXIV, 144.

rainfall distribution, XXV, 509.

rate of sowing, XXIII, 239.

size of seed, XIV, 432.

soil moisture, XXII, 224.

soil sterilization, XVIII, 1054 (N. Dak.).

tillers, XIX, 132 (Kans.).

time of sowing, XXII, 333 (Can.);

XXIII, 434 (U. S. D. A.);

XXIV, 434 (Can.).

treatment for smut, XV, 1086.

weather, XIX, 414.

yield—

at different latitudes, XVI, 363.

error in determining, XXIV, 196.

factors affecting, XXIV, 168.

in Eastern England, XIX, 510.

North Dakota, XVII, 237

(N. Dak.); XIX, 27 (N. Dak.).

Ontario, XVI, 1066 (Can.).

methods of increasing, XXIV, 448.

of straw and grain, XX, 536 (Ky.).

on Poltava experiment farm, XVI, 544.

relation to rainfall, XVI, 955; XXIII, 516.

relation to soil productivity, XXII, 18 (U. S. D. A.).

under dry farming, XXI, 131 (Wyo.).

Wheatin, analyses, XIV, 632 (Cal.).

Wheeling area, W. Va., soil survey, XXI, 618 (U. S. D. A.).

Whey—

albumin, relation to coagulation with rennet, XIX, 177.

albumose, formation, XIX, 177.

analyses, XX, 709.

bacteriological studies, XVIII, 177.

butter—

manufacture, XVII, 1186 (Wis.); XVIII, 277 (Wis.); XXI, 377

(Can.); XXII, 182; XXIII,

383 (Can.), 480 (U. S. D. A.);

XXIV, 583.

Whey—Continued.

butter—continued.

notes, XVI, 196, 918, 1124; XXI, 679.

studies, XVI, 196.

yields, XXI, 679.

cheese, acidity in, XVIII, 373.

cheese, composition, XXI, 77.

composition and nutritive value, XVI, 95.

device for measuring, XXI, 679.

for calves, XXIII, 74 (Wis.).

pigs, XIII, 1081 (Tenn.); XVIII, 264 (Utah); XXI, 369 (Can.); XXIII, 379 (Can.).

poultry, XVIII, 469 (Can.); XIX, 72 (Can.).

from fat cheese, centrifuging, XIX, 572.

in Emmental cheese making, composition, XVII, 1109.

lactose-fermenting yeasts in, XVIII, 1079 (Wis.).

manufacture of milk sugar from, XXIV, 614.

notes, XXI, 575 (U. S. D. A.).

pasteurization, methods, XIX, 178 (Wis.).

pasteurization, studies, XXIV, 79.

pasteurized, detection, XIX, 178 (Wis.).

product, adulteration and misbranding, XXIV, 678 (U. S. D. A.).

ropy, micro-organism producing, XVI, 197.

utilization for dietetic purposes, XXIV, 775.

vinegar, making, XX, 378.

Whin, feeding value, XIII, 1075.

Whippoorwill, economic relations, XXI, 646.

Whipworm, notes, XXII, 682; XXIII, 88.

Whirlwinds—

convection theory, XVIII, 111 (U. S. D. A.).

vertical as affected by air current, XIX, 10 (U. S. D. A.).

Whisky—

adulteration, XVII, 428.

analyses, XV, 990; XVII, 488; XVIII, 259 (N. Dak.); XIX, 357; XX, 863; XXII, 66, 165, 262 (N. Dak.); XXIV, 262 (N. Dak.); XXV, 13.

artificial coloring matter in, XVII, 613.

composition as affected by storing, XIX, 295.

compounds, labeling, XX, 863 (U. S. D. A.); XXIII, 168 (U. S. D. A.).

examination, XXII, 566 (Me.).

imitations, decision concerning, XXII, 664 (U. S. D. A.).

labeling, XVIII, 1065 (U. S. D. A.); XXII, 664 (U. S. D. A.); XXIV, 264 (U. S. D. A.).

laws of Wyoming, XXV, 166.

methods of analysis, XXV, 13.

Whisky—Continued.

misbranding, XX, 565 (U. S. D. A.), 1060 (U. S. D. A.); XXI, 263 (U. S. D. A.); XXIII, 468 (U. S. D. A.); XXIV, 171 (U. S. D. A.).

report on, XXII, 66, 764.

taxation in Ohio, XXIV, 171.

Whistling in horses, treatment, XXIV, 787.

White—

ants. (*See* Termites.)

ash rot, description, XIV, 982 (U. S. D. A.).

clover. (*See* Clover, white.)

diarrhea in chickens, treatment, XXIV, 788.

flesh, fitness for food, XXIII, 389.

fly brown fungus, studies, XXV, 451 (Fla.).

fly, citrus—

fumigation, XXI, 757 (U. S. D. A.).

fungus, investigations, XXIII, 655.

investigations, XXV, 659 (U. S. D. A.).

notes, XXI, 554, 752; XXIII, 556.

parasitism, XXV, 661.

remedies, XXV, 153.

studies, XXIII, 462 (Fla.).

fly—

description, XV, 277 (Fla.), 278.

diseases, XX, 556 (Fla.).

eradication, XVIII, 1144; XIX, 961 (Cal.), 1156 (Can.).

food plants, XX, 1053 (Fla.).

fungus parasites of, XVIII, 746 (Fla.); XIX, 660 (Fla.).

greenhouse, notes, XIV, 675 (Conn. State); XV, 382 (Mass.), 691;
